PREFATORY NOTE.

FINANCIAL STATISTICS.

This volume deals with Financial Statistics, and therefore relates chiefly to Revenue, Expenditure, Currency, and Banking. It is divided into two parts—I and II. Part I contains tables relating to Revenue and Expenditure, Mint and Coinage, Paper Currency, Registered Debt, Securities Enfaced for payment of Interest in London, Drawings of the Home Government, Ways and Means of the Home Government, Prices of Gold, Silver, and Stocks, Rates of Exchange, Military Services, and Post Office Savings Banks. To these have been added the tables relating to Banks, Co-operative Societies, and Life Assurance. Part II deals with the principal heads of Revenue and contains tables relating to Land Revenue, Forests, Opium, Salt, Stamps, Excise, Provincial Rates, Customs Revenue, Income Tax, Tributes from Native States, and Interest Receipts. A chart showing Variations in (1) the revenue and expenditure of the Government of India, (2) the debt of the Government of India, and (3) the circulation of currency notes in India since 1900, and an index have also been inserted in the volume for easy reference. The work connected with this revision has, in addition to war work, been heavy, and it has not been possible to publish this volume of the Statistical Abstract as quickly as was at first anticipated. Figures, however, for the years 1912-13 and 1913-14 and, as far as possible, also for 1914-15 have been added to the tables in this, the 7th, issue. If information, in addition to that given in the introductory notes and in the tables in the volume, is required, reference should be made to the Civil Estimates (in two volumes), the Finance and Revenue Accounts of the Government of India (one volume), the Financial Statement and Budget, and also the Report on the Operations of the Currency Department, all of which are published annually.

DEPARTMENT OF STATISTICS, INDIA.

Calcutta, February 11, 1917.

G. FINDLAY SHIRRAS,

Director of Statistics.

Revenue, Expenditure, Coinage, Currency, Public Debt, Council Bills,
Exchange, Banks, etc.

REVENUE AND EXPENDITURE

[FOR TABLES, SEE PAGES 9 TO 11]

Table No. 1 is an abstract statement of Revenue, Expenditure, and Debt of the Government of India in each year from 1877-78 to 1914-15. The funded debt outstanding in 1877-78 was 7,495 lakhs of rupees in India and 59.7 million pounds sterling in England. The total sum represents 265 per cent of the revenue of that year. In 1914-15 the funded debt outstanding was 276.5 million pounds sterling, equivalent to 272 per cent of the year's revenue. In the 38 years there was a surplus in 26 years and a deficit in 12 years. The 26 years' surplus aggregates 7,666 lakhs of rupees and the 12 years' deficit 3,207 lakhs, the result being a net surplus of 4,459 lakhs.

Table No. 2 is an abstract of the Revenue and Expenditure for ten years. During the period of 38 years which is dealt with in Table No. 1, the total revenue has risen from 6,197 lakhs of rupees in the first year 1877-78 (equivalent at the average rate of exchange of that period to £53,709,000) to 15,230 lakhs of rupees (=£101,534,000 at Rs 15 to the pound) in 1914-15. The increase represents 146 per cent reckoning in rupees and 89 per cent reckoning in sterling. During the same period the expenditure has risen from 6,623 lakhs of rupees (=£57,403,000) to 15,498 lakhs of rupees (=£103,320,000). This represents 134 per cent in rupees and 80 per cent in sterling.

In considering the Revenue and Expenditure of the Government of India, however, it is desirable to divide the Revenue and Expenditure on account of "Commercial Services," i.e., the Post Office and Telegraph Department, Railways, and Irrigation, from the Revenue and Expenditure under other heads.

The following statement gives the quinquennial averages for each of the main heads of revenue and the percentage which each bears to the total revenue, excluding the Commercial Services, for the period 1877-78 to 1911-12 and also for the years 1912-13, 1913-14, and 1914-15.

The expenditure in these tables represents expenditure from revenue only and not expenditure from borrowed capital.

Turning now to the Commercial Services, that is, the Post Office and Telegraph, Railways, and Irrigation, the following table shows the total revenue, total expenditure, and net surplus or deficit for each of these Departments, and the total for all of them together, arranged in the form of quinquennial averages :

Revenue and Expenditure under Commercial Services in thousands of rupees

Quinquennial average	POST OFFICE			TELEGRAPH			RAILWAYS			IRRIGATION			TOTAL

MINT AND COINAGE

[FOR TABLES, SEE PAGES 14 TO 29]

Gold coins

No gold coins have been minted in India since 1891-92, and gold mohur and its submultiples have practically disappeared from circulation. Sovereigns and half-sovereigns minted either in England or Australia are recognised as legal tender to an unlimited amount at the rate of one sovereign to fifteen rupees, provided that they have not been called in or lost weight beyond the limit prescribed as the lowest current weight, viz., 122·5 grains for the sovereign, and 61·125 grains for the half-sovereign—the full legal weight being 123·27447 and 61·63723 grains, respectively. Under Notification No. 1448 A., dated the 8th March 1907, however, sovereigns and half-sovereigns, which have lost weight so as to be of less weight than that for the time being prescribed for light coins by or under the Coinage Act, 1870, as the least current weight, are receivable at Treasuries, Currency Offices, Mints, and Presidency Banks at the following rates, namely :—

- (a) When such coins have not been reduced by more than three grains below standard weight, that is, are not less in weight than grains 120·27447 and 58·63723, respectively, at their face value; and
- (b) When such coins are of less weight than grains 120·27447 and 58·63723, respectively, at their bullion value by weight :

Provided that such coins have not been illegally dealt with, that is, have not been impaired, diminished or lightened, otherwise than by fair wear and tear, or defaced by having any name, word, device or number stamped thereon, whether the coin has or has not been thereby diminished or lightened.

Silver coins.

The weight and fineness of the silver coins minted in the Indian mints for circulation in India are as follows :—

	Fine Silver (grains)	Alloy (grains)	Total (grains)
Rupee	165	15	180
Half-rupee (8 annas)	82½	7½	90
Quarter-rupee (4 annas)	41¼	3	45
Eighth of a rupee (2 annas)	20¾	1¾	22½

In the year 1893 the two Government Mints at Calcutta and Bombay were closed for the unrestricted coinage of silver for the public. During the five succeeding years, the coinage of rupees ceased, except that in the years 1897-98 and 1898-99 about nine million rupees were coined for Native States to replace their local currencies. By the winter of 1900 the stock of rupees in the Currency reserve had fallen so low that direct replenishment by new coinage became a necessity. The coinage was begun in February 1900, the Government purchasing the silver required, and paying for it mainly with the gold accumulated in the Paper Currency Reserve. In that and the following month a crore of rupees was coined and over 17 crores of rupees in the year ending the 31st March 1901, including the rupees issued in connection with the conversion of the currencies of Native States.

The statement below shows the silver coinage in the last five years :—

Number of pieces					
	Rupees	Half-rupees	Quarter-rupees	One-eighth-rupee	Total
1910-11	15,243,000	4,222,000	9,056,000	18,461,000	46,982,000
1911-12	24,509,000	2,878,000	3,413,000	10,186,000	40,986,000
1912-13	18,752,900	4,895,000	11,863,000	19,421,000	223,708,000
1913-14	121,361,000	4,548,000	20,635,000	22,201,000	168,745,000
1914-15	18,072,000	2,303,000	4,371,000	11,834,000	36,580,000

Value (in rupees)					
1910-11	1,52,42,000	21,11,000	22,64,000	23,08,000	2,19,25,000
1911-12	2,45,09,000	14,39,000	8,53,000	12,73,000	2,80,74,000
1912-13	18,75,29,000	24,47,000	29,66,000	24,28,000	19,53,70,000
1913-14	12,13,61,000	22,74,000	51,59,000	27,75,000	13,15,69,000
1914-15	1,80,72,000	11,52,000	10,92,000	14,79,000	2,17,95,000

The foregoing figures include the value of old rupees received into the mints for recoinage which is stated separately below :—

	British rupee (nominal value) R	Native coins (equivalent in British rupees) R	Other coins (equivalent in British rupees) R
1910-11	2,17,75,000	..	6,000
1911-12	2,50,63,000	..	13,000
1912-13	3,53,91,000	1,29,21,000	7,000
1913-14	2,96,11,000	36,59,000	2,000
1914-15	2,04,36,000	..	150

Dollar and cent pieces

In addition to the coinage of silver for circulation in India, the mints also received, under an agreement with certain Exchange Banks, silver for coinage into British dollars for circulation in Hongkong and the Straits Settlements. This agreement terminated on the 10th December 1903, and no fresh agreement has been entered into. Owing to a change in the currency policy in the Government of the Straits Settlements a new dollar was introduced there, the coinage of which has been undertaken at the Bombay mint since September 1903. Since April 1905 the coinage of the Straits fifty-cent pieces has been undertaken in the Bombay mint, and since October 1909 the coinage of the twenty-cent, ten-cent, and five-cent pieces for the Straits Settlements Govern-

ment has further been undertaken in the same mint. The coinage of both dollars and of the twenty-cent, ten-cent, and five-cent pieces in the five years ending 1913-14 have been :—

Number of pieces				
	British Dollars	Twenty-cents	Ten-cents	Five-cents
1909-10	5,954,218	..	11,088,198	3,263,015
1910-11	5,552,910	3,084,365	1,560,419	8,739,800
1911-12	37,470,509	..	96,797	564,668
1912-13	5,672,075	..	..	444,628
1913-14	1,566,693	191,802	..	..
No dollars or cent pieces were coined during 1914-15				

The British dollar is 416 grains Troy in weight and of 900 millesimal fineness, and the Straits dollar is of the same weight and fineness. The twenty-cent, ten-cent, and five-cent pieces weigh 83.81, 41.90, and 20.95 grains, respectively, and are of 600 millesimal fineness. With the expiry in December 1903 of the special agreement with the exchange banks for the coinage of British dollars, the number coined fell to 3,955,647 in 1903-04 and 648,847 in 1904-05, while the coinage in these two years of Straits dollars was 15,009,891 and 20,364,664 pieces, respectively. No dollars were coined in 1905-06 or in 1906-07, but in 1907-08 the coinage of British dollars was resumed in the Bombay mint. No Straits dollar has been coined since 1904-05, and fifty-cent pieces have so far been coined only once and that in 1905-06.

			Nickel coins
In 1906 provision was made for the coinage of a nickel coin, and by Notification No. 4597 A., dated the 22nd July 1907, it was directed that the nickel one-anna piece should thenceforth be coined at the mint and issue. The coin weighs 60 grains Troy and has a waved edge with twelve scollops, the greatest diameter being 21 millimetres and the least 19.8 millimetres. The statement in the margin gives the number and value of			
	Number	Value (in rupees)	nickel coins struck in the mints in last five years. The desirability of issuing a half-anna nickel coin was considered by the Government of India in 1909, but it was decided not to take action in this direction until the people had become thoroughly familiar with the present one-anna coin.
1910-11	40,200,000	25,13,000	
1911-12	41,760,000	26,10,000	
1912-13	39,776,000	24,86,000	
1913-14	46,320,000	28,95,000	
1914-15	42,352,000	26,47,000	

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835, and into the Madras and Bombay Presidencies by Act XXII of 1844. The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows :—

	Grains Troy
Double pice, or half-anna	200
Pice or quarter-anna	100
Half-pice or one-eighth of an anna	50
Pie, being one-third of a pice or one-twelfth of an anna	33½

Ninety rupees' worth of pice weigh 576,000 grains troy, or 82½ lb avoirdupois.

			Act III of 1906 provided for the substitution of bronze for copper coinage. By Notification No. 3895A., dated the 11th July 1906, it was directed that the bronze coins should thenceforth be coined and issued at the mint, and that, with effect from the 1st August 1906, copper coins should cease to be coined. The weight and dimensions of the several denominations of bronze coins are given in the margin.
	Standard weight (in grains Troy)	Diameter (in millimetres)	
Pice	75	25.4	
Half-pice	37½	21.15	
Pie	25	17.45	

The statement below shows the bronze coinage of the last five years :—

Number of pieces				
	Quarter anna	Half-pice	Pie pieces	Total
1910-11	47,265,685	12,528,030	20,874,706	80,668,421
1911-12	55,918,260	4,879,970	2,645,294	63,443,524
1912-13	107,455,909	12,911,328	25,937,897	146,305,134
1913-14	122,636,891	10,896,672	16,148,527	149,682,090
1914-15	20,441,600	4,876,800	19,814,400	45,132,800
Value (in rupees)				
1910-11	7,38,526	97,875	1,08,722	9,45,123
1911-12	8,73,723	38,125	13,777	9,25,625
1912-13	16,78,999	1,00,870	1,35,093	19,14,962
1913-14	19,16,201	85,130	84,107	20,85,438
1914-15	3,19,400	38,100	1,03,200	4,60,700

With the fall in the prices of silver, which preceded the closure of the Calcutta and Bombay mints in 1893, there was a very large importation of the metal into India and excessive quantities were coined by some of the Native States during that period and for some years following the closure. It was found, thereafter, that the coinages were greatly in excess of the needs of the States, and operations abated in 1898. The arrangements made with some of the States for the substitution of the British for the local rupee had led to the closing of the local mints. The States in which coinage was carried on during the last fifteen years have been dealt with in table No. 19. The total coinage from new silver in 1914 amounted to 4,434,862 tolas, and the States in which coinage was carried on to any considerable extent in that year were Hyderabad and Udaipur.

MINT AND COINAGE*

NOTE.—From the 26th June 1893, when the mints were closed to the unrestricted coinage of silver, the receipts from individuals represent coins of Native States tendered for recoinage, particulars of which appear in table No. 7. From the same date silver belonging to the Government has been valued at its cost price instead of at the fixed rate of Rs. per tola of standard silver, but old rupees received for recoinage, as entered in table No. 6, are still taken at their nominal value. The silver received into the mint for coinage into British dollars intended for circulation in the Far East and into the new dollar adopted as the currency of the Straits Settlements is excluded from this table. Particulars of the coinage of these British and Straits dollars will be found in table No. 18.

NOTE.—The quantities in the column "net imports" for both gold and silver, for the years 1873-74 to 1886-87, are estimates only, deduced from the declared values of the trade for those years by the following process:—
For gold, the rupee value of the monthly net imports was converted into sterling at the average rate of exchange in each month, and this sterling value was then divided by the English mint price of gold (£3 17s. 10½d. per ounce). For silver, the average price of ₹107 per 100 tolas, or ₹255.53 per 100 ounces, was taken as the basis of the value of the annual imports.

MINT AND COINAGE

No. 6.—OLD GOVERNMENT of INDIA RUPEES (including small SILVER COINS) received into the MINTS for RECOINAGE, and SILVER COINAGE in each MINT, from 1835-36 to 1914-15

	VALUE OF OLD RUPEES RECEIVED INTO THE MINTS FOR RECOINAGE				VALUE OF NEW RUPEES AND SMALL SILVER COINED

NOTE.—The British dollar is 416 grains Troy in weight and of 900 millesimal fineness

(a) The coinage of these cent pieces has been undertaken since October 1909

(b) Straits dollars of the same weight and fineness as British dollars

(c) Fifty cent pieces. The Straits fifty cent piece weighs 209.52 grains and is of 800 millesimal fineness

(d) From Burma ports

(e) Includes Rs. 150 being the value of British dollars exported from Madras

(f) The coinage of the twenty cent pieces commenced in May 1910

No. 20.—OUTTURN in the INDIAN MINTS of SILVER BULLION IMPORTED from ENGLAND

Note.—This table states approximately the sterling cost of a rupee coined during the period when the mints were still open to the receipt of silver from the public for coinage. The cost was determined by the sterling price of silver and the cost of sending it from London to India, to which were added the mint seignorage and other charges. The calculations used in the preparation of this table are as follows :—

Column A.—To the cost of an ounce Troy of standard silver in London, 1 per cent is added for freight and charges for remitting, and to the total cost $\frac{1}{8}$ per cent is added as interest for the time taken by a bullion remittance in excess of the time occupied by a remittance by bill. This sum is divided by the mint outturn of an ounce of fine silver bullion received into the mint after cutting, as given below, and the quotient, showing the cost of a Government rupee in India in pence, is entered in column A :

One ounce Troy of English standard silver	= 2·6909
Mint duty and melting charge at R21 per mille	= ·0565
NET VALUE	2·6344
Mint loss in melting at ·25 per mille	= ·0007
MINT NET OUTTURN	2·6337

Column B.—The rates in this column are based on the same data as in A, except that $\frac{1}{2}$ per cent is added as interest.

Column C.—The rates in this column are based on the transit charges being $1\frac{1}{4}$ per cent, namely, freight $\frac{1}{2}$ per cent insurance $\frac{1}{2}$ per cent, boxes, packing, etc., $\frac{1}{8}$ per cent, and brokerage $\frac{1}{8}$ per cent, interest at $\frac{1}{8}$ per cent. The mint outturn of an ounce of fine silver bullion is R2·6337.

Column D.—The rates in this column are based on the same data as in C, except that interest is taken at $\frac{1}{2}$ per cent instead of $\frac{1}{8}$ per cent.

The following are the data used in calculating the results stated in these columns :—

English standard silver	= $\frac{37}{100}$ ths fine
Indian „ „	= $\frac{11}{12}$ ths fine
1 ounce Troy	= $2\frac{2}{3}$ tolas

Charges in England : Freight, insurance, boxes, packing, brokerage, etc. = 1 to $1\frac{1}{4}$ per cent

Interest = 6% per annum on the time of transit of a silver shipment in excess of the transit of a bill. The excess is taken to be 7 and 28 days, and the interest for the time, one-eighth and one-half per cent, respectively.

Charges in India : Mint duty (seignorage)	= 2%
Melting charge	= $1\frac{1}{100}$
Loss in melting inferior silver	= $0\cdot25\frac{1}{100}$

PAPER CURRENCY

[FOR TABLES, SEE PAGES 34 TO 43]

Laws and
orders relat-
ing to Paper
Currency

Under Acts, VI of 1839, III of 1840, and IX of 1843, the Presidency Banks of Bengal, Bombay, and Madras were authorised to issue notes payable on demand, but the issue of the notes was practically limited to the three cities of Calcutta, Bombay, and Madras. These Acts were repealed, on the 1st March 1862, by Act, XIX of 1861, providing for the issue of a paper currency through a Government Department, by means of notes of the Government of India payable to bearer on demand. Since then no banks have been allowed to issue notes in India. This Act was replaced first by Act, III of 1871, and subsequently by Act, XX of 1882. The Act of 1882 was amended by Acts, XV of 1890, VIII of 1893, XXI of 1896, II of 1898, VIII of 1900, IX of 1902, and VI of 1903; all these Acts were superseded by Act, III of 1905, which again was amended by Act, II of 1909. The last two enactments were repealed by Act, II of 1910, which again has been amended by Act VII of 1911. By the Act of 1882, the Paper Currency was extended to Burma, which province had not been included in the former arrangements. By Act XV of 1890, the maximum limit of that portion of the reserve held against the note circulation, which may be invested in Government securities, was raised from sixty millions to eighty millions of rupees. Act VIII of 1893 gave effect to the decision of the Government of India (1) to close the Indian mints to the unrestricted coinage of silver for the public, and (2) to issue currency notes in exchange for gold coin or bullion to any amount, the law until then having provided only for the issue of notes against silver. Act XXI of 1896 empowered the Government of India to raise the limit of the reserve, which may be invested in Government securities, to one hundred millions. Act II of 1898, which was designed as a temporary measure of relief to a stringent money market, empowered the Governor-General in Council to issue currency notes on the security of gold deposited in England. The Act terminated on the 21st July 1900, but the authority given to Government was continued, by Act VIII of 1900, for another two years, this Act also giving the Secretary of State for India power to expend the gold so deposited in the purchase of silver for remittance to India for coinage. The Act of 1900 was continued by Act IX of 1902, and the authority given as a temporary measure was made permanent. Act VI of 1903, which was designed to increase the circulation of five-rupee notes, declared such notes, when issued from any town outside Burma, to be legal tender throughout British India, except Burma, and authorised their encashment at any office of issue in British India, except Burma. Act III of 1905 repealed all these Acts and re-enacted their provisions in a consolidated form. It further raised the limit of the invested portion of the reserve from 100 to 120 millions of rupees, and allowed a part of the investment not exceeding 20 millions of rupees to be made in sterling securities. Act II of 1909 declared five-rupee notes to be legal tender throughout British India and authorised their encashment at any office of issue in British India. Act II of 1910 repealed Acts III of 1905 and II of 1909 and amended and consolidated the law on the subject. By it, a note of the value of five, ten, or fifty rupees, as well as a note of any other denominational value which the Governor-General in Council may, by notification in the *Gazette of India*, so specify, was declared to be a "universal currency note," that is, legal tender throughout British India and encashable at any office of issue in British India; the then existing sub-circles of Cawnpore, Lahore, Karachi, and Calicut were abolished, and the first three of these constituted separate circles of issue in addition to Calcutta, Madras, Bombay, and Rangoon. At the same time, by a notification issued under the Act, the further issue of 20-rupee notes was discontinued. By another notification issued in 1911 under section 2 of the same Act a currency note of the denominational value of one hundred rupees was declared to be a "universal currency note." Act VII of 1911 raised the invested portion of the Currency Reserve from 12 crores to 14 crores with permission to make the additional investment in sterling securities if desired.

The function of the Paper Currency department is to issue, without any limit, promissory notes (called currency notes) of the Government of India payable to the bearer on demand, of the denominations of Rs. 5, 10, 50, 100, 500, 1,000, and 10,000, the issue being made in exchange for rupees or half rupees or for gold coin, which is legal tender, from any Paper Currency office or agency, and for gold bullion and gold coin which is not legal tender, from circle offices on the requisition of the Comptroller General. The present circles and offices of issue of the notes and the territories within which the notes of each circle are legal tender, are as follows :

Offices of issue	Officers in charge	Circles or geographical limits within which notes are legal tender
Calcutta	Controller of Currency (Head Commissioner of Paper Currency)	The territory under the Governor of Bengal, the Lieutenant-Governor of Bihar and Orissa, and the Chief Commissioner of Assam, and the territories under the Superintendent, Port Blair, and the Chief Commissioner, Andamans, and the Bikaner State
Cawnpore	Commissioner of Paper Currency (Accountant General, United Provinces)	The territory under the Lieutenant-Governor of the United Provinces of Agra and Oudh, the Cantonment and civil lines of Nowgong, Shambhar, and the Bharatpur and Dholepur States, and the lands occupied by the (a) Bina-Agra portion, (b) the Cawnpore Branch; and (c) the Manikpur Branch of the Great Indian Peninsula Railway, Midland Section

PAPER CURRENCY

Offices of issue	Officers in charge	Circles or geographical limits within which notes are legal tender
Lahore	Commissioner of Paper Currency (Accountant General, Punjab)	The territory under the Lieutenant-Governor of the Punjab, the Chief Commissioner of the North-West Frontier Province, and the Chief Commissioner, Delhi
Madras	Commissioner of Paper Currency (Accountant General, Madras)	All the districts in the Madras Presidency, the territory administered by the Chief Commissioner of Coorg and the Civil and Military Station of Bangalore
Bombay	Commissioner of Paper Currency (Accountant General, Bombay)	All the districts of the Bombay Presidency proper, the Central Provinces and Berar, and all the districts in Ajmer-Merwara, and the areas in the Hyderabad (Deccan) State in which the Governor-General in Council exercises jurisdiction through the Resident, the cantonments of Baroda, Mhow, Nimach, Agar, Guna, and Sehore, the Indore Residency Bazar, the Native States in Rajputana, except the Bikaner, Bharatpur, and Dholepur States, and the Railway lands in Central India and Rajputana except those mentioned under Cawnpore
Karachi	Commissioner of Paper Currency (Accountant General, Bombay)	The province of Sind and Baluchistan (British and Agency)
Rangoon	Commissioner of Paper Currency (Accountant General, Burma)	All the territory under the Lieutenant-Governor of Burma

Five subordinate offices, Nagpur, Akola, Trichinopoly, Vizagapatam, and Coconada, were open for several years, but were closed, the first two and the fifth in 1882 and the two others in 1872. The Currency office at Allahabad was transferred to Cawnpore on the 1st February, 1908. Paper Currency Reserve

Currency notes are supplied by the Secretary of State through the Bank of England on an indent from the Head Commissioner. The Head Commissioner or Commissioners supply Currency Agents with all the notes required for the purposes of the Paper Currency Act. Every such note, other than a "universal" note, bears upon it the name of the place from which it is issued and every note is impressed with the signature of the Head Commissioner or of a Commissioner. The officers in charge of the circles of issue are authorised to issue, from the office or offices established in their circles, currency notes in exchange for the amount thereof (1) in rupees or half-rupees or in gold coin which is legal tender under the Indian Coinage Act, or in rupees made under the Native Coinage Act, IX of 1876, and (2) on the requisition of the Comptroller General, to all treasuries, in gold coin which is not legal tender under the Coinage Act or gold bullion at the rate of one Government rupee for 7½3344 grains troy of fine gold. Currency notes can also be issued against gold coin or bullion or silver bullion or sterling securities held by the Secretary of State for India in Council.

Every note is a legal tender in its own circle (except by Government at the office of issue) for the amount expressed in that note; that is to say, whenever a note forms the integral sum, or a portion, of any payment, either to Government on account of a revenue or other claim, or to any body corporate or person in British India, it is a legal tender. Five, ten, fifty, and hundred rupee notes are legal tender throughout British India. Notes of higher denominations than hundred rupees are payable only at the office or offices of issue of the town from which they have been issued. Any note of the old subordinate circles of Lahore, Cawnpore, Karachi, and Calicut which may still be in circulation are payable at the office of the Presidency circle to which those sub-offices were subordinate. Five, ten, fifty, and hundred rupee notes are payable at any office of issue in British India. In ordinary circumstances every Government treasury, of which there are about 250 in British India, cashes or exchanges notes if it can do so without inconvenience; and when this cannot be done conveniently for large sums, small sums can generally be exchanged for travellers. By executive orders, 20-rupee notes already in circulation are legal tender throughout British India and encashable at any office of issue in British India, but notes of this value will not be issued in future. Notes when legal tender and when payable

The whole amount of currency notes in circulation is secured by a reserve of gold and silver coin or bullion and securities of the Government of India or of the United Kingdom. The total amount of such securities is limited to 140 millions of rupees, of which not more than 40 millions of rupees may be in sterling securities. Under the Act of 1882 the maximum limit of the securities was fixed at sixty millions of rupees; but, the issues having largely expanded, the Government of India was empowered by Act, XV of 1890, to raise the limit to eighty millions. The power was utilised to raise the invested reserve to seventy millions on the 19th December, 1890, and to eighty millions a year later, on the 3rd December, 1891. By Notification No. 5366 of the 18th December, 1896, the invested reserve was raised to one hundred millions, the power to do so having been given by Act, XXI of 1896. Act III of 1905 raised the limit to 120 millions and in August of that year 20 millions of the reserve were invested by the Secretary of State in consols and exchequer bonds. In 1908-09 the exchequer bonds were replaced by consols. By Act, VII of 1911, the limit was raised further to 140 millions, and in April of that year 20 millions were invested by the Secretary of State in consols. Supply as issue of currency not

PAPER CURRENCY

Under the Gold Note Acts of 1898 and 1900, the Government of India had obtained authority to hold a part of the metallic portion of the reserve in gold coin (or temporarily in silver bullion) in London instead of in India. The object of these enactments was merely to afford temporary relief to the Indian money market in seasons of stress. A certain amount of gold had in this way been held in London during 1899 and 1900, but not to any large extent, and the occasion for doing so ceased, except in regard to gold in transit, from the middle of 1900. Act II of 1910, however, gives full power to hold the metallic portion of the reserve or any part of it, either in London or in India or partly in both places, and also in gold coin or bullion or in rupees or silver bullion, at the free discretion of Government, subject only to the exception that rupees should be kept only in India and not in London. A currency chest was accordingly opened in London and a sum of £6,000,000 was remitted from India in pursuance of this policy, and a further sum of £1,045,000 was transferred to the chest from the Secretary of State's balances during the course of 1905-06. On the 31st March 1914 the London currency chest held £5,100,000 on behalf of the Currency Reserve.

The metallic reserve may consist of sovereigns, half sovereigns, rupees, and half rupees, and gold and silver bullion, the last named being valued at the sum spent on the purchase of such bullion. No gold was contained in the reserve between March, 1876, and February, 1898, and the quantity increased very slowly until February, 1899, but from that date it rose rapidly till the end of March, 1900, when it amounted to £7,500,012. Government then took measures to reduce what was considered to be an inconveniently large gold reserve, and at the end of March, 1901, the value of the gold reserve had fallen to £5,778,518. In the next three years it again increased continuously from £7,023,921 at the end of 1901-02 to £9,859,564 at the end of 1902-03 and £10,789,567 at the end of 1903-04. During the next three years it remained practically steady, the amount held on the 31st March, 1907, being £10,688,841, inclusive of £7,025,000 held in London. In 1907-08 the serious monetary crisis in America and the contraction in the exports from India owing to the famine led to a very large increase in the demand for gold at the Currency offices with the result that on the 31st March, 1908, the value of the gold reserve had fallen to £6,417,841, inclusive of £3,705,000 held in England. Adverse trade conditions continued in 1908-09 and on the 31st March, 1909, the gold reserve had dwindled down to £1,523,414, of which £1,500,000 was held in England. Normal conditions returned in 1909-10 and the stock of gold in the reserve rose to £8,701,716 on 31st March, 1910. On the 31st March, 1911, the stock of gold in the reserve amounted to £11,231,484. It rose to £21,254,417 on the 31st March, 1912, and to £25,683,387 on the 31st March, 1913, but fell to £10,196,384 on the 31st March, 1915.

The interest accruing on the invested reserve is entered in a separate account, and paid to the credit of the Government of India, under the head "Profits of note circulation." The interest on the one hundred and forty millions of rupees in the invested reserve amounted in 1914-15 to R46,43,585 made up of Rs. 34,70,420 in India and Rs. 11,73,165 in England, the expenditure of the Department being about R23,53,554 on the average for the last five years.

Circulation
of notes.

The average monthly circulation of the notes has been, in millions of rupees :

Five years ending	1880-81	129.07
"	1885-86	142.65
"	1890-91	171.67
"	1895-96	282.44
"	1900-01	265.39
"	1905-06	361.80
"	1910-11	481.97
For the year	1911-12	573.65
"	1912-13	656.21
"	1913-14	655.51
"	1914-15	640.4

The circulation in each circle on the 31st March, 1912, 1913, 1914 and 1915 was (R) :

	1912	1913	1914	1915
Calcutta including Cawnpore and Lahore	32,43,32,670	36,68,74,325	34,88,52,295	31,12,61,635
Bombay " Karachi	15,86,08,260	15,68,84,645	16,02,65,330	16,90,95,970
Madras " Calicut	7,97,73,575	10,44,16,725	8,84,10,880	8,50,15,655
Rangoon	5,09,10,590	6,16,02,545	6,36,47,430	5,09,27,255

The circulation of the different denominations of notes on the 31st March, 1895 and 1915, was as shown in

	1895	1915
	R	R
5-rupee	28,15,075	1,56,95,975
10 "	4,32,83,580	14,98,61,960
20 "	72,98,000	5,75,480
50 "	1,20,13,750	1,74,14,500
100 "	6,17,19,200	16,05,19,700
500 "	2,39,32,500	2,36,85,000
1,000 "	6,11,68,000	9,20,37,000
10,000 "	9,47,70,000	15,65,10,000

the margin. Looking back over the twenty-one years since 1894-95, the relative popularity of each denomination of note may be measured by the increase in its circulation, an exception, however, being made in the case of notes for 10,000 rupees which are chiefly used as a convenient form in which to hold the balances in the Government reserve treasuries. In 5-rupee notes there is a comparatively large increase of 457.5 per cent, while those for ten rupees have increased 246.2 per cent and notes for 100 rupees have increased 160 per cent. The circulation of notes for 20 rupees have suffered from time to time from a scare brought about by the operations of forgers. It suddenly dropped in 1882-83 to hardly more than half the circulation in the preceding year and did not recover until 1890; thereafter there was a gradual increase, and in 1908-09 the circulation nearly reached the figure of 1881-82, but it has since dropped steadily, and rapidly, and, as already stated above, further issue of 20-rupee notes has been discontinued. Notes for 50 rupees also apparently do not supply any extensive demand, for they have

PAPER CURRENCY

increased by 45 per cent only. Notes for 500 and 1,000, rupees which are commonly employed in commercial and banking operations, have decreased one per cent and increased 50·5 per cent, respectively. The increase in the average active circulation of notes is given in the following table (in millions of rupees) :—

	1910-11	1911-12	1912-13	1913-14	1914-15
Gross circulation	543·5	573·7	653·2	655·5	640·4
Amounts held in Reserve and other Treasuries	78·7	78·8	132·2	126·4	75·4
Balance, being notes in circulation with the public	464·8	494·9	524·0	529·1	565·0
Notes held by Presidency Banks at Head Offices	77·3	76·0	70·1	62·8	110·7
Notes in actual circulation	387·5	418·9	453·9	466·3	454·3

It may be interesting to show here the absorption of rupees and half rupees during the last four years. The figures below are in millions of rupees.

	1911-12	1912-13	1913-14	1914-15
Opening balance (Currency, Treasury and Gold Standard Reserve)	351·9	235·8	284·6	327·0

No. 24.—Currency Notes in circulation and held in Government Treasuries in each circle and sub-circle, and the total Reserve in Gold and Silver, in each year from 1893-94 to 1914-15

Wish you a very
happy New Year. May it
bring to you the winning
success to all your efforts
in the cause of the welfare
of the Motherland. Really sorry

that I could not meet you
at any place when you
called in - Genial Capt-
away for a very serious case -
Specially sorry & annoyed ^{with} to
that you are ^{now} in to
meet me to exchange an

PAPER CURRENCY

REGISTERED DEBT

[FOR TABLES, SEE PAGES 45 TO 63]

Amount of debt

The tables on debt are similar to those of previous issues. The question of their revision is now under consideration. The registered debt of India consists of rupee loans raised in India and sterling loans raised in England.

The amount of debt on the 1st April 1914 was :—

In England	£	177,064,757
In India, R1,42,83,64,790, converted into £ at R15=£1		97,123,719
TOTAL		274,188,476

The total debt outstanding on 31st March 1915 was as follows :—

In England	£	176,190,358
In India, R1,45,68,55,790, converted into £ at R15=£1		100,351,013
TOTAL		276,541,371

In England £500,000 India bonds, and £374,399 India stock, were discharged during 1914-15.

In India a 3½ per cent rupee loan of 5 crores was issued in July 1914 at an average price of R95-9-7.

Classification of debt

The total debt is classified in the accounts as (1) Public Works Debt, (2) Ordinary Debt. The amount entered as belonging to the former category is the equivalent of the total capital expenditure which has been incurred by the State on public works, together with the amount advanced to Railway Companies for capital expenditure; the " Ordinary Debt " consists of the remainder of the debt. In any year in which, owing to the use of surplus revenue or deposits for the construction of public works, the capital expenditure of the year exceeds the amount of debt incurred in the year, the effect of this system of classification is to cause a decrease to be shown in the amount of the ordinary debt.

Distribution of debt

The distribution of the total registered debt in India and England in the last five years was as follows :—

[Millions of £ sterling]

	Ordinary Debt	PRODUCTIVE PUBLIC WORKS DEBT.			Grand total of debt (columns 1 and 4)
		Railways	Irrigation	Total	
On 31st March—					
1911	40·4	195·8	33·8	229·6	270·0
1912	33·0	203·0	35·7	238·7	271·7
1913	25·0	211·8	37·6	249·4	274·4
1914	12·8	222·0	39·4	261·4	274·2
1915	2·2	233·2	41·1	274·3	276·5

It may be explained that for the purpose of these figures rupees have been uniformly converted into pounds sterling at the rate of R15 to the pound.

It will be seen that out of a total debt of £276·5 millions, at the end of March 1915, only about £2 millions represented ordinary or unproductive debt. The annual interest on the latter was about £½ million only, and on the productive debt about £9½ millions; so that the total interest charges amounted to some £9½ millions.

At the end of 1914-15, R1,381 millions of the debt bore interest at 3½ per cent, R82·06 millions at 3 per cent, and R32 millions at 4 per cent. The total interest charge on the rupee debt at the end of 1914-15 was R5,25,30,534 and on the sterling debt £5,682,898.

Of the rupee debt it is estimated that including R97·5 millions held in London, R703·6 millions were held by Europeans at the end of 1914 and R803·2 millions by Indians, the holdings by Indians being 53 per cent of the whole debt. It should be noted, however, that the invested currency reserve is included in the sum held by Europeans. No portion of the sterling debt is held by Indians.

REGISTERED DEBT*

No. 28.—**ABSTRACT STATEMENT**—AMOUNT of the RUPEE and STERLING DEBT and of the INTEREST thereon; annual INCREASE or REDUCTION of the DEBT; and the PROPORTION of the RUPEE DEBT held in LONDON, from 1820-21 to 1914-15

NOTE.—The figures are taken from the annual Finance and Revenue Accounts of the Government of India, but the method of distribution of the total debt and of the interest thereon between "Ordinary Debt" and "Debt incurred for Railways and Irrigation Works" has not been uniform and has been materially altered from the year 1906-07

(c) Excludes £4,105 for miscellaneous Public improvements

(b) The figures of rupee debt from 1899-1900 onwards are converted at the rate of £1=R15 in consequence of the introduction of the Gold Exchange standard in India in that year. The figures for years prior to 1899-1900 were converted at the rate of £1=R10. It is necessary to remember this in order to avoid introducing superficially confusing results

(a) includes Paper Currency Reserve

(b) This decrease in the holdings by Europeans and the corresponding increase in the holdings by Indians are due to the rectification of a house and erroneous classification in the Public Debt Office where, until 1897-98, notes presented for payment of interest by the Banks were treated as held by the Europeans though the owners were often Indians

respectively prepared on the basis of the INTEREST paid on each LOAN at all the TREASURIES throughout December of each year from 1895 to 1914

" " 1900-1904 . . .	1,81,70,960	2,71,18,000	19,55,40,718
" " 1905-1909 . . .	1,42,18,860	1,67,09,620	15,87,62,568
For the year 1910 . . .	1,33,42,300	2,91,10,700	14,43,14,833
" " 1911 . . .	35,10,200	1,97,07,500	12,58,92,850
" " 1912 . . .	65,73,300	1,56,91,600	11,44,13,725
" " 1913 . . .	34,54,100	1,19,11,800	10,77,64,766
" " 1914 . . .	40,73,800	1,02,91,300	9,90,72,625

Until 1866 the average amount outstanding annually varied between 6·4 and 7·9 crores of rupees, but in that year it rose suddenly to 11·9 crores and reached 16·9 crores in 1870. From 1871 it again declined and until 1878 it stood between 13 and 14·8 crores of rupees. There was then a rapid increase to 16·9 crores in 1879 and 19·2 crores in 1880. Then followed a slower rate of increase attended with fluctuations, which were dependent on fluctuations in the price of silver and in the conditions of the money market, Government promissory notes having become a regular form of remittance and re-transfer by the exchange banks. The amount outstanding rose to 21·2 crores in 1882 and declined again to about 19·2 in 1887, rising again in 1889 to 21·8 crores. Then followed another period of very rapid increase, largely induced by speculative influences. In 1891, 1892, and again in 1896 the average amount outstanding was over 26 crores. In the following year it fell to 23 crores and from 1898 to 1902 it fluctuated between 20 and 21 crores. Since that year there has been more or less a steady decline. From 18 crores in 1903 it receded in 1908 to 14·9 crores. It slightly recovered and rose to nearly 15½ crores in 1909, but again fell to 14·4 crores in 1910: there has been a gradual decline since and in 1914 the figure receded to 10 crores, this being the lowest figure touched since 1865.

No. 41 —Amount of Government Promissory Notes Enfaced for
payment of Interest in London at the end of each
month from 1895 to 1914

SECURITIES ENFACED FOR PAYMENT OF INTEREST IN LONDON

No. 41.—AMOUNT (in rupees) of GOVERNMENT PROMISSORY NOTES ENFACED for PAYMENT OF INTEREST in LONDON at the end of each month from 1895 to 1914

DRAWINGS OF THE HOME GOVERNMENT

[FOR TABLES, SEE PAGES 71 to 77]

The practice of drawing funds from India to meet the home charges by means of bills of exchange on India was inherited by the India Office from the East India Company. The present procedure is as follows :—On each Wednesday a notice is exhibited at the Bank of England inviting tenders, to be submitted on the following Wednesday, for bills of exchange and telegraphic transfers on Indian Government authorities at Calcutta, Madras, and Bombay. The notice states a limit which the aggregate amounts will not exceed. The Secretary of State does not bind himself to allot the whole amount mentioned in the notice, and as a matter of practice does not accept any applications at prices lower than $1s. 3\frac{2}{3}d.$ per rupee for bills and $1s. 3\frac{1}{2}d.$ for transfers. The price charged for telegraphic transfers is ordinarily higher by $\frac{1}{3}d.$ per rupee than that charged for bills, but when the Calcutta or Bombay Bank rate exceeds 8 per cent, tenders for transfers rank for allotment with tenders for bills only if they are $\frac{1}{6}d.$ higher. Allotment is made to the highest bidders, and when the total amount tendered exceeds the amount offered allotment is made *pro rata*. When the tenders received on a Wednesday have been dealt with, the amount to be offered for tender on the following Wednesday is decided upon, the main considerations being the requirements of the India Office and the strength of the demand. “Intermediate” or “special” bills and transfers can be obtained on other days of the week at a price fixed by the India Office at not less than $\frac{1}{3}d.$ higher than the lowest prices at which allotments have been made on the preceding Wednesday, the exact rate and the maximum amount of such “intermediates” being fixed for the week each Wednesday. The arrangements made each Wednesday are laid before the next meeting of the Finance Committee of Council, usually on the same day, and subsequently before the Council itself, for approval.

Up to the time of the closing of the mints to silver in 1893 this weekly auction of Council drafts was nothing more than a simple and effective means of laying down in London the funds required by the Secretary of State for home charges at as favourable a rate as possible. In times of active trade the Secretary of State sometimes took advantage of a favourable rate of exchange to bring over from India rather more than was needed to meet his immediate requirements, to the mutual advantage of the Indian revenues and of trade. But the system existed simply as a means of remitting to London so much of the Government balances as it was desirable to make available in London.

With the closing of the mints to silver in 1893, the system of sales of Council drafts assumed new importance, and has been gradually extended in more than one direction. It was by a temporary cessation of the sale of Council drafts that the authorities first tried to force the exchange value of the rupee up to $1s. 4d.$ Then, when the rupee finally reached $1s. 4d.$ in 1898, under Act, II of 1898, Council drafts were sold against gold set aside at the Bank of England as a part of the Indian Paper Currency Reserve, and paid for in India out of notes issued against such gold. The object of this action was no longer simply to lay down funds in London for the Secretary of State’s home charges, but so to alter the location and disposition of the general resources of the Government of India as to provide a means in a time of great stringency for quickly expanding the currency as an alternative to the shipment of sovereigns to India on private account, when the Government of India had no surplus Treasury balances with which to meet Council drafts.

Finally in 1909 and 1910, when the exchange crisis of 1907-08 was over, Council drafts were sold freely in order to obtain sterling in London in place of the large quantities of rupees which had accumulated in the Gold Standard Reserve in India through the sale by the Indian Government of bills on London during the crisis, these Council drafts being sold not to provide funds for home charges, but to bring back to London the Gold Standard Reserve Fund; and it is by means of sales of Council drafts that the profits on the mintage of rupees, which necessarily first take the form of rupees, are converted into sterling in London, the rupees which represent the profits being issued in India to meet the Council drafts sold in London.

On rare occasions sterling bills on the Secretary of State are drawn and sold by the Government of India for support of exchange. These bills are paid by the India Office in London. During the exchange crisis of 1907-08 the Government of India had occasion to sell such bills which were paid by the India Office. The amounts were £8,058,000 in 1908-09 and £156,000 in 1909-10.

The tables in this section state the sterling amounts of the annual drawings of the Secretary of State on Calcutta, Bombay, and Madras (the three centres on which Council bills are drawn), and the total sum, with the highest, lowest, and average rate of exchange at which the bills and telegraphic transfers were sold, for each of the three cities. The tables also state the sums borrowed in England annually, and the payments of railway capital into the Home Treasury, less the withdrawals of such capital for each year. The largest proportion of the drawings has always been on Calcutta, except in 1898-99, 1909-10 and 1914-15 when the drawings on Bombay were slightly larger. In 1908-09, the percentages were Calcutta 42 and Bombay 38, in 1909-10, 39 and 44, in 1910-11, 45 and 39, in 1911-12, 48 and 38, in 1912-13, 51 and 33, in 1913-14, 42 and 41, and in 1914-15, 37 and 42, respectively.

DRAWINGS OF THE HOME GOVERNMENT.

Since 1871-72 the aggregate sterling amount of Council bills and telegraphic transfers, and the sums bor-

rowed in sterling, have been as stated in the margin. The increased drawings of the Council bills and telegraphic transfers in the quinquennium 1901-02 to 1905-06 were due primarily to the great trade demand for remittance to finance the export trade of India, which developed very largely, and Council drafts were sold freely so as to supply this demand as fully as possible. The surplus proceeds of the sales, in excess of the Secretary of State's requirements on revenue account (*i.e.*, Home charges proper), were applied partly to the purchase of silver for coinage, partly to strengthening the cash balances of the

Home Treasury, and partly to defraying capital outlay required for railway construction. The amount of drawings in 1906-07 reached the record figure of £33,432,196, but in 1907-08 a fall in exchange, which resulted from the weakness in the export trade, coupled with the financial crisis in America, necessitated a curtailment of drawings to £15,307,061, or less than half the figure of the preceding year. The persistent weakness of exchange throughout the year 1908-09 led to a still further reduction in the drawings, which amounted in that year only to £13,915,426. In 1909-10 trade flowed back into its normal channels, which led to a rise in exchange and to an increase in the drawings which amounted to £27,416,586, being nearly double those of the previous year. In the following three years the drawings have been more or less on the scale of 1909-10: they amounted to £26,463,303 in 1910-11, £27,058,550 in 1911-12, and £25,759,706 in 1912-13. In 1913-14 the drawings increased to £31,200,827 but in 1914-15 they fell very low to £7,748,111.

(a) Includes amount drawn against the Gold Reserve Fund Rs. 2,90,86,395 = £1,939,093 in 1901-02, Rs. 39,45,000 = £263,000 in 1902-03, Rs. 3,30,00,000 = £2,209,000 in 1903-04 and Rs. 1,05,05,940 = £700,396 in 1904-05

(b) Includes amount drawn against the Gold Reserve Fund and Paper Currency Reserve Rs. 7,31,45,000 = £4,876,333 in 1905-06 and Rs. 13,63,50,000 = £9,090,000 in 1909-10

(c) Includes amount drawn against Gold Standard Reserve Rs. 78,94,856 = £526,324 in 1907-08, Rs. 2,23,72,303 = £1,491,487 in 1908-09, Rs. 4,71,75,000 = £2,145,000 in 1910-11, Rs. 2,98,25,000 = £1,988,333 in 1911-12, Rs. 3,22,50,000 = £2,150,000 in 1913-14 and Rs. 90,00,000 = £600,000 in 1914-15

*

WAYS AND MEANS OF THE HOME GOVERNMENT

[FOR TABLES, SEE PAGES 80 TO 84]

In the early years of the period for which figures are given in table No. 50, the disbursements in London of the East India Company were met not only by the sale of bills but, to a considerable extent, by the realisation of commercial assets and by repayments of advances made on goods in India and China. These "ways and means" gradually declined and became extinct about 1850. Thereafter the Government was financed in England mainly by means of Council bills, supplemented by borrowing, by deposits made by railway companies against expenditure in India, and by very occasional resort to remittances in gold or silver from India. The last remittance of silver was made in 1870-71. No gold was remitted between 1879-80 and 1900-01, when gold was again remitted to the amount of £3,967,362; the subsequent remittances have been as follows: a remittance of about a million in 1901-02, nearly half a million in 1902-03, about four millions in each of the years 1903-04 and 1904-05, about 1½ millions in 1905-06, a quarter of a million in 1906-07, and to the amount of £239,950 in 1908-09. There was no remittance from 1909-10 to 1911-12, but a remittance of £327,501 was made in 1912-13, £453,024 in 1913-14, and £604,754 in 1914-15. In the ten years from 1905-06 to 1914-15 the disbursements amounted to £438,032,478, and, on the other side, Council bills represented £239,868,739 and borrowings £84,903,842, both items totalling £324,772,581.

No. 50--Disbursements in England and the Ways and Means by
which they were met from 1834-35 to 1914-15

WAYS AND MEANS OF THE HOME GOVERNMENT*

(a) Invested in British funds and Treasury bills

(b) Includes £4,911,621 on account of redemption of annuity, etc., of the Sind, Punjab, and Delhi Railways

(c) Includes £1,933,333 invested in Consols and Exchequer Bonds and £1,045,000 representing the transfer of gold at the Bank of England

PRICES OF GOLD, SILVER AND STOCKS AND RATES OF EXCHANGE

[FOR TABLES, SEE PAGES 86 TO 106D]

Table No. 52 is a record, from the year 1835, of the minimum and maximum prices of standard silver in London during each month, the yearly value of silver coined in England, the imports and exports of silver into and from England, and the annual sum of Council Bills and the Bank of England average rate of discount.

Table No. 53 shows the prices of standard silver in London and of bar gold in India, ruling at or about the close of each fortnight; also the relative values of the two metals in London and India. The mint price in London of Gold $\frac{1}{2}$ fine is £3-17-10 $\frac{1}{2}$ per ounce troy, but as standard silver is $\frac{3}{4}$ fine, the comparative value per ounce of gold $\frac{3}{4}$ fine or £3-18-7 is divided by the market price of an ounce of standard silver and thus the relative value of the two metals is obtained. In India up till June 1893, when the mints were closed to the coinage of silver for the public, the comparison was made between the price of a tola of bar gold and the rupee which itself weighs one tola (180 grains) and contains 165 grains of pure silver. Thus the rupee price of a tola of gold was multiplied by a fraction of which 165 was the numerator and the denominator the number of grains of pure gold per tola of bar gold, that is to say 179.1 up to the close of 1887, when the touch of the bar gold was 99 $\frac{1}{2}$ and 180 from January 1888, from which month prices were quoted for gold of 100 touch. From the latter half of June 1893, when the mints were closed, the relative values in India have been calculated on the market prices of the two metals at Bombay, excluding the import duty levied on silver (5 per cent from 10th March 1894 to 24th February 1910 and 4 annas per ounce from 25th February 1910).

Table No. 54 shows the course of the prices of silver in London since January, 1894, the figures representing the average for each half month, and the variations are worked out on the basis of the price of silver on the 1st June, 1893, the month in which the mints were closed.

Table No. 55 shows the course of the rates of exchange in Calcutta since January, 1894, the figures representing the average for each half month, and the variations are also worked out on the basis of the rate of exchange on the 1st June, 1893, being taken as 100.

Table No. 56 shows from the year 1894, the course of exchange on London, the Bank of England rate of discount, and the Bank of Bengal rates of interest.

Table No. 57 shows, from the year 1894, the price of sovereigns (British and Australian) and the price per tola of uncoined gold (China leaf of 100 touch) in India.

Table No. 58 records the course of the price of bar silver in Bombay, inclusive of import duty, from 1894-95.

Table No. 59 records the course of the rate of exchange between India and China, from 1894-95.

Table No. 60 shows the price of Government Securities in Calcutta; table No. 61 of India Stock in London and table No. 61 A of Enfaced Rupee Paper in London.

PRICES OF GOLD, SILVER, AND STOCKS, AND RATES OF EXCHANGE *

* The exact amount is £3-18-6-99, but for convenience £3-18-7 has been adopted. It represents the equivalent of gold $\frac{37}{100}$ fine (the silver standard) derived from the mint price of £3-17-10½ per ounce for gold $\frac{11}{16}$ fine (the gold standard).

NOTE.—On the 26th June 1893 the mints were closed to the coinage of silver for the public and from that date the relative value of gold and silver in India ceased to be derivable from the rupee price of gold.

(a) From January 1888 the figures represent the price of bar gold of 100 touch at or about the close of each fortnight, as given in the "Current Quotations," published by the Chamber of Commerce, Bombay. Previously, the touch was 99½.

PRICES AND EXCHANGE

PRICE of BAR GOLD in INDIA and RELATIVE VALUE of GOLD to SILVER in INDIA from 1865 to 1913

IN LONDON						IN INDIA					IN LONDON						IN INDIA						
		Price of standard silver ($\frac{3}{16}$ fine) per ounce troy	Relative value of fine silver to gold [one ounce of gold = £3-18-7]	Price per tola of bar gold of 100 touch [one tola of gold containing 180 grains fine]	Price of silver (17 dwt better-ness or $\frac{23}{32}$ fine) per 100 tolas (less 5 per cent import duty)	Relative value of fine silver to gold			Price of standard silver ($\frac{3}{16}$ fine) per ounce troy	Relative value of fine silver to gold [one ounce of gold = £3-18-7]	Price per tola of bar gold of 100 touch [one tola of gold containing 180 grains fine]	Price of silver (17 dwt better-ness or $\frac{23}{32}$ fine) per 100 tolas (less 5 per cent import duty)	Relative value of fine silver to gold			Price of standard silver ($\frac{3}{16}$ fine) per ounce troy	Relative value of fine silver to gold [one ounce of gold = £3-18-7]	Price per tola of bar gold of 100 touch [one tola of gold containing 180 grains fine]	Price of silver (17 dwt better-ness or $\frac{23}{32}$ fine) per 100 tolas (less 5 per cent import duty)	Relative value of fine silver to gold

NOTE.—For the 5 $\frac{1}{2}$ per cent and 4 $\frac{1}{2}$ per cent loans, see the 13th issue of Finance and Revenue Accounts and Miscellaneous Statistics, Part I, and the 1st issue of the Statistics of British India, Part IV (a)

MILITARY SERVICES

[FOR TABLE, SEE PAGE 108].

The table (No. 62) on Military Services shows the detailed items of military receipts and expenditure of the Government of India, both in England and in India, for the last five years. The statistics do not take into account the expenditure on military operations, which is treated as extraordinary expenditure and met from the excess of ordinary revenues over ordinary outlay.

Military receipts on an average amount to £1½ million. They represent about 2 per cent of the total revenue of the Government of India. They are derived from army, marine, and military works, and are distributed between India and England in the proportion of 3 to 1. Army receipts are derived from dairy farms, the sale proceeds of surplus stores, unserviceable animals, carts, etc., the capitation rate payable by the Imperial Government in respect of Indian troops lent for service in the colonies, contributions and subscriptions towards the Indian Military Service Family Pensions, and contributions by the Imperial Government in respect of cost of transport of troops and military charges for Aden. Marine receipts are derived from dockyard services and supplies, hire of vessels, and sale-proceeds of vessels and stores. Receipts on account of military works are derived mainly from rent of buildings, etc.

The gross military expenditure averages about £21 millions, and is 34 per cent of the total expenditure of the Government of India. The amount spent in India is over R23 crores (£15½ millions) and that in England £5 millions, the ratio being 75 and 25 per cent, respectively. The charges are shown under the heads of (1) effective, (2) non-effective, (3) marine, (4) military works, and (5) special defence works, the proportions

Effective	78.3 per cent.
Non-effective	14.9 „
Marine	2.2 „
Military works	4.5 „
Special Defence works	0.1 „

being as stated in the margin. The effective expenditure represents the cost of maintaining the standing army, and averages about R25 crores (£16¼ millions). One of the most important items of army charges in England is the payment made to the Home Government to cover the cost of recruiting and training, and of other services connected with the maintenance of the British establishment in India. The chief items

	R(crores.)
Regimental pay, allowances and charges (including volunteers)	12
Supply and Transport (including farms)	3.21
Ordnance Establishment, Supplies and Services	1
Stores for India (supplied from England)	1

of effective charges are stated in the margin. The other items of effective charges are—administration, accounts, veterinary services, army clothing, remount establishments, medical services and stores, ecclesiastical, education, compensation for dearness of food and forage, hutting, conveyance, cantonments and miscellaneous.

The non-effective expenditure comprises charges for rewards and pensions. The total averages about R4.83 lakhs, R3.76 lakhs (£2.5 millions) or 78 per cent being spent in England and R1.07 lakhs or 22 per cent in India. The non-effective charges in England consist mainly of pay and pensions of non-effective and retired officers of the Indian Service and payments to the War Office for retired pay, etc., of British forces for service in India.

The expenditure on marine charges has been R70 lakhs, namely, R37 lakhs or 53 per cent in India and R33 lakhs (£221,000) or 47 per cent in England. The chief items of marine charges are the maintenance of the “Royal Indian Marine,” the contribution made by the Government of India towards the expenses of His Majesty’s ships employed in the Indian seas, and stores.

The expenditure on military works in recent years has averaged R1.34 crores. Military works consist of new buildings and repairs for accommodation of troops, general cantonment works, and defence and other works.

The net expenditure of the Government of India on Military Services, both in India and in England, in the last five years has averaged about £19.7 millions or R29.6 crores annually. The figure for 1914-15 is £20.4 millions.

BANKS

[FOR TABLES, SEE PAGES 112 TO 115]

Banks in India may be classified into (1) the Presidency Banks, *i.e.*, the Bank of Bengal, the Bank of Bombay, and the Bank of Madras ; (2) the European Exchange Banks, whose head offices are located outside India, (these Exchange Banks may be sub-divided into 2 classes, *viz.*, those which do a considerable portion of their business in India, such as the National Bank of India (1863), the Chartered Bank of India, Australia, and China (1853), and several others ; and those banks which are merely agencies of large banking corporations doing business all over Asia, such as the International Banking Corporation, the Russo-Asiatic Bank, the Yokohama Specie Bank, and others ; (3) the Indian Joint-Stock Banks registered under the Indian Companies Act, whose head offices are located in India ; and (4) private and unincorporated bankers or money-lenders. Statistics relating to this last class (private and unincorporated bankers) are not generally available.

The total amounts of capital, reserve, deposits, and balances of the different classes of banks for the year ending 31st December, 1914, are compared in the table below with those for the corresponding period of ten years ago :—

Class of Banks	CAPITAL AND RESERVE			DEPOSITS		CASH BALANCES			
	1905 R (lakhs)	1914 R (lakhs)	Increase per cent	1905 R (lakhs)	1914 R (lakhs)	Increase per cent	1905 R (lakhs)	1914 R (laks)	Increase per cent
Presidency Banks . . .	6,23	7,64	23	25,38	45,66	80	8,23	20,84	153
Exchange Banks* . . .	33,63	55,46	65	17,04	30,15	77	3,78	8,39	122
Indian Joint-Stock Banks above R5 lakhs.	1,62	3,93	142	11,99	17,11	43	1,74	3,53	103

The total paid-up capital and reserve of all these banks, it will be seen, have risen from R41,48 lakhs to R67,03 lakhs, or by 62 per cent, during the past ten years, the respective shares being : the Presidency Banks R7,64 lakhs or an increase of 23 per cent, the Exchange Banks R55,46 lakhs or an increase of 65 per cent, and the Indian Joint-Stock Banks R3,93 lakhs or an increase of 142 per cent. The increase in the capital of the larger Indian Joint-Stock Banks was 197 per cent and in the reserve 82 per cent.

The total amount of deposits in the banks increased from R54,41 lakhs to R92,92 lakhs, or by 71 per cent in the last decade. The total deposits in the Presidency Banks increased in a greater proportion than those in the other classes of banks, the relative proportion being : Presidency Banks 80 per cent, the Exchange Banks 77 per cent, and the larger Indian Joint-Stock Banks 43 per cent.

The deposits in the Indian Banks (Presidency and Joint-Stock) increased by 68 per cent in the same period, amounting to R62,77 lakhs at the end of 1914. These figures include “ public ” or Government deposits in the Presidency Banks. Excluding these, ordinary deposits in the Indian Banks in 1914 amounted to R57,15 lakhs, having increased in the decade at the rate of about 67 per cent. These deposits are to the capital and reserves of the same banks in the ratio of about 5 to 1. In the case of Exchange Banks the ratio of the deposits in India to the total capital and reserves is 3 to 5, and that of their total deposits (both in and out of India) to the total capital and reserves 5 to 1.

The extent to which bank deposits have increased in the ten years, and the proportions in which they are held in the different classes of banks, are shown in the figures below. These figures exclude Government deposits in the Presidency Banks, and, for the Exchange Banks, are limited to deposits in India only :—

	1905 R (lakhs)	1914 R (lakhs)
Presidency Banks	22,26	40,04
Exchange Banks	17,05	30,15
Joint-Stock Banks (above R5 lakhs)	11,99	17,10
TOTAL	51,30	87,29

It appears, therefore, that the amounts deposited in the banks have increased from R51,30 lakhs to R87,29 lakhs, or by 70 per cent.

The proportion per cent of the cash balances to the liabilities on deposits of these three classes of banks dealt with was in 1914 as follows : Presidency Banks 46 per cent, and Indian Joint-Stock Banks with capital and reserve of over 5 lakhs 21 per cent. The proportion per cent in the case of the Exchange Banks doing a considerable portion of their business in India was 28 per cent. It should be noted here that in the case of the Exchange Banks deposits and cash balances in India only have been taken into account.

These statistics do not include deposits in the Post Office Savings Banks, which amounted to R10,98 lakhs at the end of the official year 1913-14 as compared with R9,14 lakhs in the previous year.

It may be noted that during the twenty-five years from 1890 the capital and reserves of the three Presidency Banks taken together have increased from R4,48 lakhs to R7,64 lakhs. Their Government deposits have risen from R3,59 lakhs to R5,62 lakhs and other deposits from R14,76 lakhs to R40,04 lakhs. Their cash balances have also risen from R12,97 lakhs to R20,84 lakhs.

* In the case of Exchange Banks deposits and cash balances in India only have been taken into account in this statement

In addition to the head office the Bank of Bengal has three branches in Calcutta and 21 offices elsewhere together with an agency in Bombay, the Bank of Bombay 13 branches, and the Bank of Madras 17 branches. The capital of the Bank of Bengal has remained unchanged since 1876, and steady additions have been made to the reserve, which now equals the paid-up capital at R2 crores. The abundance of money within the country may be gauged by the fact that the Bank of Bengal's reserve was about 53·7 per cent* of its liabilities on Government deposits in the beginning of September 1915. A consistently steady growth has occurred in the deposits from R8,92 lakhs in 1890 to R24,48 lakhs in 1914. The cash amounted to R11,70 lakhs. A substantial increase has taken place in the total investments from R2,06 lakhs to R6,21 lakhs. The paid-up capital of the Bank of Bombay has remained at one crore of rupees and a steady increase has occurred in the reserve fund, which at present also amounts to a crore. The Government deposits amounted to R1,83 lakhs and other deposits R10,82 lakhs in 1914 as against R83 lakhs and R6,19 lakhs in 1890. The cash increased from R5,73 lakhs to R6,47 lakhs and investments rose from R78 lakhs to R2,01 lakhs. The Bank of Madras raised its paid-up capital to R75 lakhs in 1912 and its reserves to R79 lakhs in 1914. The deposits amounted to R91 lakhs Government, and R7,62 lakhs private. The cash and investments also increased to R2,67 lakhs and R1,34 lakhs respectively. The proportion that the shown net profit for the past year bears to the paid-up capital of the Banks of Bengal and Bombay is 17 per cent, to the capital and reserve combined 8·5 per cent, and to the total working resources 1·1 per cent, as against 14·9 per cent, 7·4 per cent, and 1 per cent, respectively, for the Bank of Madras. The dividends paid by the Banks for 1914 was as follows: Bank of Bengal 16 per cent, Bank of Bombay 14 per cent, and Bank of Madras 12 per cent. The Banks of Bengal and Madras have experienced difficulty in finding suitable employment for their resources, and this presumably accounts, partially at any rate, for the large increase in the investments.

The year opened with a bank rate of 7 per cent in Calcutta, 5 per cent in Bombay, and 6 per cent in Madras. In April 1914 the rates were 6 per cent in Calcutta and Bombay, and 7 per cent in Madras. These rates were gradually lowered, as is usual at that time of the year, and when the war broke out they stood at 3 per cent in Calcutta and Bombay, and 4 per cent in Madras. The rate was subsequently raised, as a measure of protection, to 6 per cent for all these banks. There was some demand for accommodation at the outbreak of war, which, however, subsided during the closing months of the year, but confidence was soon restored and it was unnecessary to raise the rate above that figure.

Exchange
Banks.

Next with regard to the Exchange Banks. There are 11 banks, the Deutsche Asiatische Bank is excluded from the statistics for the year under review. The total paid-up capital and reserves amounted to £36,972,000, or an increase of 65 per cent over the figure ten years ago. The aggregate deposits and cash balances held at the head offices and branches (both in and out of India) are £185,068,000 and £46,289,000, of which the amounts available in India are R30,15 lakhs (£20,098,000) and R8,39 lakhs (£5,596,000), respectively. Compared with the figures a decade ago, the deposits increased by R13,10 lakhs or 77 per cent and the cash balances by R4,61 lakhs or 122 per cent. These banks have been classified in two groups according to the extent of business in India, namely, (1) six of them doing a considerable portion of their business in India and (2) five others being merely agencies of large Banking Corporations doing business all over the East. Their aggregate capital and reserves (both in and out of India) and their deposits and cash balances available in India are noted in the margin.

The following table shows the number of branches and agencies in and out of India of some of the Exchange Banks dealt with in this report, together with the proportion of the shown net profits to the paid-up capital, to the capital and reserves combined, and to the total working resources during the year 1914:—

Names of Banks	When founded	NUMBER OF BRANCHES, AGENCIES, ETC.		PROPORTION OF NET PROFITS TO			Dividends per cent
		In India	Out of India	Paid-up capital £	Capital and Reserves	Total working resources	
Chartered Bank of India, Australia and China.	1853	7	29	29	11·6	1·3	14

Mercantile Bank of India	1892	7	10	18·1	9·5	1·3	8
National Bank of India	1863	13	13	26·9	12·8	1·4	16
International Banking Corporation .	1901	2	14	10·4	5·2	·9	6
Yokohama Specie Bank	1880	2	26	14·6	8·5	1·1	12

* In the beginning of January 1906 the reserve was about 73 per cent of its liabilities on Government deposits

The net profits of some of the banks were reduced, owing to the large amount being placed in the year to bad and doubtful account to provide for the larger requirements occasioned by the war.

At the end of 1913 India was passing through a banking crisis so far as Indian Joint-Stock Banks Indian Joint-Stock Banks were concerned, and this had the effect of shaking confidence in regard to the less strong of these banks. Under the circumstances many banks considered it prudent to keep larger cash balances in hand in case of any sudden demands. In these tables these banks have been divided into two groups, namely :—(1) those with capital over R5 lakhs and (2) those with capital less than R5 lakhs but more than R1 lakh.

Table No. 65 shows the capital and reserves, the deposits, and the cash balances of those joint-stock banks having each R5 lakhs and over of capital and reserves. There are 17 such banks with an aggregate capital of R2,51 lakhs and reserves of R1,42 lakhs, the total being R3,93 lakhs as against R3,64 lakhs in the previous year. The deposits were, as anticipated, reduced to R17,11 lakhs from R22,59 lakhs and the cash to R3,53 lakhs from R4,00 lakhs in 1913. In the last decade, the capital and reserves, however, rose by 142 per cent, the deposits by 43 per cent, and the cash by 103 per cent.

During the year 1914, 43 banks failed with an aggregate paid-up capital of R1,09,12,000 as against 14 banks with an aggregate paid-up capital of R35,27,000 during the year 1913. Of the 6 banks with an aggregate paid-up capital of R1,76,000 which failed in 1915,* the only one of any importance was the Amritsar National Banking Company which went into liquidation on the 4th July 1915. This bank had a paid-up capital of R1,07,980, and deposits amounting to R1,07,658.

* Altogether 63 banks have failed since the banking crisis began with the failure of the People's Bank of India in the Punjab, which went into liquidation on the 17th November, 1913. The authorised capital of all these banks aggregated R10,13,80,000, the subscribed capital R4,12,58,000, or 40·7 per cent of the authorised capital, and the paid-up capital R1,46,15,000 or 14·4 per cent of the authorised and 35·4 per cent of the subscribed capital

BANKS.*

POST OFFICE SAVINGS BANKS

[FOR TABLE, SEE PAGE 117]

Until 1882-83 the savings bank business conducted under Government control was carried on in the three cities of Calcutta, Madras, and Bombay by the Presidency Banks, and elsewhere by the Government treasuries. So long as this system was maintained, the business grew but slowly. The highest balances in the district treasuries never exceeded R75 lakhs (in 1884-85), and in the Presidency Banks the highest balances (in 1882-83) amounted only to R2,36 lakhs. In 1886-87 the Savings Banks in the district treasuries were closed. The Presidency savings banks were maintained until 1895-96, though the deposits in them gradually declined in consequence of the preference given to the post office by the public, and now the whole of the savings bank business of Government is a branch of the postal administration. The establishment of savings banks in the post offices was followed by a rapid change. In the first year of their existence the balances were only R27 lakhs, but the public soon indicated their preference for business with the post office. By 1886-87 when the savings banks in the district treasuries were closed, the balances in the post offices amounted to R4 crores. During the succeeding years there was a considerable increase, although the Government took steps to prevent it from being inconveniently rapid. For this purpose in 1889-90 the maximum sum receivable was reduced from R3,000 to R2,000, and in 1894-95 the rate of interest was reduced from $3\frac{3}{4}$ per cent to $3\frac{1}{8}$ per cent in correspondence with the reduction in the rate of interest on Government securities. In 1893-94 the balances amounted to R9 crores : ten years later, in 1902-03, they reached R11 crores. In 1913-14 the balance of deposits, inclusive of interest, amounted to R23 crores, or £15 million, showing an increase of 12 per cent over that of 1912-13. On the 1st April 1914, the maximum amount receivable for deposit was raised from R2,000 to R5,000. The amount of Savings Bank deposits it was expected, would increase by these measures, but owing to heavy withdrawals due to the out-break of war the balance of deposit was R15 crores, or £10 million, a decrease of 35 per cent over 1913-14.

The amount of interest accrued in 1914-15 was nearly R54 lakhs as against R62 lakhs in the previous year. The rate of interest allowed on accounts has been as follows : $3\frac{3}{4}$ per cent from 1867-68 ; $4\frac{1}{8}$ per cent from the 1st January 1880 to the 31st May 1881 ; $3\frac{3}{4}$ per cent until the end of 1893-94 ; $3\frac{1}{8}$ per cent from April 1894 to June 1905. From July 1905 depositors were allowed to deposit money either at call or subject to six months' notice of withdrawal, and the interest on deposits at call was reduced from $3\frac{1}{8}$ per cent to 3 per cent, while interest at the rate of $3\frac{1}{4}$ per cent was given on deposits that were held subject to six months' notice of withdrawal. Since 1st January 1911, the system of deposits subject to six months' notice of withdrawal has been abolished.

The total number of depositors has increased greatly in the last ten years, ending 1913-14, but the average balance per depositor has not increased in the same proportion. In 1904-05 the total number of depositors was 1,058,813 and the average balance per depositor was R126·6 ; while in 1913-14 the number was 1,638,725 and the average balance R141·4, thus showing an increase of 54·8 per cent in the number, but one of 11·7 per cent in the case of the average balance. The total number of active accounts was 1,638,725 at the end of the year 1913-14, and 1,644,074 in 1914-15 showing an increase of 33 per cent only over 1913-14.

It will be seen from the table that the deposits have increased in the last ten years at a rapid rate, although not so fast as in the case of Banks proper. As in the United Kingdom, Government do not maintain any specific reserve against these deposits, these being treated as unfunded debt and used for Capital expenditure.

* Compiled from the annual reports on the Post Office of India

NOTE.— The Savings Bank business of the district treasuries was transferred to the Post Office in 1886-87, and that of the Presidency Banks was closed in 1896-97, since which year the Savings Banks have been entirely managed by the Post Office

(a) Beginning with 1912-13 the distinction between European and Indian depositors has been discontinued

CO-OPERATIVE SOCIETIES

[FOR TABLES, SEE PAGES 119 TO 125]

The Co-operative Credit Societies Act, X of 1904, was passed on the 25th March 1904 to "encourage thrift, self-help, and co-operation among agriculturists, artisans, and persons of limited means." In March 1912 this Act was repealed by the Co-operative Societies Act (II of 1912). There are two classes of societies distinguished as non-agricultural and agricultural: a *non-agricultural society* is defined as a society in which not less than four-fifths of the members shall be non-agriculturists, and an *agricultural society* is a society in which not less than four-fifths of the members shall be agriculturists. Each society consists of ten or more members above the age of eighteen years residing in the same town or village or in the same group of villages, or belonging to the same tribe, class, caste, or occupation.

The following table compares the position of registered societies in 1913-14 and in the four preceding years in all the provinces in British India except the North-West Frontier Province and Baluchistan; in the former the movement has as yet made little progress, while in the case of the latter it has not yet been thought expedient to apply the Act:—

Mysore and Baroda are the only Native States in which Co-operative Societies exist; the figures for those two states are shown in the tables separately from the statistics for British provinces.

It appears from the provincial reports on the working of co-operative societies that the progress hitherto made in the movement has been exceedingly encouraging. The following is an extract from the Resolution of the Government of India, dated the 17th June, 1914, in this connection.

“The remarkable progress which has been made during the first ten years could not have been foreseen by the most sanguine believer in co-operation. From small beginnings the movement, fostered by the resourceful guidance of Registrars and assisted by a body of non-official workers, has grown rapidly until it now represents an influence vitally affecting a large section of the people. The development which has taken place is all the more striking when it is remembered that excessive State aid has been avoided, and that the aim kept steadily in view has been, not the rapid multiplication of societies, but the restriction of the movement within safe bounds. The policy of restricting State aid within narrow limits has been fully vindicated and has led to an increase of self-reliance and independence, while the caution with which Government has stimulated development has resulted in a natural and healthy growth. The future is full of promise, and although under the influence of federation, and with increased unofficial aid and supervision more rapid progress may be expected, the caution and restraint shown in the past should continue.”

CO-OPERATIVE SOCIETIES*

Principal Heads of Revenue, Land Revenue, Opium,
Salt, Stamps, Excise, etc.

LAND REVENUE

[FOR TABLES, SEE PAGES 132 AND 133]

This section shows the details of land revenue receipts and expenditure. Five years' figures have been given in each table for each province.

The total land revenue, which represents over a quarter of the total revenue of India, is made up on the average of the last five years, chiefly of receipts under the heads stated in the margin. Receipts from the

Ordinary land revenue	about 90 per cent	sale of proprietary right, waste lands, etc., and
Assessment of alienated lands less quit-rents ..	3 per cent	recovery of survey and settlement charges amounted
Capitation tax	3 per cent	to 1 per cent. Land revenue due to irrigation
Fisheries and miscellaneous revenue	3 per cent	amounts to over R2 crores and represents 7 per cent

of the total land revenue, but is deducted therefrom to arrive at the net land revenue.

The ordinary land revenue amounts to R30½ crores, of which about R6½ crores are contributed by Madras, R6½ crores by the United Provinces, R4½ crores by Bombay, R3 crores by the Punjab, R2¾ crores by Bengal and Burma, each, R1¾ crores by the Central Provinces and Berar, R1½ crores by Bihar and Orissa, R1¼ crore by Assam and about R¼ crore by North-West Frontier Province. The permanent settlement system obtains over the greater part of Bengal and Bihar, nearly a third of Madras, some districts of the United Provinces, and other scattered tracts. The falling-off of R49.6 lakhs in 1910-11 is attributable mainly to remissions and suspensions: the United and the Central Provinces were jointly responsible for some R30 lakhs of the stated decrease; Burma accounted for R13.6 lakhs; and the Punjab for R8.6 lakhs. Madras, on the other hand, showed an increase of R11.4 lakhs. The falling-off of R29.2 lakhs in 1911-12 is also attributable to suspensions and remissions. Owing to the absence of timely rain in the northern districts the remissions and suspensions were largest (R47.1 lakhs) in the Bombay Presidency, the United Provinces coming next with R14 lakhs. On the other hand, Burma showed an increase of R16.6 lakhs, Madras R9.1 lakhs, the Central Provinces and Berar R4 lakhs, and the Punjab R3.1 lakhs. In 1912-13 land revenue rose by a crore of rupees. The largest increase took place in the Punjab (R37.5 lakhs), owing to higher receipts from the sale of proprietary rights in the canal colonies* and the revision of assessments in the Chenab colony. Important increases also took place in Burma (R24.5 lakhs), owing to good agricultural conditions of the year, and in Madras (R18.3 lakhs) owing to certain arrear collections. In 1913-14 there was an increase of R41.7 lakhs over the preceding year, but in 1914-15 there was a decrease of 28 lakhs.

About 97 per cent of the receipts from assessment of alienated lands less quit-rents, is contributed by the Bombay Presidency, where a large revenue is derived from assessment on *inam* lands. The Punjab contributes about 2 per cent, while the share of Bengal is below 1 per cent.

Nearly the whole of the capitation tax is derived from Burma (97 per cent), the remaining 3 per cent being contributed mainly by Assam.

Burma is responsible for nearly two-thirds of the fisheries and miscellaneous revenue. The Punjab and the United Provinces contribute from R8 lakhs to R7 lakhs each; Bihar and Orissa, the North-West Frontier Province, Bengal, Bombay, Madras, the Central Provinces and Berar and Assam, follow with shares varying from R1½ lakhs to R4 lakhs each.

Land revenue due to irrigation is derived chiefly from Bombay, the United Provinces, Madras, and the Punjab. In the last five years this item of revenue has increased from R177 lakhs to R250 lakhs or by 42 per cent, but a decrease of 1 per cent in the year under review (1914-15) over 1913-14.

The expenditure on land revenue (including district administration) is about 17 per cent of the receipts and represents nearly 5 per cent of the total expenditure. The detailed items on the five years' average

Charges of district administration	44 per cent	are stated in the margin. The expenditure on
District charges	24 per cent	district administration is the highest in Madras,
Survey and settlements	12 per cent	which is answerable for about 20 per cent. The
Allowances to district and village officers ..	12 per cent	United Provinces comes next with a share of 18 per
Commissions on collections	5 per cent	cent, Bombay accounts for 16 per cent, Bengal for
Management of Government estates and grazing		11 per cent, Burma for 10 per cent, the Punjab
lands	2 per cent	for 9 per cent, Bihar and Orissa for 7 per cent,

Assam and the Central Provinces and Berar for

5 per cent each and North-West Frontier Province about 2 per cent.

Bengal leads with a share of 26 per cent of the expenditure on survey and settlements, Madras accounts for 19 per cent, Bihar and Orissa for 17 per cent, and the Punjab for 14 per cent, Assam 11 per cent, Burma accounts for 9 per cent, and the Central Provinces and Berar about 8 per cent only.

The United Provinces accounts for 27 per cent of the expenditure under district charges. Bombay and Madras come next with 19 per cent each; the Punjab and Burma 11 per cent each, and the Central Provinces 8 per cent.

Nearly the whole (97 per cent) of the charges on account of commissions on collection is incurred in Burma and Assam.

Madras is answerable for 65 per cent of the expenditure under "Allowances to district and village officers," Bombay nearly 21 per cent, and the Central Provinces 15 per cent.

LAND REVENUE*

No. 1.—LAND REVENUE RECEIPTS in each PROVINCE in each official year, 1910-11 to 1914-15

		Ordinary Land Revenue	Assess- ment of alienated lands, , less quit- rents	Capita- tion tax	Sale of proprie- tary right, waste lands, etc.	Fisheries and miscel- laneous revenue (d)	Recovery of survey and settlement charges	Total	Deduct Land Revenue due to irrigation	Net Land Revenue

* Compiled from the Finance and Revenue Accounts of the Government of India

(a) Includes Ajmer-Merwara, Coorg, Bangalore, Baluchistan and Central India Agencies

(b) Includes Bihar and Orissa and excludes Eastern Bengal districts up to 1911-12

(c) Includes Eastern Bengal districts up to 1911-12

(d) The chief reasons why the receipts under this head are so large in Burma and so small in Bengal are (1) the Burma figures of miscellaneous revenue include a large amount derived from petroleum, which does not occur in Bengal; (2) owing to the permanent settlement the Government receipts from the fisheries in Bengal are very small as compared with those in Burma where there is no permanent settlement.

(a) Includes Bihar and Orissa and excludes Eastern Bengal districts up to 1911-12

(b) Includes Eastern Bengal districts up to 1911-12

(c) In Bombay the settlement work is generally entrusted to ordinary administrative officers and not to officers specially appointed for the purpose as in other provinces

(d) In provinces other than Bombay this head shows charges on account of "supervision of land records" only, whereas in Bombay besides the supervision charges it includes other items, such as the cost of (1) Central Division Survey Party, (2) Alienation Office, Poona, (3) City Land Records Estate, (4) special measurement operations and demarcation of waste lands in Sind

(e) Owing to the peculiar system of revenue collection in Burma and Assam the practice of collecting revenue by paying commission to the collecting agency is followed more largely in these provinces than elsewhere

FORESTS

[FOR TABLES, SEE PAGES 135 TO 154]

The tables in this section show statistics regarding State forests only, *i.e.*, lands administered as forests by the Forest Department of the Government of India under legal enactments for the time being in force dealing with forests. There are in British India immense forest areas outside the direct control of the Forest Department, which are managed by district officers, local boards or municipalities, or by private owners, statistics regarding which are not shown in these tables. Forest areas in Native States also are not taken into account in these tables.

Classes of forests

The forests under the direct control of the State are classed as "Reserved," "Protected," and "Unclassed" or "Public" forest lands. The "Reserved" forests are intended to be maintained permanently for the supply of timber, fuel, and other produce, or for the protection of the water-supply or other similar reasons. The "Protected" forests may be either in a state of transition to reserves or intended to remain permanently in the second class. In the former case it has been found necessary to prohibit within these areas certain acts harmful to the forest until such time as careful examination permits of a decision whether more stringent rules shall be enforced; and in the latter the object in view has been to provide for the more beneficial exercise of rights by local communities. The "Unclassed" or "Public" forest lands are those given over with even fewer restrictions (in some cases to the extent of exemption from the operation of forest law) for the use of the public.

Extent of forests

Table No. 3 shows all State forest lands and proportion thereof to total area in British India in each year from 1894-95 to 1913-14. Out of the 245,612 square miles under State management in 1913-14, which is 22·7 per cent of the total area (1,079,638 square miles) of British India, 96,297 square miles or 8·9 per cent were reserved, 8,390 square miles or 0·7 per cent were protected, and the remaining 140,925 square miles or 13 per cent were unclassified.

Table No. 4 shows all State forest lands and proportion thereof to whole area in each province in each of the five years ending 1913-14. These provincial statistics show that in 1913-14, the percentage of forest land varied from 1·8 per cent in the North-West Frontier Province and 3·9 per cent in the United Provinces to 46·6 per cent in Assam, 62·9 per cent in Burma and 70·3 per cent in the Andamans. The largest area of unclassified forests occurs in those provinces where the population is scantiest; in fact Burma claims 114,111 square miles or 80·9 per cent of the total area under this head, while Assam appropriates the bulk of the balance, *i.e.*, 18,401 square miles or 12·7 per cent.

Working plans

Table No. 5 shows the progress of working-plans in each province and circle in each official year from 1909-10 to 1913-14. Under the Forest Acts the Provincial Government deposes an officer who compiles a working-plan which regulates the amount and removal of outturn and prescribes the other requisite operations, such as sowing, planting, thinning, and cleaning. Working-plans are generally compiled for periods of 20 to 40 years, after which revision or possibly the introduction of an entirely new system of management will be necessary. Statistics for 1913-14 show that 53,926 square miles or 56·3 per cent of the area of reserved forests are worked under regular plans.

Financial results

The direct value of forests to the State may be gauged by the financial results of their working as shown in tables Nos. 6 to 10. In 1913-14 the gross revenue collected through the agency of the Department amounted to R3·33 crores and the total expenditure to R1·75 crores, the net revenue being R1·58 crores or R64 per square mile of land under the control of the Forest Department. Some 34 per cent of the total revenue is derived from Burma, while next in importance in this respect come the forests of Madras and Bombay and of the United Provinces and the Central Provinces and Berar. The sale of timber and fuel produced R2·53 crores, minor produce R26 lakhs, and receipts from grazing R30 lakhs. The steady improvement in forest revenue is worthy of note. Between 1894—1919 it averaged R1·77 crores. By 1903-04 the quinquennial average had risen to R1·97 crores, by 1908-09, to more than R2½ crores, and by 1913-14, to about R3 crores. During the same period the expenditure had increased from R98 lakhs to R112 lakhs, R141 lakhs, and R163 lakhs, respectively. The proportion of expenditure to gross revenue was in 1913-14 53 per cent, and of this 48 per cent was spent on administration, and 43 per cent on working, protection, and improvement, while 2·7 per cent was expended on the construction of new reserves by settlement and on the demarcation and survey operations.

The net revenue of the State forests has between 1894—1914 risen from R74 lakhs to R158 lakhs, and the yield is, as the result of protection and improvement, more than sufficient to meet increased demands on their produce. It may be added here that timber and other produce from State forests is given free (or at reduced rates) in large quantities to the people resident in the vicinity. In 1913-14 the value of these grants amounted on a very low estimate to about 22 per cent of the gross revenue collected from the State forests.

Forest produce

Table No. 10 shows the total outturn from the forests under the control of the Forest Department in each province. It is generally, for the sake of convenience, classed under timber including fuel, bamboos, and other minor produce including grass and grazing, besides all those numerous products found or manufactured in a forest. The total outturn of timber and fuel from State forests amounted, on an average of the five years ending 1913-14, to 268,855,000 cubic feet; the average outturn per square mile varies considerably in the different provinces, being dependent on the intensity of working and the density of the population. The yield of minor produce (including bamboos) from State forests was valued in 1913-14 at R1,07,98,905, the chief items, besides bamboos, being grazing and grass, caoutchouc, lac and dyes, cutch and gambier, cardamoms, myrobalans, and other tanning materials.

Protection of forests

Table No. 11 shows the results of protection of forests from fire and cattle and of grazing. Fire conservancy operations in British India extended in 1913-14 over 47,983 square miles, which is 50 per cent of the total area of reserves. The area closed to grazing amounted to 50,290 square miles, of which 25,683 were in Burma, where cattle are few and vast tracts of waste land are still available outside reserves. The area closed to browsers, principally goats, amounted to 23,738 square miles situated chiefly in the Bombay Presidency and the Central Provinces and Berar. The number of animals grazed were 10,158,323 on payment and 4,305,051 free.

FORESTS*

OPIUM

[FOR TABLES, SEE PAGES 157 TO 171]

The region in which the poppy was cultivated in 1913-14 for the manufacture of "Bengal opium" ^{Bengal opium} comprised thirty-one districts in the United Provinces of Agra and Oudh. The whole Department has, with effect from the 29th September, 1910, been under the control of one Opium Agent, with headquarters at Ghazipur. At Ghazipur there is a Government factory where the crude opium is manufactured into the form in which it passes into consumption. The cultivation of the poppy and the manufacture of opium are regulated by Act, XIII of 1857, as amended by Act, I of 1911, and are under the general control of the Lieutenant-Governor and the Board of Revenue of the United Provinces of Agra and Oudh and the immediate supervision of the Opium Agent at Ghazipur. The possession, transport, import, and export of opium are regulated by rules framed under section 5, Act I of 1878 (the Indian Opium Act). Cultivation is permitted only under license granted under the authority of the Opium Agent. The area to be cultivated is fixed by the license, and the cultivator is bound to sell the whole of his production to the Opium Department at the rate fixed by Government. This rate was fixed in 1894-95 at Rs. 6 per seer of 70° consistency, and has been raised to Rs. 7-8 per seer with effect from the season 1913-14. Advances, on which no interest is charged, are given to licensed cultivators at the time of executing the agreement, and from time to time (though ordinarily not more than two advances are given) until final delivery. In March, April, and May the opium is made over to the officers of the Department and weighed and tested, and as soon as possible afterwards each cultivator's accounts are adjusted, and the balance due is paid to him. After weighing the opium is forwarded to the Government factory at Ghazipur, where it is manufactured in two* forms— (a) opium intended for export to foreign countries, departmentally known as "provision" opium, and (b) opium intended for consumption in India and Burma, departmentally known as "excise" opium. Provision opium is made up in the form of balls or cakes, each weighing 3·5 lb, and is packed in chests, each chest containing forty cakes, weighing 140½ lb. It is generally of 71° consistency. Excise opium is made up in cubical packets, each weighing one ser, 60 of which are packed in a case. It is of higher consistency than the "provision opium." Provision opium is sold by public auction in Calcutta. A notification is published annually, generally about the month of June, stating the number of chests which will be put up for sale in each month of the next calendar year, and the quantities so notified are not altered without three months' notice. Sales are conducted month by month by the Bengal Board of Revenue. 13,200 chests were originally notified for sale in 1914, for shipment to non-China markets. This was subsequently reduced to 12,780. The number of chests actually sold was 11,428. In addition to this 420 chests were sold to the Government of Hongkong. The duty levied by the Government on each chest may be taken to be the difference between the average price realised and the average cost.

Under a convention made in 1815, the French Government has the right to purchase not more than 300 chests of opium each year, at the average price realised for the rest of the opium at the sales. This right has been commuted for a money payment, amounting to Rs.8,000 a year, under an agreement remaining in force until the 31st December, 1918. The agreement binds the French Government to take effective steps for the prevention of illicit traffic in opium between French and adjacent British territory.

The cultivation of the poppy is prohibited in British provinces other than the United Provinces, the Punjab, Burma, and Ajmer-Merwara. The only licit supply of opium is what is known as "Bengal Excise Opium." This is supplied from the Ghazipur Opium Factory and from the Calcutta Presidency godowns to the Government treasuries and depôts, whence it is issued, on payment, to licensed vendors and druggists only. In the accounts a sum, Rs.8½ per seer, out of the proceeds of this opium is credited under opium as representing the estimated cost of production. The remainder of the proceeds is credited under excise. The various provinces submit their indents through the Board of Revenue, United Provinces. These are forwarded to the Opium Agent, Ghazipur, and the quantity indented for is supplied direct from the Opium factory to the treasuries and Government depôts, and the issues are made from the latter to licensed vendors.

Malwa opium is almost entirely produced in the undermentioned Native States in the Central India ^{Malwa opium} and Rajputana Agencies, together with the Baroda State. In the Khairpur State (Sind) it is grown in the Khairpur taluka, but production is limited to the requirements of the State. In British territory, it is grown in Ajmer-Merwara only. A chest of Malwa opium contains 140 lbs. in weight. The opium is of 90° to 95° consistency and is usually packed in half-chests for convenience of carriage.

	Jaipur Residency	Jaipur, Kishangarh
	Haraoti and Tonk Agency	Bundi, Tonk, Shahpura
	Eastern Rajputana Agency	Bharatpur, Dholpur, Karauli
	Kotah Agency	Kotah, Jhalawar
	Alwar Agency	Alwar
	Bikaner Residency	Bikaner
	Western Rajputana Residency	Marwar (Jodhpur), Jaisalmer, Sirohi

In these States the British Government does not control the cultivation of the poppy or the manufacture of opium or its local consumption. The import of opium from these States into British India and the transport through British India are prohibited except under passes granted by the Opium Agents, the Agent to the Governor-General in Central India and the Commissioner of Ajmer-Merwara being *ex-officio* Opium Agents for their respective charges. Malwa opium was imported into the Bombay Presidency for local consumption in British India as well as for exportation by sea to China, a duty, commonly called pass-duty, being levied at the scales before issue of the pass referred to above. This pass-duty constituted the British revenue from Malwa opium: and the rates varied from time to time. The importation of Malwa opium for local consumption in the Bombay Presidency has been discontinued with effect from the 1st April, 1912, the Presidency being supplied from Ghazipur.

Under the arrangements made between His Majesty's Government and the Government of China a fixed number of chests of Malwa opium could only be exported to China, and only 2,755 chests were exported during the year 1913. The export has, however, been prohibited since 1st January, 1914.

Baroda.—The cultivation of the poppy and the manufacture of opium are permitted in Baroda, under a State monopoly, for consumption in the State. The State has, by agreement, assimilated its retail system and selling prices to those in force in adjacent British districts, and prevents the introduction of Baroda opium into British territory and into the territories of adjacent Native States.

Ajmer Merwara.—In these two British districts, which are surrounded by the Native States constituting the Rajputana Agency, the cultivation of the poppy and the manufacture and sale of opium were formerly permitted without restriction, except in the three municipalities of Ajmer, Beawar, and Kekri, and the cantonment of Nasirabad. An import duty of Rs 4 per ser was levied from the 1st April, 1904, on Malwa opium brought into Ajmer-Merwara for consumption, and from the 1st April, 1905, an excise duty at the same rate was imposed on opium produced in the district. Subsequently, from the 1st April, 1908, the levy of the excise duty was restricted to opium consumed within Ajmer-Merwara, and the duty on opium removed for export outside the district was remitted. Poppy cultivation was at the same time prohibited in the Ajmer district, and a maximum limit of 2,500 and 400 bighas was imposed upon the cultivation in the Todgarh and Beawar tahsils, respectively. No area has been licensed for the cultivation of poppy since 1911-12.

Punjab and Burma.—The cultivation of opium is permitted in certain districts of the Punjab and Burma on a very limited scale for local consumption.

OPIUM*

* Compiled from the Finance and Revenue Accounts and from special official returns

NOTE.—The receipts in Bengal include the cost price of opium manufactured for the Excise Department, namely, the figures in the last column of the next table and the corresponding figures for preceding years. There was, however, one exception in 1871-72, when the cost price Rs15,49,950 was, by special arrangement, credited to Excise revenue

(a) Includes Rs20,535, being the allowances of a delegate to the International Opium Conference at Hague, and miscellaneous expenditure

(b) Includes Rs73,36,902 on account of purchase of Malwa Opium

NOTE—(1). All opium imported into China reaches through Hongkong and Shanghai. But smuggling is extensively carried on between Hongkong and the adjacent coast above and below Canton and at other Chinese ports, and the net imports in the Chinese Customs Accounts state imperfectly the consumption of Indian opium.

(2) The figures under the head "Sorts" denote Persian and Turkish opium, chiefly Persian, and boiled opium.

(a) Includes figures for Ningpo (a Central Port) up to 1896.

(b) Shows figures for the port of Shanghai only up to 1896.

(c) Includes figure for Wenshow and Hangchow (Central Port) up to 1896.

SALT

[FOR TABLES, SEE PAGES 176 TO 193]

Production. The total quantity of salt produced in India in 1914 amounted to some 33 million maunds (1,203,765 tons). This quantity was supplemented by some 13 million maunds (480,779 tons) of imported salt, the total quantity produced and imported amounting to about 46 million maunds (1,684,544 tons). From three-fifths to three-fourths of the quantity annually consumed is generally produced in India. Importation is practically limited to salt landed in Bengal and Burma from England, Germany, other countries in Europe, Aden, Muscat, Jeddah, and some Egyptian ports on the Red Sea. There is a trifling import by land by trans-Himalayan routes.

The localities in India where salt is produced, and the quantity (maunds) produced in each of the last three years, are :

	1912	1913	1914
Burma : on the coast from sea-water and in Upper Burma from brine wells	839,653	819,636	585,874
Bengal : educed in the process of refining saltpetre	640	687	169
Northern India :			
Sambhar lake	1,311,169	6,622,656	5,159,107
Punjab mines and Kohat	4,187,155	4,291,296	4,185,611
Rajputana sources other than Sambhar	1,097,587	1,229,837	1,265,900
Mandi, Sultanpur, Gwalior, Kashmir, and the saltpetre refineries	190,054	195,450	182,153
	6,785,965	12,339,239	10,792,831
Sind : Moach (near Karachi), Saran, and Dilyar deposits	506,125	383,345	382,540
Bombay : on the coast and in the Runn of Kutch	14,369,597	12,345,094	12,871,833
Madras : on the east coast	13,186,465	9,481,071	8,135,639
TOTAL	35,688,445	35,369,072	32,768,886

For some years previous to 1901, and again in 1902 and 1904, the quantity of salt manufactured by Government was less than the quantity produced by private manufacturers. In 1901 and 1903 the quantity manufactured by Government exceeded the quantity manufactured privately. In 1905 the quantities were almost equal. In 1906, 1907 and 1908 the quantity of private salt exceeded the quantity manufactured by Government. In 1909 and 1910 the quantity of Government salt exceeded the quantity of private salt. In 1911 the quantity of private salt exceeded the quantity manufactured by Government by 735,878 maunds, and in 1912 the excess was one of over 6 million maunds. In 1913 the quantity manufactured by Government exceeded the quantity manufactured privately by 1,697,548 maunds, while in the year under review it fell short of the quantity produced by private manufacturers by 268,758 maunds.

Sea salt on the coast of Burma is produced by artificial heat ; on the coasts of Bombay, Sind, and Madras by solar evaporation. In Rajputana and Central India the salt is obtained by evaporation from brine deposits at Sambhar and other places. In the Punjab and Kohat, rock salt is obtained from the Salt Ranges and at Mandi, and brine salt from the sources at Sultanpur, near Delhi. More than half of the whole production is represented by sea salt evaporated on the coasts of Bombay and Madras.

Consumption and revenue The figures below indicate the progress in consumption in the last twenty-seven years :

	Average annual quantity Maunds	Average annual duty R
1888-89 to 1892-93	33,431,896	8,02,69,704
1893-94 to 1897-98	34,210,675	8,25,80,980
1898-99 to 1902-03	35,678,602	8,67,59,679
1903-04 to 1907-08	39,597,341	6,15,89,957
1908-09 to 1912-13	44,549,711	4,48,28,374
1913-14	49,050,804	4,94,20,176
1914-15	51,641,669	5,19,94,024

Administration The administrative system for the control of production and the collection of the revenue varies in accordance with local conditions and methods of production. Detailed information regarding the salt administration will be found in the 13th issue of the volume of Financial and Commercial Statistics. A brief account is given below.

Burma Lower Burma.—Salt is made at scattered points along the coast by the boiling of sea-water and, in a few places, of saline earth, in pots and cauldrons. Manufacture is permitted in ten districts only. In seven of these a system of direct taxation on output is in force. In the other three, instead of ascertaining the quantity of salt actually produced, the productive capacity of the vessels employed is estimated, and a charge made on each which is supposed to be about equivalent to the duty on imported salt from time to time. The present rate of import duty is one rupee per maund

Upper Burma.—In Upper Burma in 1890 a composition duty on the pots or cauldrons used in manufacture was fixed in substitution for previous systems. The duty on salt locally produced is less than the duty imposed on imported salt, viz., R1 per maund, and it is believed that it is not possible to level up the former to the latter without killing the local industry.

In October 1897 the administration of the Orissa Salt Department was made over from the Commissioner Bengal of Salt Revenue, Madras, to the Commissioner of Excise under the Government of Bengal. Advantage was taken of the transfer to create a combined preventive establishment for the whole of Bengal littoral, and the Indian Salt Act, XII of 1882, was extended from the 9th April, 1898, to the districts of the 24-Parganas, Midnapur, Khulna, Backerganj, and Chittagong, Bengal Act VII of 1864 also remaining in force in them. In March 1901 the Act was extended to the districts of Howrah and Noakhali. A proposal for the reorganisation of the Salt Department having been sanctioned by His Majesty's Secretary of State for India in February, 1905, preventive operations were started in Chittagong in October, 1900, and in Noakhali in October, 1905, tentatively for three years. They were also inaugurated on an independent footing in Howrah, where they had been carried on tentatively since January, 1902, by a small party under the Inspector of the Tamuk (Terapakia) Circle in the district of Midnapur. There is no preventive establishment for the district of Backerganj. No salt is produced or manufactured in the province, except that educed in the process of manufacture at the saltpetre refineries in Calcutta and its suburbs which is subject to a duty of R1 a maund since the 20th March, 1907. In consequence of the territorial re-distribution on the 1st April, 1912, the administration of the Orissa Salt Department was made over to the Commissioner of Excise and Salt under the Government of Bihar and Orissa.

The following are the descriptions of salt now commonly imported into Bengal :

Manufactured by solar evaporation : from Bombay, Madras, Ceylon, Jeddah, Muscat, Egyptian Red Sea ports, Aden, and Spain ;

Manufactured by boiling : from Liverpool and Hamburg ;

Rock salt : from Muscat.

The rate of duty per maund on salt in Bengal has decreased from R3-4 in 1877 to R1 in 1907.

From the creation of salt monopoly in 1765, a preventive establishment has been employed for the protection of the revenue, for the most part separate from and independent of the agency controlling the manufacture and sale of salt.

The control of the Salt Department in the saliferous tract of Cuttack, Balasore, and Puri in the Orissa Division was, previous to the year 1897, under the Government of the Madras Presidency. There were at that time two Government factories for the manufacture of salt in this area, both on the Chilka Lake within the limit of the Puri district. These factories were closed, and the manufacture of salt discontinued in Orissa with effect from the 1st October, 1897, and the control of the Salt Department in Orissa was transferred to the Bengal Government from that date. With the creation of the new Province in 1912 the control of the Salt Department in Orissa has been made over to the Commissioner of Excise and Salt, Bihar and Orissa.

The control of the Salt Department in the Bihar Districts rests with the Commissioner of the Northern India Salt Revenue Department, and figures for Bihar are included under Northern India. Saltpetre is the principal variety of salt manufactured in this part of the country.

No salt is manufactured in, or imported direct from foreign countries into, Chota Nagpur, and no figures for consumption within Chota Nagpur are available.

There is no direct import from foreign countries into Orissa. Salt imported from foreign countries into Calcutta is re-imported into the bonded warehouses at Chandbally, duty on such salt being paid in Calcutta.

The whole Inland Customs Department (now the Department of Salt Revenue in Northern India) is administered by the Commissioner of Northern India Salt Revenue, formerly responsible to each of the local Governments and Administrations within whose jurisdictions the customs organisation worked, but now immediately under the Government of India.

The salt works at Sultanpur near Delhi are worked under the supervision of the Northern India Salt Revenue Department, which has also the charge of the mines in the Salt Range in the Punjab, and of a force designated the Internal Branch maintained in Oudh, the Province of Agra, the Punjab, Rajputana, and Bihar, for the supervision of the saltpetre trade, the levy of duty on salt educed from saltpetre, and the control of the manufacture of other saline substances, such as sulphate of soda and carbonate of soda.

The general rates of duty on Rajputana salt have varied between R3 in 1877 and R1 in 1907. Salt excavated in the Sind Saugor Doab and the Kalabagh mines is subject to a duty of R1 per maund since the 20th March, 1907, as also salt from the Kohat mines.

Salt educed in the process of manufacturing saltpetre has always been subject to the ordinary duty.

There are three salt sources in Sind from which salt is now issued to the public, namely, the Maurypur works and the Saran and Dilyar deposits. The Maurypur works, where salt is manufactured by solar evaporation, were opened in the year 1878, and from these the greater portion of the province is supplied. The works are situated on the Moach plain adjacent to the end of Karachi harbour, from which by channels the brine is obtained, reaching the storage wells by percolation through a richly saline soil which greatly increases the strength of it. In 1884 a depôt for the storage and sale of Maurypur salt was opened at Sukkur. Maurypur salt is supplied free of duty to the State of Khairpur, local manufacture there being suppressed.

The Saran and Dilyar deposits were opened in 1879 and 1882, respectively. The salt is formed in a lake from which, when the water dries, salt is excavated and stored. It is supplied to the inhabitants of the neighbouring villages of the districts of Thar and Parkar and Hyderabad.

Bombay

Salt is produced in Bombay for local consumption and for export by land to Central India, Rajputana, the Central Provinces, the United Provinces, and the Nizam's territories, and by sea to the Malabar Coast of Madras and to Calcutta. Under existing arrangements, exports, both by land and sea, pay full excise duty in Bombay, with the exception of those to Travancore and Cochin on which a nominal charge of three pies per maund only to cover the cost of establishment at the salt pans, is levied in accordance with a trade convention concluded with Travancore and Cochin in 1865.

Except in Gujarat, the excise system is followed, under which licenses are issued for private manufacture at approved places which are guarded, and whence no removals are allowed, except upon payment of duty, or under credit for payment. In Gujarat, where all the works in British territory are the property of Government, the monopoly system was introduced in 1873-74, and the manufacture was concentrated at two places—Kharaghora on the borders of the Runn, and Dharásna on the sea coast of the Surat district. At Kharaghora salt in large crystals is made from brine wells under departmental supervision, bought from the manufacturers as made, stored, and sold at the cost and risk of Government. At Dharásna the salt is ordinary sea-salt and Government merely fixes the price at which it is to be sold without taking it over or interfering directly with manufacture. A small quantity of salt is issued annually free of duty from the works at Kharaghora to certain Native States and Chiefs in pursuance of the arrangements for the establishment of the monopoly.

Fish-curing.—In order to reduce the hardship caused by the interference of the preventive operations of the Bombay Salt Department with the use of illicit salt and salt earth for fish-curing, yards for fish-curing at which salt is sold at 7 annas a maund were established at all important fishing centres along the coast; there were 31 yards in 1914-15.

Madras

There are two systems of salt manufacture in the Madras Presidency, under one of which the salt manufactured is sold to Government only and is disposed of by Government to the trade, whilst under the other Government levies an excise duty, *plus* a small and varying cess to cover interest on capital cost of works, the property of Government, and the cost of any repairs effected by it on account of the licensees at the time of removal from the factory, and allows the manufacturers to make such arrangements as they please for the disposal of the salt. In both cases the production of salt is only allowed in well-fenced factories and subject to Government supervision, but, except in matters endangering the revenue, little interference is exercised in the details of manufacture under the excise system. The rate paid by Government for its salt varies, but may be taken roughly at an anna and a half per maund. This is only the bare cost of manufacture and does not include the cost of works, storage, transport, etc. The duty on salt is ordinarily payable before the salt is removed from the factory, but six months' credit may be allowed to approved merchants on the deposit of security in Government promissory notes and a few other specified kinds of securities.

In Malabar no salt is manufactured, and that region is supplied by imports from Bombay, Goa, and other places.

By agreement the French Government undertakes to prevent the manufacture of salt throughout its possessions in India, and in consideration receives payments annually aggregating R4,41,600, and obtains its supply of salt at cost price. The authorities of the French settlements in Madras indent on the nearest British factories for the salt they require and undertake to sell it at the approximate prices charged in British territory. The correspondence is not complete because they sell by measure and not by weight.

Until 1865 the manufacture of salt was a Government monopoly in Travancore and Cochin, the selling price in Travancore being R1-1 a maund, and in Cochin annas 12. In that year both the States agreed to adopt the British Indian selling price of salt.

Fish-curing.—In order to reduce the hardship caused by the interference of the preventive operations of the Madras Salt Department with the use of illicit salt and salt earth for fish-curing, yards for fish-curing at which salt is sold at cost price (that is, cost *plus* cost of transport from the factory) were established at all important fishing centres along the coast; there were 118 yards in 1914-15.

NOTE.—This table states the quantity of salt actually consumed in each province, and the duty thereon calculated at the rate in operation in each province, except that the figures under Bombay include salt exported to the United Provinces of Agra and Oudh, Central India, the Central Provinces, Mysore, and the Nizam's Territories. From the 18th March, 1903, the general rate of duty was reduced from R2½ to R2 per maund, and in the case of salt manufactured in certain Kohat mines the duty was altered from R2 per Lahori maund to R1½ per Indian maund. A further reduction in the general rate from R2 to R1½ per maund took effect from the 22nd March, 1905. The general duty was again reduced from R1½ to R1 per maund with effect from the 20th March, 1907. In Burma the rate remains unaltered, namely, R1 per maund.

† Includes Orissa up to 1910-11, and excludes Eastern Bengal from 1st October, 1905, to 31st March, 1911, figures for that tract for that period not being available.

‡ Figures up to 1910-11 included under Bengal.

(a) The sums entered under Duty include duty on excised as well as on imported salt. The quantity of the former is not entered in the figure under Quantity, only rough estimates being available.

(b) Exclusive of 46,706 maunds of salt issued under the credit system.

(c) Exclusive of 2,929,191 maunds of salt issued under the credit system.

(d) Exclusive of R13,47,626 adjusted under the credit system.

(e) Exclusive of R41,06,714 adjusted under the credit system.

(f) " R59,69,569 " " "

(g) " R99,55,820 " " "

(h) " R99,33,107 " " "

(MISCELLANEOUS RECEIPTS excluded), in each official year from 1895-96 to 1914-15

(a) Per Lahori maund of 102½ lb up to 17th March, 1903

(b) Special rates charged at Ganjam and Ichapur (Suria) from 1874 to 1878

(c) This is the general selling price of Government salt, but there were also other rates varying with the quality of salt

(d) Duty raised to Rs2 from the 13th July, 1896

(e) None sold

(f) Duty reduced to Rs1-8 per Indian maund of 82½ lb from the 18th March, 1903

(g) Duty on imported salt

(h) Duty on salt in districts where the system of direct taxation is in force

(i) Duty reduced to Rs1-8 per Indian maund of 82½ lb from the 22nd March, 1905

(j) Duty reduced to Rs1 per Indian maund of 82½ lb from the 20th March, 1907

(k) The price of salt at Khewrah was one anna and one pie, of the other mines in Cis-Indus Division 10 pies a maund up to 31st January, 1912, after which it was sold at one anna and one pie from Khewrah and one anna per maund from other mines. From 1st April, 1912, the price of salt throughout the Cis-Indus and Kolabagh Mines Division was 1 anna and 2 pies per maund

(l) The rates exceeded 3 annas at certain factories as a result of the sale of salt at auction

(m) There were also other rates varying with the quality of the salt and with reference to the auction sales

(n) Duty raised to 10 annas from the 1st January, 1911

(o) Duty raised to 12 annas from the 1st January, 1914

No. 37.—QUANTITY (in maunds of 82½lb) of SALT IMPORTED or MANUFACTURED, in each year from 1895-96 to 1914-15

NOTE.—The figures of imports in columns 2 to 10 do not agree with those in the accounts of the seaborne trade of the Bengal Presidency, the former representing the net landings of salt from vessels, while the latter the gross amount of the import passes taken out, whether the salt is landed or not.

(a) Government salt

(b) Massawah salt, which was in previous statements shown under heading "From other countries," is now under heading "From Red Sea Ports"

No. 38.—QUANTITY (in maunds of 82½lb) of GOVERNMENT and PRIVATE SALT SOLD for HOME and INLAND CONSUMPTION, REVENUE REALISED, AVERAGE WHOLESALE SELLING PRICE of LIVERPOOL SALT, and RATE of DUTY, in each year from 1895-96 to 1914-15

STAMPS

[FOR TABLES SEE PAGES 195 TO 213]

Classes of
Stamps

The stamp revenue is derived from two great classes of stamps (1) judicial or court-fee stamps, and (2) non-judicial or revenue stamps. Judicial or court-fee stamps are provided for by the Court-fees Act, VII of 1870 non-judicial stamps by the Indian Stamp Act, II of 1899. Both these Acts have been amended from time to time by subsequent legislation. The immediate control of the stamp revenue is vested in the local Governments, subject to the general supervision of the Government of India. The revenue derived from stamps is shared between the Imperial and the Provincial Governments.

The stamps are manufactured in England, the quantities required for consumption being sent to India on annual indents. Two kinds of stamps—adhesive and impressed—are used to denote the payment of duty on instruments; and impressed stamps are again of two classes, namely, impressed sheets, the paper bearing the impression of stamps of varying values engraved thereon, and impressed labels which are affixed to instruments by Government officers empowered to do so. The various classes of stamps with their values are—

Unified postage and revenue stamps	Half-anna and one anna
Foreign bill stamps	from 2 annas to 6 rupees
Share-transfer stamps	„ „ „ „ 10 „
Special adhesive stamps	„ „ „ „ 1,000 „
Hundi stamped paper	„ „ „ „ 15 „
Impressed non-judicial stamps	„ „ „ „ 1,000 „
Adhesive court-fee stamps	„ 1 anna „ 6 „
Impressed „ „	„ 10 rupees „ 1,000 „
Stamps for copies	„ 2 annas „ 2 „

Revenue

The revenue from stamps has increased steadily, as will be seen from the figures appended :—

	Judicial R	Non-Judicial R	TOTAL R
Annual average 1878-79 to 1882-83.	2,20,39,898	1,05,76,996	3,26,16,894
„ „ 1883-84 to 1887-88	2,53,38,468	1,14,60,348	3,67,98,816

EXCISE

[FOR TABLES, SEE PAGES 215 TO 252]

Revenue

During the ten years ending with 1913-14 the net receipts from the excise duties increased from R7,41,22,813 to R12,60,19,413, the increase being at the rate of 71 per cent. The receipts from opium (consumed in India, not exported) rose from R1,29,93,733 to R1,93,71,719, being at the rate of 48 per cent. The chief increase occurred in the net receipts from liquors and from drugs other than opium (including miscellaneous receipts), which rose from R6,11,29,080 to R10,66,47,694, the increase being at the rate of 74 per cent. This large increase is due, not merely to the expansion of consumption, but also to the imposition of progressively higher rates of duty and the increasingly effective control of the excise administration. The revenue from drugs (excluding opium) has risen in the ten years from R68,03,094 to R1,36,59,163, the increase being at the rate of 10 per cent.

Consumption

		Consumption per head.			The consumption works out to 9 annas per head of population in British India in 1913-14 as against 6 annas in 1904-05. The consumption in 1913-14 province by province is shown in the marginal table. It must, however, be noted that the consumption per head of population has not increased in quantities, except in the case of country spirit, but the revenue has increased, owing to the abolition of the outstill system, the gradual introduction of the central distillery system, a closer control over illicit manufacture, the restriction of the number of shops, and the imposition of enhanced rates of duty.

The rates of Excise duty on liquors, opium, and other drugs levied in each province, which had hitherto been incorporated in the explanatory memorandum, have been put into a tabular form and published in this issue as table No. 111.

The figures formerly given in these tables were revised in 1905, owing mainly to the inclusion of the duty on Malwa opium realised in the Punjab from 1882-83, the exclusion of certain receipts on account of the Excluded Local Funds in the Central India Agencies from 1893-94, and the inclusion of the license and distillery fees and duties realised in the Military Department from 1897-98 and of the excise revenue for Bangalore from 1900-01, which had hitherto been omitted from the head "India, general."

Until 1903-04 the receipts on account of license fees for *tari* and opium in the United Provinces were included under the head "Miscellaneous receipts." The figures for these provinces have now been revised and the receipts on account of license fees for *tari* are shown under the head of "spirits" and those for opium license fees under the head of "opium." The revision has been carried out from the year 1878-79 except in the case of Allahabad, where the receipts prior to 1901-02 are not available.

* Includes Coorg, Central India, Andaman and Nicobar Islands, Ajmer-Merwara, and Baluchistan from 1882-83, and Bangalore from 1900-01
† From 1897-98 the figures include license and distillery fees and duties, etc., realised in the Military Department
‡ The increase in 1908-09 is due to the inclusion of receipts in Central India which were credited in former years to the Local Abkari Fund, which was abolished on 1st April, 1908

	Charas (not produced in the Province)	R2-0-0 per ser (transport duty).
		R12-0-0 „ imported from Yarkhand.
	Bhang—	
	(A) Bhang locally produced	R4-0-0 per acre of land on which the hemp plant is cultivated in Dera Ghazi Khan District subject to a minimum charge of R1 per quarter of an acre or less, provided that no duty is leviable in respect of areas cultivated on behalf of religious institutions whose cultivation has been specially licensed.
	(B) Bhang locally transported or for export outside the Province.	R4 per maund (gross) and R1 per quarter maund or less provided that no duty is leviable on bhang transported for purposes of export-in-bond to other provinces.
	(C) Bhang imported	R4-0-0 per maund (gross) subject to a minimum charge of R1 per quarter maund or less.
	Rum	R9-6-0 per proof gallon.
	Beer	R0-3-0 per imperial gallon or 6 quart bottles.
	Methylated spirits, i.e., denatured spirits	5 per cent <i>ad valorem</i> .
Bihar and Orissa	Rectified spirits	R9-6-0 per proof gallon or 6 quart bottles (London proof). (Concession rate of R7-13-0 per proof gallon is allowed to <i>bond fide</i> manufacturing chemists.)
	Country spirit (imported from Punjab)	R5-0-0 per imperial gallon or 6 quart bottles.
	Opium (Excise)	R11-8-0 per ser (imported from Ghazipur).
	Charas	R12-0-0 „ („ „ Punjab).
	Bhang	R4-0-0 per maund (imported from Punjab).
	Beer, Cider, and other fermented liquors	R0-3-0 per liquid gallon.
	Liqueurs and sweetened spirits, cordials, bitters, perfumed spirits and toilet preparations containing spirit.	R13-0-0 per liquid gallon.
	Denatured spirit	5 per cent <i>ad valorem</i> .
	Spirit used in drugs, medicines or chemicals	R7-13-0 per proof gallon.
	Spirit other sorts	R9-6-0 per proof gallon.
	Wines—Champagne and all other sparkling wines not containing more than 42 per cent of proof spirit.	R3-12-0 per liquid gallon, provided that all sparkling and still wines containing more than 42 per cent of proof spirit shall be liable to duty at the rate applicable to spirit, other sorts.
	Wines other sorts not containing more than 42 per cent of proof spirit.	R1-8-0 per liquid gallon.
	Country spirit	R1-4-0 to 3-12-0 per gallon, London proof.
	Ganja—all sorts	R11-0-0 per ser in Orissa except Sambalpur.
		R7-8-0 per ser in Sambalpur.
		R13-0-0 per ser in the rest of the Province.
	Charas	R12-0-0 per ser.
	Bhang	R1-0-0 per ser in Sambalpur.
		R-0-12-0 per ser in the districts of Chota-Nagpur and Patna Divisions and the Santal Parganas.
	Opium	R0-8-0 per ser in the rest of the Province.
		R12-8-0 to R26-8-0 per ser.

(a) The difference between the cost price of R8-8 and the selling price in the North-West Frontier Province at present R20 per ser is reckoned as duty and classified in the accounts as "gain on sale-proceeds of excise opium."

(b) In Baluchistan only Government Excise Opium is allowed to be sold and the difference between the cost price (R8-8-0) and the selling price (R20 a ser) is reckoned as duty and classified in the accounts as "gain on sale-proceeds of excise opium."

PROVINCIAL RATES

[FOR TABLE SEE PAGE 254]

This section (table No. 112) shows the details of revenue derived from Provincial Rates. The items of any importance included under this head of revenue are the rates and cesses on lands levied mainly in Bengal and Bihar and Orissa for expenditure on roads, schools, canals, railways, etc.; the amount appropriated from the local rates in the Province of Agra on account of rural police charges; the assessment on Ward's Estates for establishment charges in Assam, Bengal, Bihar and Orissa, the United Provinces, the Punjab, and the North-West frontier Province; and the cess levied at Indore on Malwa opium in transit to Bombay. The most important item is the cess on lands levied in Bengal and Bihar and Orissa for expenditure on roads, schools, etc., which alone contributed 64 per cent of the total revenue derived from provincial rates in 1912-13. This is a cess levied under the Bengal Cess Act of 1880 at the maximum rate of one anna in the rupee on the annual value of lands of all classes, whether revenue-paying or revenue-free. The total receipts under this item amounted to about Rs. 58,000 in 1914-15.

The total receipts are now less than one per cent of the total Indian revenue, and amounted to Rs. 82·8 lakhs in 1912-13 as compared with Rs. 82·3 lakhs in 1911-12. The large decrease (—Rs. 55 lakhs) in revenue in 1913-14 is due to the surrender to district boards of the public works cess in Bengal and in Bihar and Orissa, and the discontinuance of the appropriations hitherto made from the local rate in Agra to meet the cost of the rural police. In 1914-15 the revenue amounted to about Rs. 6 lakhs only. The expenditure in 1912-13 on account of establishment and other charges (incurred only in Bengal and Bihar and Orissa) was about Rs. 73,000. There was no expenditure in 1913-14 and 1914-15.

* Compiled from the Finance and Revenue Accounts of the Government of India

(a) Includes Ajmer-Merwara, Coorg, and the Central India Agency

(b) Includes Eastern Bengal up to 1911-12

(c) Includes Bihar and Orissa up to 1911-12

CUSTOMS REVENUE

[FOR TABLES SEE PAGES 256 TO 265.]

The first two tables (Nos. 113 and 114) of the series state the amount of duty collected on imports and exports separately as credited in the Customs Houses. The others (Nos. 115 and 116) state the rates of duty imposed on all principal articles of merchandise by the schedules of the various Tariff Acts passed since 1882 and thus constitute a history of the legislation respecting customs duties since that year.

Indian Customs revenue is mainly derived from the general import duty, certain special import duties such as those on arms, liquors, sugar, petroleum, and tobacco, and an export duty on rice. General import duties, which were abolished in 1882, were reimposed in 1894, since which date, the general rate of duty on commodities imported into British India by sea has been 5 per cent *ad valorem*. Cotton was exempted in 1894 when the general duties were revived; in December 1894, a 5 per cent *ad valorem* duty was imposed on imported cotton goods and yarns, while an excise duty of 5 per cent was imposed on all yarns of counts above 20 spun at power mills in British India; in February 1896, cotton yarns and threads imported or manufactured in India were freed from duty, while a uniform $3\frac{1}{2}$ per cent *ad valorem* duty was imposed on all woven cotton goods imported or manufactured in India at power mills. The products of hand looms are exempted. General import duties are levied for fiscal purposes, and not for the protection of Indian industries. It will be noted that machinery (excluding tools and implements to be worked by manual or animal labour), railway materials, gold, living animals, food grains, coal, raw cotton, raw wool, cotton twist and yarn, sewing and darning threads, printing materials, and books (but not paper) are, among others, on the free list.*

The revenue from the import and export duties in the four quinquennial periods ending 1896-97, 1901-02, 1906-07, and 1911-12 and in each of the years 1910-11 to 1914-15 is stated below :—

										ANNUAL AVERAGE.	
										Imports	Exports
										Rs.	Rs.
Five years ending 1896-97	.	.	.	.	.	.	.	.	.	3,36,18,716	79,73,887

„ 1914-15	.	.	.	.	.	.	.	.	.	8,06,72,027	82,97,869

A customs duty at the rate of a quarter of a pie (one forty-eighth of an anna) per pound has been levied, from the 1st April, 1903, on all tea produced in India and exported from any customs port to any other beyond the limits of British India, the collections being paid to a Committee for promoting the sale and consumption of Indian tea. The collections since the institution of the cess have been :—

										Rs.
Average, five years ending 1907-08	.	.	.	.	.	.	.	.	.	3,06,394
„ 1912-13	.	.	.	.	.	.	.	.	.	3,39,998

* Compiled from official returns, and Customs circulars published by the Government of India.

NOTE.—1. In the Financial Accounts the duty collected on Salt is entered under "Salt," not under "Customs." In this volume it is included in the table on Indian salt revenue.

2. The figures in tables Nos. 113 and 114 represent the total for each year of the revenue credited month by month in the Customs houses. They differ slightly from those given in the Finance and Revenue Accounts which show the result of final adjustments.

(a) Included in "All other articles."

No. 114.—GROSS AMOUNT of CUSTOMS DUTY collected in BRITISH INDIA, on EXPORTED MERCHANDISE subject to duty, from 1887-88 to 1914-15

<i>Exception I.</i> —Articles falling under the 5th, 6th, 8th, 9th or 10th head of the foregoing list when they appertain to a firearm falling under the 1st or 3rd head, and are fitted into the same case with such firearm, are free. <i>Exception II.</i> —The following are also free, namely:									
(a) Arms forming part of the regular equip- ment of an officer entitled to wear diplomatic, military, naval or police uniform;									
(b) A sword, a revolver, or a pair of pistols, when accompanying an officer of His Majesty's Regular Forces, or a commis- sioned officer of a volunteer corps, or certified by the commandant of the corps to which such officer belongs, or in the case of an officer not attached to any corps, by the officer commanding the station or district in which such officer is serving, to be imported by the officer for the purposes of his equip- ment; (1)									
(c) Swords and revolvers which are certified by an Inspector-General of Police to be part of the ordinary equipment of mem- bers of the Police force under his charge; (3)									
(d) Swords forming part of the equipment of native commissioned officers of His Majesty's Army; (2)									
(e) Swords for presentation as army or volunteer prizes;									
(f) Arms, ammunition, and military stores imported with the sanction of the Government of India for the use of any portion of the military forces of a Native State in India which may be maintained and organised for Imperial Service; (4)									
(g) Morris tubes and patent ammunition when imported by officers commanding British and Native regiments or volunteer corps, for the instruction of their men.									

(a) The following articles under this head were exempted from duty:

Arms which, having paid duty at Aden on import into that Settlement, are subsequently within
three years imported into any Customs port of British India

Bows and arrows

Bullets, bird-shot, gun-wads, and wire cartridges (b)

Bullet-moulds

Morris tubes and patent ammunition when imported by officers commanding British and Native
regiments or volunteer corps for the instruction of their men

Ornamental arms possessing antiquarian value, provided the chief Customs authority is satisfied
in each case that the arms are practically unserviceable, and that weapons intended for
offensive or defensive purposes are not imported under cover of the exemption

Swords imported for presentation as army or volunteer prizes

(1) Notification No. 1864, dated 12th April 1889, as amended by Notification No. 1908, dated 8th May 1891

Dynamite, tonite, and detonators (c)

(2) Notification No. 302, dated 2nd December 1890

(3) Notification No. 3521, dated 19th August 1891

(4) Notification No. 3028, dated 21st July 1892

(b) Bullets, bird-shot, gun-wads, and wire cartridges were again subjected to duty by Act VIII of 1894

(c) Dynamite, tonite, and detonators were again subjected to duty by Act VIII of 1894 and classed as "Explosives" under Chemical Products and Preparations

(d) These rates were fixed by the Indian Arms Act, XI of 1878

NOTE (1)—The following articles exempted from duty in excess of 10 per cent *ad valorem* by Notification No. 3838, dated 26th June 1903:

Aim reflectors

Barrel cleaners or pulls-through

co oiers

Brushes, jags, mops

Cleaning rods

Reflectors

Recoil pads or heel pads

Sight covers

Sights for guns or rifles

Sliding bars for sights

Turn screws

Ventometers or wind gauge

Verniers or sight elevators

NOTE (2)—By the Commerce and Industry Department Notification No. 3798-90, dated the 27th May 1911, all articles, other than those specified below, liable to duty
under head 5, 6, 8, 9, or 10, as the case may be, were exempted from so much of the duty leviable thereunder on importation into British India as is in excess of duty of 10 per
cent *ad valorem*.—Main springs and Magazine springs, gun-stocks and breech blocks, actions (including skeleton and waster), breech bolts and their heads cocking pieces,
locks (for muzzle-loading arms), and machines for making, loading, closing or capping cartridges for rifled arms

† By the Commerce and Industry Department Notification No. 2089-79, dated the 6th March 1915, springs used for air-guns are exempted from the duty leviable thereon
on importation into British India.

No. 115.—RATES of CUSTOMS DUTY imposed on IMPORTS into BRITISH INDIA under various ACTS (as modified by EXECUTIVE ORDERS), from 1882 to 1915—continued

[FOR TABLES PAGES 268 TO 275.]

The income tax in India in 1913-14 yielded R284 lakhs or 2 per cent of the total revenue as against 22 per cent in the United Kingdom. The tax is accordingly not of the importance which it is in the taxation system of the United Kingdom.

History

The first general income tax was levied in 1860 to relieve the financial burdens of the immediately preceding years. The Act was on the English model and was to have effect for a period of 5 years. It ceased, therefore, to operate in 1865, but the financial position did not permit of direct taxation being abandoned. In 1867 an Act was therefore passed, imposing a license tax on professions and trades excluding agriculture, and the tax continued to be levied till the end of 1872-73. No further taxation was imposed until 1877 when a license tax was levied on traders and artisans to meet a portion of the Famine Insurance grant, and Acts were passed in 1878 for this purpose for the United Provinces, the Punjab, Bengal, Madras, and Bombay. These Acts remained in force until 1886. The license tax of 1878 was, however, converted into a general income tax by the Income Tax Act, II of 1886, applying to all India, which came into operation on the 1st April 1886 and still remains in force.* All sources of non-agricultural income were taxed. They were divided into four classes, namely, (1) Salaries and pensions, (2) Profits of Companies, (3) Interest on Securities, and (4) other sources. A general rate of 5 pies in the rupee (a little more than 2½ per cent) was levied on all income over R2,000 per annum, incomes between R500 to R2,000 derived from salaries and interest on securities were taxed at the rate of 4 pies in the rupee (a little over 2 per cent), and similar incomes derived from other sources at fixed rates according to classes. Incomes below R500 were not assessed with the result that the tax was collected from a very small proportion of the total population. Incomes derived from land and agriculture were exempted. Charities and religious endowments were also free from the tax. There are some other minor exceptions, which are noted at the foot of respective tables.

Total tax and number of assesses:

In the first year of the operation of the Income Tax Act the net revenue realised was R127½ lakhs. The receipts from the tax rose steadily from year to year at an average rate of 3 per cent annually up to the end of 1902-03 when the revenue amounted to R210 lakhs, the total increase being nearly 53 per cent, while the number of assesses increased by 51 per cent. In 1903 the favourable financial conditions permitted the exemption from the tax of incomes between R500 and R1,000 per annum, that is to say, the taxable minimum of income was raised from R500 to R1,000 by the Indian Income Tax (Amendment) Act, XI of 1903, with effect from 1st April 1903. The proceeds of the tax during 1903-04 were R180 lakhs, the loss of revenue sustained by the new Act being R 30 lakhs or 14 per cent of the total. The loss was gradually made good by the year 1907-08 when the revenue realised amounted to R224½ lakhs, and this steadily rose to R284 lakhs in 1913-14. The number of assesses that were freed by the Act of 1903 was about 269,000 persons, formerly assessed, out of a total number of 507,000 in 1902-03, the number being thus reduced by 53 per cent to 238,000 during 1903-04. This number gradually rose by 39 per cent to 331,000 in 1913-14, being about one per mille of the total population. The classes with an annual income of R1,000 to R2,000, i.e., those paying the rate of 4 pies in the rupee, contain 209,000 assesses, or 65 per cent of the total, and pay a revenue of R65 lakhs or 20 per cent of the collections, while those with an annual income of R2,000 and upwards, i.e., paying the rate of 5 pies in the rupee contain 112,000 assesses, or 35 per cent of the total, with a revenue of R228 lakhs or 80 per cent of the collections.

Classification of income

Of the four parts or groups of income, Part I—Salaries and pensions (mostly Government Servants) yielded in 1913-14 R74 lakhs or 26 per cent, Part II—Profits of Companies R40 lakhs or 14 per cent, Part III—Interest on Securities R12½ lakhs or 4½ per cent, and Part IV—other sources nearly R157 lakhs or 55½ per cent. There have been slight variations in these proportions since the Act came into force in 1903, except in Part II—Profits of Companies, which showed an improvement from 8 to 14 per cent. Under Part I—Salaries and pensions, incomes are divided into 13 classes and the largest number of assesses is those with an annual income of R1,000 but less than R1,250, namely, 32,000 persons paying a revenue of R5½ lakhs; coming next in importance are those with an income of R 2,500 but less than R 5,000 (17,500 assesses with a revenue of R15 lakhs), of R2,000 but less than 2,500 (9,900 assesses with a revenue of R5½ lakhs), and of R5,000 but less than R10,000 (9,300 assesses with a revenue of R15½ lakhs). Cotton spinning and weaving,

	Total collection of income Tax (R 1,000)	Per cent. of total
Bengal	66,21	23
Bombay	66,26	23
Madras	36,47	13
United Provinces	26,63	9
Burma	22,86	8
Punjab including Delhi	18,73	7
Bihar and Orissa	13,71	5
Central Provinces and Berar	8,40	3
Assam	4,25	1.5
North-West Frontier Province	1,52	0.5
Other Provinces and Departments of Government	19,00	7
TOTAL	2,84,04	100

ing, jute spinning and weaving, railway, mining, and banking companies are the main sources of receipt with a revenue varying from R4 lakhs to R6 lakhs under each of them in Part II—Profits of Companies. Under other sources the principal classes are bankers and money lenders (R43½ lakhs or 28 per cent), agents and brokers (R16½ lakhs or 11 per cent), general merchants (R15 lakhs or 9 per cent), piece goods merchants (R12 lakhs or 8 per cent), house owners (R12 lakhs or 8 per cent), and grain merchants and legal practitioners (R9 lakhs or 6 per cent each). The marginal statement shows the total amount of income tax collected in each province with the proportion to the total amount collected in British India during 1913-14. In Bombay every 327 persons account for one assessee with a non-agricultural income of not less than R1,000, in Burma 389, in the Punjab 626, in Madras 775, in Bengal 792, in the Central Provinces 1,015, in Assam 1,158, and in the United Provinces 1,235.

* This Act has been modified with effect from the 1st March 1916 by the Indian Income Tax (Amendment) Act, V of 1916

The marginal table shows the growth of the total collections and the growth of the total estimated income Taxable income on which the tax was assessed. Applying the rates of the tax to the total collections under the various classes, the total income is worked out to be R114½ crores or £76 millions in 1913-14. The annual income of the tax-payers of the four lower classes comes to an average of R1,260 and of the nine higher classes to R7,800 for each assessee.

The total collections comprise the actual tax collected in the year and the arrears of previous years. Refunds are not deducted from the figures shewn as "collections" in these tables. They amounted to R1,07,055 in 1911-12, R1,21,539 in 1912-13, and R1,44,502 in 1913-14, being about one-half per cent on the total collections.

Taking the average incidence of taxation on the assessees, Bengal is first with R115 per head ; then comes Incidence Bombay (R110), Burma (R83), Assam (R73), the United Provinces (R69), Madras (R68), and per head of the Punjab (R58). assessees

	Number of assessees	Incidence per head of population		The number of persons assessed to income tax, exclusive of Government servants, assessed on their salaries in the principal provinces in 1913-14 and the incidence of the tax per head of population were as stated in the marginal table.
		a.	p.	
Bombay	59,805	4	11.9	
Burma	22,535	2	11

21. Others	7,388	7,80,012
TOTAL	(a)8,740	(a)40,08,542

NOTE.—(1) This table is a continuation of table No. 5 of the Eighth Issue of the Volume of Financial and Commercial Statistics (1901). The annual returns from which it is prepared were discontinued for two years, and owing to changes of classification in the revised form of the return the collections for recent years are only roughly comparable with those of earlier years. The figures in this table are compiled from Return No. VIII and sometimes differ from those under Part II of tables Nos. 117 and 119 compiled from Return No. III of the Provincial Income Tax Reports, because of the inclusion of refunds and over-collections in Return No. III and their exclusion from Return No. VIII.

(2) The tax is levied on the whole of net profits of companies carrying on business in British India and whose stock or funds is or are divided into shares and transferable. The net profits are determined by deducting the amount of expenses, such as repairing, insuring, establishment charges, losses, bad debts, interest paid, depreciation, etc., from gross receipts of the Company. The tax is also levied on any profits of a Shipping Company incorporated or registered out of British India.

(a) Includes 1 assessee and income tax Rs 13 being assessed at 4 pies per rupee and arrear collections of Rs 3,498, of which details by classes in respect of Rs 1,267 are not available.

No. 123.—COLLECTIONS of INCOME-TAX ON INTEREST ON SECURITIES (PART III of SCHEDULE II of the INCOME TAX ACT) with the AMOUNT of SECURITIES in BRITISH INDIA in 1913-14

NOTE.—(1) This table is a continuation of table No. 7 of the Eighth Issue of the Volume of Financial and Commercial Statistics (1901). The annual returns from which it is prepared were discontinued for two years, and owing to the change of classification in the revised form of the return, the collections for recent years are only roughly comparable with those of earlier years. The figures in this table are compiled from Return No. VIII and sometimes differ from those under Part IV of tables Nos. 117 and 119 compiled from Return No. III of the Provincial Income Tax Reports, because of the inclusion of refunds and over-collections in Return No. III and their exclusion from Return No. VIII.

(2) The tax is levied on sources of income from (1) professions, (2) manufacture, construction and manipulation (other than Companies), (3) commerce and trade, and (4) property, houses and land. The following are, however, exempted from the tax: (1) property employed for religious, educational or public charitable purposes, (2) profits of Co-operative Societies or income of local authorities, (3) rent or revenue derived from land used for agricultural purposes or assessed to land revenue or subject to a local rate, (4) income derived from agriculture, or by a cultivator or receiver of rent in kind to render the produce raised fit for the market, or the sale thereof, (5) any building owned and occupied by the receiver of rent in the vicinity of the land as a dwelling house or a store house, factory, etc.

(a) Includes arrears collections Rs3,66,065, of which details in respect of Rs2,21,996 are not available

* Under the Income Tax Act, II of 1886, the taxable minimum of income was R500. By the Income Tax (Amendment) Act, XI of 1903, this minimum was raised to R1,000. Under the original Act the first two classes, of incomes were (I) R500 but less than R750 and (II) R750 but less than R1,000. On the passing of the amendment Act of 1903 these two classes were left out. The figures from 1903-04 under the old classes represent collections of arrears of Income Tax assessed in 1902-03

(a) Includes R1,758, for which the details by classes are not available

(b) Includes R9,787, for which the details by classes are not available

(c) Excludes arrear collections R15,590 in 1908-09, R22,017 in 1909-10, R21,560 in 1910-11, R26,601 in 1911-12, R25,523 in 1912-13, and R33,549 in 1913-14 for which the details under each Part are not available

INCOME TAX

NOTE.—“ Other Provinces and Departments of Government ” include figures for Ajmer-Merwara, Bangalore, Coorg, Hyderabad, and Port Blair, the collections from the salaries of Government officers in the Military, Marine, Postal, Public Works (up to 1909-10), and Forest (up to 1903-04) Departments, and the collections made by the Comptroller, India Treasuries, from the salaries of the officers of the various Departments of the Government of India, and from the interest on securities on account of the subordinate treasuries together with the tax collected by the Public Works Department on account of the profits of certain Railway Companies.

(a) See note marked (*) at foot of table No. 126. The figures under ‘classes I to IV’ include the collections under the old classes I and II up to 1902-03 and small arrear collections for these two classes from 1903-04.

(b) The figures in this column differ in some cases from the sum of the figures in the two preceding columns, as explained in the notes (c) and (d). The sum of the totals in the two preceding columns exceed the sum of the figures in the two ‘total’ columns in table No. 126 by the figures of collections under Part III (Interest on Securities) shown in tables Nos. 113, 119 and 124. Previous to 1908-09, however, some small differences occurred.

(c) Includes Rs.6,832 in 1904-05 Rs.6,557 in 1905-06, Rs.8,855 in 1906-07, and Rs.6,599 in 1907-08, being deductions on commission paid to thugais.

(d) Includes Rs.74,772 in 1904-05, Rs.78,918 in 1905-06, Rs.80,643 in 1906-07, and Rs.6,884 in 1907-08 on account of collections by employers under section 9 (2) of the Act the details of which by classes are not available.

(e) The figures from 1905-06 relate to the provinces of Bengal and Eastern Bengal and Assam as reconstituted in October 1905.

(f) Includes Rs.26,864 in 1907-08, collected on the profits of some Railway Companies.

(g) Includes arrear collections of Rs.910 in the Punjab in 1907-08 and Rs.40 in the North-West Frontier Province in 1907-08 the details of which by classes are not available.

(h) Excludes arrear collections of Rs.910 for which the details by classes are not available.

N. B.—Classes I—IV denote the assesses whose annual incomes lie between 1,000 and 2,000 rupees and classes V—XIII denote those whose yearly incomes are 2,000 rupees and upwards.

NOTE.—“ Other Provinces and Departments of Government ” include figures for Ajmer-Merwara, Bangalore, Coorg, Hyderabad, and Port Blair, the collections from the salaries of Government officers in the Military, Marine, Postal, Public Works (up to 1909-10) and Forest (up to 1908-04) Departments, and the collections made by the Comptroller, India Treasuries, from the salaries of the officers of the various Departments of the Government of India, and from the interest on securities on account of the subordinate treasuries, together with the tax collected by the Public Works Department on account of the profits of certain Railway Companies.

* See note marked (*) at foot of table No. 125. The figures under ‘ classes I to IV ’ include the collections under the old classes I and II up to 1902-03 and small arrear collections for these two classes from 1903-04 to 1909-10 and 1911-12.

† The figures in this column differ in some cases from the sums of the figures in the two preceding columns, as explained in notes (a), (b), (c), (f), (g), (h). The sum of the totals in the two preceding columns exceed the sum of the figures in the two ‘ total ’ columns in table No. 125 by the figures of collections under Part III (Interest on Securities) shown in tables Nos. 117, 119 and 123. Previous to 1908-09, however, some small differences occur.

(a) Includes Rs. 499 in 1908-09, Rs. 022 in 1909-10, Rs. 4,708 in 1910-11, Rs. 017 in 1911-12, Rs. 730 in 1912-13, and Rs. 516 in 1913-14, being deductions on commission paid to thuglys.

(b) Includes Rs. 828 in 1908-09, Rs. 829 in 1909-10, Rs. 404 in 1910-11, Rs. 091 in 1911-12, Rs. 708 in 1912-13, and Rs. 589 in 1913-14, on account of collections by employers under section 9 (2) of the Act, the details of which by classes are not available.

(c) Incomplete.

(d) Includes Rs. 22,373 in 1908-09 and Rs. 25,147 in 1909-10 collected on the profits of some railway companies.

(e) Includes arrear collections of Rs. 735, Rs. 1,022, Rs. 361, Rs. 264, and Rs. 6, in the Punjab in 1908-09, 1910-11, 1911-12, 1912-13, and 1913-14, respectively, and Rs. 52, Rs. 127, Rs. 212, and Rs. 20 in the North-West Frontier Province, in 1908-09, 1909-10, 1911-12, and 1912-13, respectively, the details of which by classes are not available.

N. B. Classes I—IV denote those assesses whose annual incomes lie between 1,000 and 2,000 rupees and classes V—XIII denote those whose yearly incomes are 2,000 rupees and upwards.

TRIBUTES FROM NATIVE STATES

[FOR TABLE, SEE PAGE 277]

The statistics of revenue recorded under this head represent tributes received from Native States, in several cases as a result of exchanges of territory and settlement of claims, and contributions made chiefly in lieu of former obligations to supply or maintain troops, the latter constituting a small return for the duty undertaken by the Supreme Government in ensuring the peace of the country. The figures do not show any important fluctuations from year to year, except for arrears and their recovery, and the levy of fees in some instances on succession (*nazarana*).

The total receipts are less than one per cent of the total Indian revenues. The tributes and contributions amount to nearly 88 per cent, and those for special military forces 11 per cent, of the total receipts. Fees on succession are on the average nearly 1 per cent. Madras contributes nearly 50 per cent, India-General, which includes tributes and contributions from amongst others the Udaipur, Jaipur, Jodhpur, Kotah, Bundi, Bhopal, and Jowrah States, nearly 23 per cent, Bombay 14 per cent, and Burma 5 per cent, of the total tributes from Native States.

TRIBUTES FROM NATIVE STATES*

128.—TRIBUTES (in rupees) from NATIVE STATES in each PROVINCE in each official year from 1910-11 to 1914-15

* Compiled from the Finance and Revenue Accounts of the Government of India

(a) Includes amongst others Jaipur, Kotah, Udaipur, Jodhpur, Bundi, Bhopal, and Jowrah States

(b) They are Malwa Contingent (Dewas and Jowrah), Deoli Irregular Force (Kotah), Bhopal Levy (Bhopal), Erinpura Irregular Force (Jodhpur), Malwa Bheel Corps, Battalion (Cochin), and Southern Mahratta Horse

INTEREST RECEIPTS

[FOR TABLE, SEE PAGE 279]

The interest receipts in this section (table No. 129) do not include interest on public works capital. The most important items included under interest receipts are (1) Imperial Loans and Advances to the Presidency Corporation and to Native States; (2) Provincial Loans and Advances chiefly to mofussil municipalities and cultivators; and (3) on investments. The amount of the interest accrued on Imperial Loans and Advances comes to about 26 per cent, and on Provincial Loans and Advances 29 per cent, of the total receipts. Interest receipts also include the interest on Paper Currency investments, which contributes 23 per cent of the total. Another important item included under this head of revenue is the interest payable by the Railway Companies on overdrafts of capital. There are other minor items, such as interest on securities of provincial funds, on arrears of revenue, and on advances to railway companies charged to capital, which are included under this head of revenue.

The total receipts amount to 1 per cent of the total Indian revenue. India—General, which includes the transactions of the Government of India, contributes about one-third of the receipts, Bombay about a fifth, Bengal an eighth, the United Provinces of Agra and Oudh nearly one-eighth, and Madras about one-twelfth. In 1914-15 the total receipts in India amounted to 126 lakhs of rupees as compared with 155 lakhs in the preceding year, showing a decrease of about 19 per cent.

The statement in the margin shows the total interest receipts in India (converted into £ at the rate of R15=£1) in the last five years, together with those in England, and the total receipts both in India and in

	In India	In England	Total	
	£	£	£	
1910-11	1,053,306	412,133	1,465,439	England. The receipts in England comprise (1) interest realised from investment of Cash Balance, etc., (2) interest on India Debt, remaining unclaimed for ten years, repaid by the Bank of England and the Bank of Ireland, (3) interest on Paper Currency Reserve Investment, and (4) interest on advances to the Imperial Bank of Persia for the purposes of the Persian Government (from 1911-12).

DEPARTMENT OF STATISTICS, INDIA

Statistics of British India

Volume II

Financial Statistics

Published by order of the Governor-General in Council

CALCUTTA
SUPERINTENDENT GOVERNMENT PRINTING, INDIA
1918

[No. 716]

PREFATORY NOTE.

FINANCIAL STATISTICS.

This volume deals with Financial Statistics, and therefore relates chiefly to Revenue, Expenditure, Currency, and Banking. It is divided into two parts—I and II. Part I contains tables relating to Revenue and Expenditure, Mint and Coinage, Paper Currency, Registered Debt, Securities Enfaced for payment of Interest in London, Drawings of the Home Government, Ways and Means of the Home Government, Prices of Gold, Silver, and Stocks and Rates of Exchange, Military Services, Banks, Post Office Savings Banks, Co-operative Societies, and Life Assurance. Part II deals with the principal heads of Revenue and contains tables relating to Land Revenue, Forests, Opium, Salt, Stamps, Excise, Provincial Rates, Customs Revenue, Income Tax, Tributes from Native States, and Interest Receipts. A chart showing variations in (1) the revenue and expenditure of the Government of India, (2) the debt of the Government of India, and (3) the circulation of currency notes in India since 1903, and an index have also been inserted in the volume for easy reference. Figures, for the years 1914-15, 1915-16 and 1916-17 (as far as available), have been added to the tables in this, the 8th issue. If information, in addition to that given in the introductory notes and in the tables in the volume, is required, reference should be made to the Civil Estimates (in two volumes), the Finance and Revenue Accounts of the Government of India (one volume), the Financial Statement and Budget, and also the Report on the Operations of the Currency Department, all of which are published annually.

DEPARTMENT OF STATISTICS, INDIA.

Calcutta, October 11, 1918.

G. FINDLAY SHIRRAS,

Director of Statistics.

PART I

Revenue, Expenditure, Coinage, Currency, Public Debt,
Council Bills, Exchange, Banks, etc.

REVENUE AND EXPENDITURE

[FOR TABLES, SEE PAGES 9 TO 11]

Table No. 1 is an abstract statement of Revenue, Expenditure, and Debt of the Government of India in each year from 1877-78 to 1916-17. The funded debt outstanding in 1877-78 was 7,495 lakhs of rupees in India and 59.7 million pounds sterling in England. The total sum represents 265 per cent of the revenue of that year. In 1916-17 the funded debt outstanding was 282.7 million pounds sterling, equivalent to 238 per cent of the year's revenue. In the 40 years there was a surplus in 27 years and a deficit in 13 years. The 27 years' surplus aggregates 8,788 lakhs of rupees and the 13 years' deficit 3,385 lakhs, the result being a net surplus of 5,403 lakhs.

Table No. 2 is an abstract of the Revenue and Expenditure for ten years. During the period of 40 years which is dealt with in Table No. 1, the total revenue has risen from 6,197 lakhs of rupees in the first year 1877-78 (equivalent at the average rate of exchange of that period to £53,709,000) to 17,820 lakhs of rupees (=£118,800,000 at Rs15 to the pound) in 1916-17. The increase represents 188 per cent reckoning in rupees and 121 per cent reckoning in sterling. During the same period the expenditure has risen from 6,623 lakhs of rupees (=£57,403,000) to 16,698 lakhs of rupees (=£111,322,000). This represents 152 per cent in rupees and 94 per cent in sterling.

In considering the Revenue and Expenditure of the Government of India, however, it is desirable to divide the Revenue and Expenditure on account of "Commercial Services," i.e., the Post Office and Telegraph Department, Railways, and Irrigation, from the Revenue and Expenditure under other heads.

The following statement gives the quinquennial averages for each of the main heads of revenue and the percentage which each bears to the total revenue, excluding the Commercial Services, for the period 1877-78 to 1916-17 and also for the years 1915-16 and 1916-17.

(a) Term'd "Assessed Taxes" up to 1913-14

The total increase of this revenue in 1916-17 as compared with the average of 1877-78 to 1881-82 is 57 per cent.

The following table gives the quinquennial averages under the main heads of expenditure and the percentage which each bears to the total expenditure, excluding the Commercial Services, for the period 1877-78 to 1916-17 and also for the years 1915-16 and 1916-17.

Expenditure (excluding Expenditure on Commercial Services) in thousands of rupees

	Land Revenue (including District Administration).		Forest		Other heads including Opium.		Debt Services		Civil Departments		Civil charges		Civil works		Army (including Military Works and Special Defence Works).		Famine Relief and Insurance		TOTAL

MINT AND COINAGE

[FOR TABLES, SEE PAGES 14 TO 29]

Gold coins

No gold coins have been minted in India since 1891-92,* and gold mohur and its submultiples have practically disappeared from circulation. Sovereigns and half-sovereigns minted either in England or Australia are recognised as legal tender to an unlimited amount at the rate of one sovereign to fifteen rupees, provided that they have not been called in or lost weight beyond the limit prescribed as the lowest current weight, viz., 122·5 grains for the sovereign, and 61·125 grains for the half-sovereign—the full legal weight being 123·27447 and 61·63723 grains, respectively. Under Notification No. 1448 A., dated the 8th March 1907, however, sovereigns and half-sovereigns, which have lost weight so as to be of less weight than that for the time being prescribed for light coins by or under the Coinage Act, 1870, as the least current weight, are receivable at Treasuries, Currency Offices, Mints, and Presidency Banks at the following rates, namely :—

- (a) When such coins have not been reduced by more than three grains below standard weight, that is, are not less in weight than grains 120·27447 and 58·63723, respectively, at their face value; and
- (b) When such coins are of less weight than grains 120·27447 and 58·63723, respectively, at their bullion value by weight :

Provided that such coins have not been illegally dealt with, that is, have not been impaired, diminished or lightened, otherwise than by fair wear and tear, or defaced by having any name, word, device or number stamped thereon, whether the coin has or has not been thereby diminished or lightened.

Silver coins

The weight and fineness of the silver coins minted in the Indian mints for circulation in India are as follows :—

	Fine Silver (grains)	Alloy (grains)	Total (grains)
Rupee	165	15	180
Half-rupee (8 annas)	82½	7½	90
Quarter-rupee (4 annas)	41¼	3¾	45
Eighth of a rupee (2 annas)	20¾	1¾	22½
One rupee = 165 grains of fine silver.			
One shilling = 80¾ grains of fine silver.			
One rupee = shillings 2·0·39 †			

In the year 1893 the two Government mints at Calcutta and Bombay were closed for the unrestricted coinage of silver for the public. During the five succeeding years, the coinage of rupees ceased, except that in the years 1897-98 and 1898-99 about nine million rupees were coined for Native States to replace their local currencies. By the winter of 1900 the stock of rupees in the Currency reserve had fallen so low that direct replenishment by new coinage became a necessity. The coinage was begun in February 1900, the Government purchasing the silver required, and paying for it mainly with the gold accumulated in the Paper Currency Reserve.

The statement below shows the silver coinage in the last five years :—

Number of pieces					
	Rupees	Half-rupees	Quarter-rupees	One-eighth-rupees	Total
1912-13	187,529,000	4,895,000	11,863,000	19,421,000	223,708,000
1913-14	121,361,000	4,548,000	20,635,000	22,201,000	168,745,000
1914-15	18,072,000	2,303,000	4,371,000	11,834,000	36,580,000
1915-16	14,800,000	2,804,000			17,604,000
1916-17	298,900,000	6,078,000	13,178,000	19,787,000	337,943,000
Value (in rupees)					
1912-13	18,75,29,000	24,47,000	29,66,000	24,28,000	19,53,70,000
1913-14	12,13,61,000	22,74,000	51,59,000	27,75,000	13,15,69,000
1914-15	1,80,72,000	11,52,000	10,92,000	14,79,000	2,17,95,000
1915-16	1,48,00,000	14,02,000			1,62,02,000
1916-17	29,89,00,000	30,39,000	32,95,000	24,73,000	30,77,07,000

The foregoing figures include the value of old rupees received into the mints for recoinage which is stated separately below :—

	British rupees (nominal value) R	Native coins (equivalent in British rupees) R	Other coins (equivalent in British rupees) R
1912-13	3,53,91,000	24,09,000	7,000
1913-14	2,64,78,000	36,59,000	2,000
1914-15	2,04,36,000	..	150
1915-16	1,64,10,000	..	..
1916-17	1,38,55,000	..	..

Dollar and cent pieces

In addition to the coinage of silver for circulation in India, the mints also received, under an agreement with certain Exchange Banks, silver for coinage into British dollars for circulation in Hongkong and the Straits Settlements. This agreement terminated on the 10th December 1903, and no fresh agreement has been entered into. Owing to a change in the currency policy in the Government of the Straits Settlements a new dollar was introduced there, the coinage of which has been undertaken at the Bombay mint since September 1903. Since April 1905 the coinage of the Straits fifty-cent pieces has been undertaken in the Bombay mint, and since October 1909 the coinage of the twenty-cent, ten-cent, and five-cent pieces for the Straits Settlements Government has further been undertaken in the same mint. The coinage of Ceylon fifty-cent, twenty-five cent and

* In 1916-17, 10,001 hundred-piastre pieces to the value of Rs. 1,53,765 were coined in the Bombay mint for the Egyptian Government.

† The metallic value in sterling of the 165 grains of fine silver in a rupee is as follows, with the price of silver at the rate stated below per standard ounce :—

60 d. = 22·297 d.	29 d. = 10·777 d.	24 d. = 8·918 d.
50 d. = 18·581 d.	28 d. = 10·406 d.	23 d. = 8·547 d.
40 d. = 14·865 d.	27 d. = 10·034 d.	22 d. = 8·176 d.
35 d. = 13·007 d.	26 d. = 9·662 d.	21 d. = 7·804 d.
30 d. = 11·149 d.	25 d. = 9·291 d.	20 d. = 7·432 d.

ten-cent pieces has been undertaken in the Calcutta mint from 1913-14. The coinage of both dollars and of cent pieces during the five years, ending 1916-17 have been :—

	Number of pieces						
	British Dollars	Ceylon fifty-cents	Ceylon twenty-five cents	Straits twenty cents	Ceylon ten cents	Straits ten cents	Straits five cents
1912-13	5,672,075	..	..	..	..	..	444,628
1913-14	1,566,693	200,000	400,000	191,802	2,000,000	..	..

With the expiry in December 1903 of the special agreement with the Exchange Banks for the coinage of British dollars, the number coined fell to 3,955,647 in 1903-04 and 648,847 in 1904-05, while the coinage in these two years of Straits dollars was 15,009,891 and 20,364,664 pieces, respectively. No dollars were coined in 1905-06 or in 1906-07, but in 1907-08 the coinage of British dollars was resumed in the Bombay mint. No Straits dollar has been coined since 1904-05, nor British dollar since 1913-14, and Straits fifty-cent pieces have so far been coined only once and that in 1905-06.

In 1916-17 the coinage of Egyptian, twenty, ten, five and two piastre pieces was undertaken in the Bombay mint and the total number of these silver pieces coined in that year was 18,370,112.

In 1906 provision was made for the coinage of a nickel coin, and by Notification No. 4597 A., dated the 22nd July 1907, it was directed that the nickel one-anna piece should thenceforth be coined at the mint and issued. The coin weighs 60 grains Troy and has a waved edge with twelve scollops, the greatest diameter being 21 millimetres and the least 19·8 millimetres. The statement in the margin gives the number and value of nickel one-anna pieces struck in the mints in the last five years.

	Number	Value (in rupees)	
1912-13	39,778,000	24,86,000	The desirability of issuing a half-anna nickel coin was considered
1913-14	46,320,000	28,95,000	by the Government of India in 1909, but it was decided not to
1914-15	42,352,000	26,47,000	take action in this direction until the people had become
1915-16	7,670,000	4,79,000	thoroughly familiar with the present one-anna coin.
1916-17	39,087,000	24,43,000	

In 1916-17 the nickel coinage of ten, five, two and one millieme pieces for the Egyptian Government was undertaken in the Bombay mint and in that year 11,702,143 pieces of such coins to the value of Rs. 5,92,252 was struck in the mint. *

Copper coinage was introduced into the Bengal Presidency by Act XVII of 1835, and into the Madras and Bombay Presidencies by Act XXII of 1844. The weight of the copper coins struck under Act XXIII of 1870 remained the same as it was in 1835. It was as follows :—

	Grains Troy
Double pice, or half-anna	200
Pice or quarter-anna	100
Half-pice or one-eighth of an anna	50
Pie, being one-third of a pice or one-twelfth of an anna	33½

Ninety rupees' worth of pice weigh 576,000 grains troy, or 82½ lb avoirdupois.

Act III of 1906 provided for the substitution of bronze for copper coinage. By Notification No. 3895A. dated the 11th July 1906, it was directed that the bronze coins should thenceforth be coined and issued at the mint, and that, with effect from the 1st August 1906, copper coins for the Government of India should cease to be coined. But the copper coinage for Ceylon and the Straits and for certain Native States in India continued in the Calcutta mint. In 1916-17, 3,000,000 pieces of half cents to the value of Rs. 26,250 and 4,000,000 pieces of quarter cents to the value of Rs. 17,500 were coined for the Straits.

The weight and dimensions of the several denominations of bronze coins are given below :—

	Standard weight (in grains Troy)	Diameter (in millimetres)
Pice or quarter anna	75	25·4
Half-pice	37½	21·15
Pie	25	17·45

The statement below shows the bronze coinage of the last five years :—

	Number of pieces				Value (in rupees)			
	Quarter anna	Half-pice	Pie pieces	Total	Quarter anna	Half-pice	Pie pieces	Total
1912-13	107,455,909	12,911,328	25,937,897	146,305,134	16,78,999	1,00,870	1,35,093	19,14,962
1913-14	122,636,891	10,896,672	16,148,527	149,682,090	19,16,201	85,130	84,107	20,85,438
1914-15	20,441,600	4,876,800	19,814,400	45,132,800	3,19,400	38,100	1,03,200	4,60,700
1915-16	..	9,830,400	20,563,200	30,393,600	..	76,800	1,07,100	1,83,900
1916-17	9,337,600	5,734,400	14,438,400	29,510,400	1,45,900	44,800	75,200	2,65,900

In 1916-17, 4,764,000 pieces of Australian pennies to the value of Rs. 2,97,750 and 3,600,000 pieces of Australian half-pennies to the value of Rs. 1,12,500 were struck in the Calcutta mint. In addition to these, 4,000,000 half millieme pieces to the value of Rs. 30,406 were coined for the Egyptian Government.

With the fall in the prices of silver, which preceded the closure of the Calcutta and Bombay mints in 1893, there was a very large importation of the metal into India and excessive quantities were coined by some of the Native States during that period and for some years following the closure. It was found, thereafter, that the coinages were greatly in excess of the needs of the States, and operations abated in 1898. The arrangements made with some of the States for the substitution of the British for the local rupee had led to the closing of the local mints. The States in which coinage was carried on during the last fifteen years have been dealt with in table No. 19. The total coinage from new silver in 1916 amounted to 13,566,418 tolas, and the States in which coinage was carried on to a considerable extent in that year were Hyderabad and Cutch.

* By Notification No. 761-F. dated the 22nd March 1918, it was directed that a nickel two-anna piece should thenceforth be coined at the mint and issued. It is a square coin with rounded corners, its least diameter being 21 millimetres and the rim is not milled.

MINT AND COINAGE*

NOTE.—From the 26th June 1893, when the mints were closed to the unrestricted coinage of silver, the receipts from individuals represent coins of Native States tendered for recoinage, particulars of which appear in table No. 7. From the same date silver belonging to the Government has been valued at its cost price instead of at the fixed rate of Rs per tola of standard silver, but old rupees received for recoinage, as entered in table No. 6, are still taken at their nominal value. The silver received into the mint for coinage into British dollars intended for circulation in the Far East and into the new dollar adopted as the currency of the Straits Settlements is excluded from this table. Particulars of the coinage of these British and Straits dollars will be found in table No. 13

MINT AND COINAGE

No. 5.—QUANTITY (in ounces) of GOLD and SILVER IMPORTED into and EXPORTED from BRITISH INDIA from and to FOREIGN PORTS in each official year from 1873-74 to 1916-17

NOTE.—The quantities in the column "net imports" for both gold and silver, for the years 1873-74 to 1886-87, are estimates only, deduced from the declared value of the trade for those years by the following process:

For gold, the rupee value of the monthly net imports was converted into sterling at the average rate of exchange in each month, and this sterling value was then divided by the English mint price of gold (£3 17s. 10½d. per ounce). For silver, the average price of Rs107 per 100 tolas, or Rs285.33 per 100 ounces, was taken as the basis of the value of the annual imports.

MINT AND COINAGE

No. 6.—OLD GOVERNMENT of INDIA RUPEES (including small SILVER COINS) received into the MINTS for RECOINAGE, and SILVER COINAGE in each MINT, from 1835-36 to 1916-17

NOTE.—The British dollar is 416 grains Troy in weight and of 900 millesimal fineness

- The coinage of these cent pieces has been undertaken since October 1909
- Straits dollars of the same weight and fineness as British dollars
- Fifty cent pieces. The Straits fifty cent piece weighs 209.52 grains and is of 800 millesimal fineness
- From Burma ports
- Includes Rs150 being the value of British dollars exported from Madras
- The coinage of the twenty cent pieces commenced in May 1910

MINT AND COINAGE

(28)

No. 20.—OUTTURN in the INDIAN MINTS of SILVER BULLION IMPORTED from ENGLAND

Note.—This table states approximately the sterling cost of a rupee coined during the period when the mints were still open to the receipt of silver from the public for coinage. The cost was determined by the sterling price of silver and the cost of sending it from London to India, to which were added the mint seignorage and other charges. The calculations used in the preparation of this table are as follows :—

Column A.—To the cost of an ounce Troy of standard silver in London, 1 per cent is added for freight and charges for remitting, and to the total cost $\frac{1}{8}$ per cent is added as interest for the time taken by a bullion remittance in excess of the time occupied by a remittance by bill. This sum is divided by the mint outturn of an ounce of fine silver bullion received into the mint after cutting, as given below, and the quotient, showing the cost of a Government rupee in India in pence, is entered in column A :

One ounce Troy of English standard silver	=2.6909
Mint duty and melting charge at Rs21 per mille	=.0565
NET VALUE	2.6344
Mint loss in melting at .25 per mille	=.0007
MINT NET OUTTURN	2.6337

Column B.—The rates in this column are based on the same data as in A, except that $\frac{1}{2}$ per cent is added as interest.

Column C.—The rates in this column are based on the transit charges being $1\frac{1}{4}$ per cent, namely, freight $\frac{1}{2}$ per cent insurance $\frac{1}{2}$ per cent, boxes, packing, etc., $\frac{1}{8}$ per cent, and brokerage $\frac{1}{8}$ per cent, interest at $\frac{1}{8}$ per cent. The mint outturn of an ounce of fine silver bullion is Rs2.6337.

Column D.—The rates in this column are based on the same data as in C, except that interest is taken at $\frac{1}{2}$ per cent instead of $\frac{1}{8}$ per cent.

The following are the data used in calculating the results stated in these columns :—

English standard silver	= $\frac{37}{16}$ ths fine
Indian „	= $\frac{11}{16}$ ths fine
1 ounce Troy	= $2\frac{3}{8}$ tolas

Charges in England : Freight, insurance, boxes, packing, brokerage, etc. = 1 to $1\frac{1}{4}$ per cent

Interest = 6% per annum on the time of transit of a silver shipment in excess of the transit of a bill. The excess is taken to be 7 and 23 days, and the interest for the time, one-eighth and one-half per cent, respectively.

Charges in India : Mint duty (seignorage)	= 2%.
Melting charge	= 1%.
Loss in melting inferior silver	= 0.25%.

PAPER CURRENCY

[FOR TABLES, SEE PAGES 34 TO 43]

Laws and
orders relat-
ing to Paper
Currency

Under Acts, VI of 1839, III of 1840, and IX of 1843, the Presidency Banks of Bengal, Bombay, and Madras were authorised to issue notes payable on demand, but the issue of the notes was practically limited to the three cities of Calcutta, Bombay, and Madras. These Acts were repealed, on the 1st March 1862, by Act, XIX of 1861, providing for the issue of a paper currency through a Government Department, by means of notes of the Government of India payable to bearer on demand. Since then no banks have been allowed to issue notes in India. This Act was replaced first by Act, III of 1871, and subsequently by Act, XX of 1882. The Act of 1882 was amended by Acts, XV of 1890, VIII of 1893, XXI of 1896, II of 1898, VIII of 1900, IX of 1902, and VI of 1903; all these Acts were superseded by Act, III of 1905, which again was amended by Act, II of 1909. The last two enactments were repealed by Act, II of 1910, which again was amended by Acts VII of 1911, V of 1915, IX of 1916 and XI of 1917. By the Act of 1882, the Paper Currency was extended to Burma, which province had not been included in the former arrangements. By Act XV of 1890, the maximum limit of that portion of the reserve held against the note circulation, which may be invested in Government securities, was raised from six crores to eight crores of rupees. Act VIII of 1893 gave effect to the decision of the Government of India (1) to close the Indian mints to the unrestricted coinage of silver for the public, and (2) to issue currency notes in exchange for gold coin or bullion to any amount, the law until then having provided only for the issue of notes against silver. Act XXI of 1896 empowered the Government of India to raise the limit of the reserve, which may be invested in Government securities, to ten crores. Act II of 1898, which was designed as a temporary measure of relief to a stringent money market, empowered the Governor-General in Council to issue currency notes on the security of gold deposited in England. The Act terminated on the 21st July 1900, but the authority given to Government was continued, by Act VIII of 1900, for another two years, this Act also giving the Secretary of State for India power to expend the gold so deposited in the purchase of silver for remittance to India for coinage. The Act of 1900 was continued by Act IX of 1902, and the authority given as a temporary measure was made permanent. Act VI of 1903, which was designed to increase the circulation of five-rupee notes, declared such notes, when issued from any town outside Burma, to be legal tender throughout British India, except Burma, and authorised their encashment at any office of issue in British India, except Burma. Act III of 1905 repealed all these Acts and re-enacted their provisions in a consolidated form. It further raised the limit of the invested portion of the reserve from 10 to 12 crores of rupees, and allowed a part of the investment not exceeding two crores of rupees to be made in sterling securities. Act II of 1909 declared five-rupee notes to be legal tender throughout British India and authorised their encashment at any office of issue in British India. Act II of 1910 repealed Acts III of 1905 and II of 1909 and amended and consolidated the law on the subject. By it, a note of the value of five, ten, or fifty rupees, as well as a note of any other denominational value which the Governor-General in Council may, by notification in the *Gazette of India*, so specify, was declared to be a "universal currency note," that is, legal tender throughout British India and encashable at any office of issue in British India; the then existing sub-circles of Cawnpore, Lahore, Karachi, and Calicut were abolished, and the first three of these constituted separate circles of issue in addition to Calcutta, Madras, Bombay, and Rangoon. At the same time, by a notification issued under the Act, the further issue of 20-rupee notes was discontinued. By another notification issued in 1911 under section 2 of the same Act a currency note of the denominational value of one hundred rupees was declared to be a "universal currency note." Act VII of 1911 raised the invested portion of the Currency Reserve from 12 crores to 14 crores with permission to make the additional investment in sterling securities if desired. On account of special circumstances of the War, Government of India had recourse to temporary legislation. The Indian Paper Currency Act of 1910 was further amended temporarily by Acts V of 1915, IX of 1916 and XI of 1917. By these enactments the invested portion of the Currency Reserve was raised from 14 crores to 20 crores, and the permissible additional investment against British Treasury Bills to 30 crores of rupees.*

Department
of Paper
Currency.

The function of the Paper Currency department is to issue, without any limit, promissory notes (called currency notes) of the Government of India payable to the bearer on demand, of the denominations of Rs. 5, 10, 50, 100, 500, 1,000, and 10,000, the issue being made in exchange for rupees or half rupees or for gold coin, which is legal tender, from any Paper Currency office or agency, and for gold bullion and gold coin which is not legal tender, from circle offices on the requisition of the Comptroller General. The present circles and offices of issue of the notes and the territories within which the notes of each circle are legal tender, are as follows :

* Act XIX (September) of 1917 raised the permissible additional investment of Rs. 30 crores against British Treasury Bills to 42 crores of rupees and this amount has been further raised to Rs. 66 crores by Act VI of 1918. The total power of investment has thus been raised to 86 crores, of which 14 crores represents the permanent pre-war investment and the rest is and will be a temporary investment in that the acts authorising it are temporary measures which will lapse six months after the War. By Act XIX of 1917 notes of the denominational value of one rupee and two and a half rupees were issued and declared to be universal currency notes.

PAPER CURRENCY

Offices of issue	Officers in charge	Circles or geographical limits within which notes are legal tender
Calcutta	Controller of Currency (Head Commissioner of Paper Currency)	The territory under the Governor of Bengal, the Lieutenant-Governor of Bihar and Orissa, and the Chief Commissioner of Assam, and the territories under the Superintendent, Port Blair, and the Chief Commissioner, Andamans, and the Bikaner State
Cawnpore	Commissioner of Paper Currency (Accountant General, United Provinces)	The territory under the Lieutenant-Governor of the United Provinces of Agra and Oudh, the Cantonment and civil lines of Nowgong, Sam bhar, and the Bharatpur and Dholepur States, and the lands occupied by the (a) Bina-Agra portion, (b) the Cawnpore Branch and (c) the Manikpur Branch of the Great Indian Peninsula Railway, Midland Section
Lahore	Commissioner of Paper Currency (Accountant General, Punjab)	The territory under the Lieutenant-Governor of the Punjab, the Chief Commissioner of the North-West Frontier Province, and the Chief Commissioner, Delhi
Madras	Commissioner of Paper Currency (Accountant General, Madras)	All the districts in the Madras Presidency, the territory administered by the Chief Commissioner of Coorg and the Civil and Military Station of Bangalore
Bombay	Commissioner of Paper Currency (Accountant General, Bombay)	All the districts of the Bombay Presidency proper, the Central Provinces and Berar, and all the districts in Ajmer-Merwara and the areas in the Hyderabad (Deccan) State in which the Governor-General in Council exercises jurisdiction through the Resident, the cantonments of Bareda, Mhow, Nimach, Agar, Guna, and Sehore, the Indore Residency Bazzars, the Native States in Rajputana, except the Bikaner, Bharatpur, and Dholepur States, and the Railway lands in Central India and Rajputana except those mentioned under Cawnpore
Karachi	Commissioner of Paper Currency (Accountant General, Bombay)	The province of Sind and Baluchistan (British and Agency)
Rangoon	Commissioner of Paper Currency (Accountant General, Burma)	All the territory under the Lieutenant-Governor of Burma

Currency notes are supplied by the Secretary of State through the Bank of England on an indent from the Head Commissioner. The Head Commissioner or Commissioners supply Currency Agents with all the notes required for the purposes of the Paper Currency Act. Every such note, other than a "universal" note, bears upon it the name of the place from which it is issued and every note is impressed with the signature of the Head Commissioner or of a Commissioner. The officers in charge of the circles of issue are authorised to issue, from the office or offices established in their circles, currency notes in exchange for the amount thereof (1) in rupees or half-rupees or in gold coin which is legal tender under the Indian Coinage Act, or in rupees made under the Native Coinage Act, IX of 1876, and (2) on the requisition of the Comptroller General, to all treasuries, in gold coin which is not legal tender under the Coinage Act or gold bullion at the rate of one Government rupee for 7·53344 grains troy of fine gold. Currency notes can also be issued against gold coin or bullion or silver bullion or sterling securities held by the Secretary of State for India in Council.

Every note is a legal tender in its own circle (except by Government at the office of issue) for the amount expressed in that note; that is to say, whenever a note forms the integral sum, or a portion, of any payment, either to Government on account of a revenue or other claim, or to any body corporate or person in British India, it is a legal tender. Five, ten, fifty, and hundred rupee notes are legal tender throughout British India. Notes of higher denominations than hundred rupees are payable only at the office or offices of issue of the town from which they have been issued. Any note of the old subordinate circles of Lahore, Cawnpore, Karachi, and Calicut which may still be in circulation are payable at the office of the Presidency circle to which those sub-offices were subordinate. Five, ten, fifty, and hundred rupee notes are payable at any office of issue in British India. In ordinary circumstances every Government treasury, of which there are over 270 in British India, cashes or exchanges notes if it can do so without inconvenience; and when this cannot be done conveniently for large sums, small sums can generally be exchanged for travellers. By executive orders, 20-rupee notes already in circulation are legal tender throughout British India and encashable at any office of issue in British India, but notes of this value are no longer issued.

The whole amount of currency notes in circulation is secured by a reserve of gold and silver coin or bullion and securities of the Government of India or of the United Kingdom. The total amount of such securities was, up to the end of the year of report (1916-17), limited to 50 crores of rupees, of which not more than 40 crores of rupees might be in sterling securities. Under the Act of 1882 the maximum limit of the securities was fixed at six crores of rupees; but, the issues having largely expanded, the Govern-

Supply and
issue of cur-
rency notes

Notes when
legal tender
and when
payable

Reserve

PAPER CURRENCY

ment of India was empowered by Act, XV of 1890, to raise the limit to eight crores. The power was utilised to raise the invested reserve to seven crores on the 19th December, 1890, and to eight crores a year later, on the 3rd December, 1891. By Notification No. 5366 of the 18th December, 1896, the invested reserve was raised to ten crores, the power to do so having been given by Act, XXI of 1896. Act, III of 1905 raised the limit to 12 crores and in August of that year two crores of the reserve were invested by the Secretary of State in consols and exchequer bonds. In 1908-09 the exchequer bonds were replaced by consols. By Act, VII of 1911, the limit was raised further to 14 crores and in April of that year two crores were invested by the Secretary of State in consols. Acts, V of 1915, IX of 1916 and XI of 1917 temporarily raised the limit to 50 crores.

Currency
Chest in
London.

Under the Gold Note Acts of 1898 and 1900, the Government of India had obtained authority to hold a part of the metallic portion of the reserve in gold coin (or temporarily in silver bullion) in London instead of in India. The object of these enactments was merely to afford temporary relief to the Indian money market in seasons of stress. A certain amount of gold had in this way been held in London during 1899 and 1900, but not to any large extent, and the occasion for doing so ceased, except in regard to gold in transit, from the middle of 1900. Act, II of 1910, however, gave full power to hold the metallic portion of the reserve or any part of it, either in London or in India or partly in both places, and also in gold coin or bullion or in rupees or silver bullion, at the free discretion of Government, subject only to the exception that rupees should be kept only in India and not in London. A currency chest was accordingly opened in London and a sum of £6,000,000 was remitted from India in pursuance of this policy, and a further sum of £1,045,000 was transferred to the chest from the Secretary of State's balances during the course of 1905-06. On the 31st March, 1917, the London currency chest held £4,450,000 on behalf of the Currency Reserve.

Metallic
reserve.

The metallic reserve may consist of sovereigns, half sovereigns, rupees, and half rupees, and gold and silver bullion, the last named being valued at the sum spent on the purchase of such bullion. No gold was contained in the reserve between March, 1876, and February, 1898, and the quantity increased very slowly until February, 1899, but from that date it rose rapidly till the end of March, 1900, when it amounted to £7,500,012. On 31st March 1917 the stock of gold in the reserve amounted to £12,449,462 as against £16,111,810 on 31st March 1916.

Interest.

The interest accruing on the invested reserve is entered in a separate account, and paid to the credit of the Government of India, under the head "Profits of note circulation." The interest on the invested reserve amounted in 1916-17 to R94,57,000, the expenditure of the Department being R25,44,082 and the profit R70,70,574.

Circulation
of notes

The average monthly circulation of the notes has been, in millions of rupees :

Five years ending	1880-81	129·07
"	1885-86	142·65
"	1890-91	171·67
"	1895-96	282·44
"	1900-01	265·39
"	1905-06	361·80
"	1910-11	481·97
"	1915-16	633·37
For the year	1916-17	761·42

The circulation in each circle on the 31st March, 1914, 1915, 1916 and 1917, was (R) :

	1914	1915	1916	1917
Calcutta including Cawnpore and Lahore	34,88,52,295	31,12,61,635	34,38,05,410	40,00,79,145
Bombay " Karachi	16,02,65,330	16,90,95,970	18,67,07,575	29,30,34,995
Madras	8,84,10,880	8,50,15,655	8,72,96,825	10,15,41,170
Rangoon	6,36,47,430	5,09,27,255	5,95,24,730	6,90,96,425

The note issue assumed unprecedented proportions and stood at Rs. 86 crores at the end of March 1917. The circulation of the different denominations of notes on the 31st March, 1897 and 1917, was as shown in

	1897	1917

the margin. Looking back over the twenty-years since 1896-97, the relative popularity of each denomination of note may be measured by the increase in its circulation, an exception, however, being made in the case of notes for 10,000 rupees which are chiefly used as a convenient form in which to hold the balances in the Government reserve treasuries. In 5-rupee notes there is a comparatively large increase of 986·6 per cent, while those for ten rupees have increased 380·8 per cent and notes for 100 rupees have increased 318·4 per cent. The circulation of notes for 20 rupees have suffered from time to time from a scare brought about by the operations of forgers. It suddenly dropped in 1882-83 to hardly more than half the circulation in the preceding year and did not recover until 1890; thereafter there was a gradual increase, and in 1908-09 the circulation nearly reached the figure of 1881-82, but it has since dropped steadily, and rapidly, and, as already stated above, 20-rupee notes are no longer issued. Notes for 50 rupees also apparently do not supply any extensive demand, for they have increased by 118·6 per cent

PAPER CURRENCY

only. Notes for 500 and 1,000, rupees which are commonly employed in commercial and banking operations, have increased 2·8 per cent and 102·2 per cent, respectively. The increase in the average active circulation of notes is given in the following table (in millions of rupees) :—

	1912-13	1913-14	1914-15	1915-16	1916-17
Gross circulation	656·2	655·5	640·4	641·0	761·4
Amounts held in Reserve and other Treasuries	132·2	126·4	75·4	66·0	67·7
Balance, being notes in circulation with the public	524·0	529·1	565·0	575·0	693·7
Notes held by Presidency Banks at Head Offices	70·1	62·8	110·7	94·2	100·1
Notes in actual circulation	453·9	466·3	454·3	480·8	593·6

It may be interesting to show here the absorption of rupees and half rupees during the last four years. The figures below are in millions of rupees.

	1913-14	1914-15	1915-16	1916-17
Opening balance (Currency, Treasury and Gold Standard Reserve)	284·6	327·0	388·4	279·6

REGISTERED DEBT

[FOR TABLES, SEE PAGES 45 TO 63]

Amount of debt The tables on debt are similar to those of previous issues. The question of their revision is now under consideration. The registered debt of India consists of rupee loans raised in India and sterling loans raised in England.

The amount of debt on the 1st April 1916 was :—

	£
In England	175,171,829
In India, R1,55,45,97,700, converted into £ at R15=£1	103,639,847
TOTAL	278,811,676

The total debt outstanding on 31st March 1917 was as follows :—

	£
In England	174,144,724
In India, R1,62,86,03,073, converted into £ at R15=£1	108,573,538
TOTAL	282,718,262

In England £500,000 India bonds, and £527,105 India stock, were discharged during 1916-17.

War Loan

In India the war loan floated in various shapes consists of :—

- (1) 5 per cent War Loan of 1929-47 which was issued at the discount of 5 per cent.
- (2) 5½ per cent War Bonds 1920 and War Bonds 1922 both of which were issued at par, but free of income tax.
- (3) Post Office 5-year cash certificates.

The loan was opened from the 15th March 1917 and about Rs. 60·2 millions or £ 4 millions were actually received up to the 31st March 1917.

Classification of debt

The total registered debt is classified in the accounts as (1) Public Works Debt, (2) Ordinary Debt. The amount entered as belonging to the former category is the equivalent of the total capital expenditure which has been incurred by the State on public works, together with the amount advanced to Railway Companies for capital expenditure ; the " Ordinary Debt " consists of the remainder of the debt. In any year in which, owing to the use of surplus revenue or deposits for the construction of public works, the capital expenditure of the year exceeds the amount of debt incurred in the year, the effect of this system of classification is to cause a decrease to be shown in the amount of the ordinary debt.

Distribution of debt

The distribution of the total registered debt in India and-England in the last five years was as follows :—

[Millions of £ sterling

										Ordinary Debt	PRODUCTIVE PUBLIC WORKS DEBT.			Grand total of debt (columns 1 and 4)
											Railways	Irrigation	Total	
											1	2	3	
On 31st March—														
1913	.	.	.	.	.	.	.	.	.	25·0	211·8	37·6	249·4	274·4
1914	.	.	.	.	.	.	.	.	.	12·8	222·0	39·4	261·4	274·2
1915	.	.	.	.	.	.	.	.	.	2·2	233·2	41·1	274·3	276·5
1916	.	.	.	.	.	.	.	.	.	2·0	234·4	42·4	276·8	278·8
1917	.	.	.	.	.	.	.	.	.	3·7	235·7	43·3	279·0	282·7

It may be explained that for the purpose of these figures rupees have been uniformly converted into pound sterling at the rate of R15 to the pound.

It will be seen that out of a total debt of £282·7 millions, at the end of March 1917, only £3 millions represented ordinary or unproductive debt. The annual interest on the latter was about £½ millio only, and on the productive debt about £9½ millions, so that the total interest charges amounted to some £9 millions.

At the end of 1916-17, R1,320 millions of the debt bore interest at 3½ per cent, R72·7 millions at 3 per cent, R214·6 millions at 4 per cent. R10 millions at 4½ per cent, and R11 millions at 5 per cent. The tot interest charge on the rupee debt at the end of 1916-17 was R5,74,23,729 and on the sterling debt £5,647,49

Of the rupee debt it is estimated that including R86·1 millions held in London, R763·8 millions were hel by Europeans at the end of 1916 and R855·7 millions by Indians, the holdings by Indians being 53 per cer of the whole debt. It should be noted, however, that the invested currency reserve is included in the sum hel by Europeans.

REGISTERED DEBT*

No. 28.—ABSTRACT STATEMENT—AMOUNT of the RUPEE and STERLING DEBT and of the INTEREST thereon; annual INCREASE or REDUCTION of the DEBT; and the PROPORTION of the RUPEE DEBT held in LONDON, from 1820-21 to 1916-17

NOTE.—The figures are taken from the annual Finance and Revenue Accounts of the Government of India, but the method of distribution of the total debt and of the interest thereon between "Ordinary Debt" and "Debt incurred for Railways and Irrigation Works" has not been uniform and has been materially altered from the year 1906-07.

(a) Excludes £4,105 for miscellaneous Public improvements.

(b) The figures of rupee debt from 1899-1900 onwards are converted at the rate of £1=₹15 in consequence of the introduction of the Gold Exchange standard in India in that year. The figures for years prior to 1899-1900 were converted at the rate of £1=₹10. It is necessary to remember this in order to avoid introducing superficially confusing results.

REGISTERED DEBT

No. 30.—*DETAILED STATEMENT.—REGISTERED DEBT in INDIA and in ENGLAND at the close of each year from 1897-98 to 1916-17, also the annual amount of INTEREST payable thereon*

(a) Includes Paper Currency Reserve.

(b) This decrease in the holdings by Europeans and the corresponding increase in the holdings by Indians are due to the rectification of a loose and erroneous classification in the Public Debt Office where, until 1897-98, notes presented for payment of interest by the Banks were treated as held by the Europeans though the owners were often Indians.

(c) Includes Rs 3,61,29,500 on account of four per cent Terminable Loan of 1915-16 particulars of which are not available.

REGISTERED DEBT

respectively prepared on the basis of the INTEREST paid on each LOAN at all the TREASURIES throughout December of each year from 1897 to 1916

Until 1866 the average amount outstanding annually varied between R6·4 crores and R7·9 crores, but in that year it rose suddenly to R11·9 crores and reached R16·9 crores in 1870. From 1871 it again declined, and, until 1878, it stood between R13 crores and R14·8 crores. There was then a rapid increase to R16·9 crores in 1879 and to R19·2 crores in 1880. Then followed a slower rate of increase attended with fluctuations, which were dependent on fluctuations in the price of silver and in the conditions of the money market. Government promissory notes having become a regular form of remittance and re-transfer by the exchange banks. The amount outstanding rose to R21·2 crores in 1882 and declined again to about R19·2 crores in 1887, rising again in 1889 to R21·8 crores. Then followed another period of very rapid increase, largely induced by speculative influences. In 1891, 1892, and again in 1896 the average amount outstanding was over R26 crores. In the following year it fell to R23 crores, and from 1898 to 1902 it fluctuated between R20 crores and R22 crores. Since 1902 there has been more or less a steady decline. From R18 crores in 1903 it receded in 1908 to R14·9 crores. It slightly recovered and rose to nearly R15½ crores in 1909, but again fell to R14·4 crores in 1910. There has been a gradual decline since, and in 1917 the figure receded to about R8 crores, this being the lowest figure touched since 1865.

SECURITIES ENFACED FOR PAYMENT OF INTEREST IN LONDON *

No. 41.—*AMOUNT (in rupees) of GOVERNMENT PROMISSORY NOTES ENFACED for PAYMENT OF INTEREST in LONDON at the end of each month from 1898 to 1917*

DRAWINGS OF THE HOME GOVERNMENT

[FOR TABLES, SEE PAGES 70 to 77]

The practice of drawing funds from India to meet the home charges by means of bills of exchange on India was inherited by the India Office from the East India Company. The present procedure is as follows :—On each Wednesday a notice is exhibited at the Bank of England inviting tenders, to be submitted on the following Wednesday, for bills of exchange and telegraphic transfers on Indian Government authorities at Calcutta, Madras, and Bombay. The notice states a limit which the aggregate amounts will not exceed. The Secretary of State does not bind himself to allot the whole amount mentioned in the notice, and as a matter of practice does not accept applications at prices lower than 1s. $3\frac{2}{3}\frac{1}{2}$ d. per rupee for bills and 1s. $3\frac{1}{2}\frac{1}{2}$ d. for transfers. The price charged for telegraphic transfers is ordinarily higher by $\frac{1}{3}\frac{1}{2}$ d. per rupee than that charged for bills, but when the Calcutta or Bombay Bank rate exceeds 8 per cent, tenders for transfers rank for allotment with tenders for bills only if they are $\frac{1}{3}\frac{1}{2}$ d. higher. Allotment is made to the highest bidders, and when the total amount tendered exceeds the amount offered allotment is made *pro rata*. When the tenders received on a Wednesday have been dealt with, the amount to be offered for tender on the following Wednesday is decided upon, the main considerations being the requirements of the India Office and the strength of the demand. “Intermediate” or “special” bills and transfers can be obtained on other days of the week at a price fixed by the India Office at not less than $\frac{1}{3}\frac{1}{2}$ d. higher than the lowest prices at which allotments have been made on the preceding Wednesday, the exact rate and the maximum amount of such “intermediates” being fixed for the week each Wednesday. The arrangements made each Wednesday are laid before the next meeting of the Finance Committee of Council, usually on the same day, and subsequently before the Council itself, for approval.

Up to the time of the closing of the mints to silver in 1893, this weekly auction of Council drafts was nothing more than a simple and effective means of laying down in London the funds required by the Secretary of State for home charges at as favourable a rate as possible. In times of active trade the Secretary of State sometimes took advantage of a favourable rate of exchange to bring over from India rather more than was needed to meet his immediate requirements, to the mutual advantage of the Indian revenues and of trade. But the system existed simply as a means of remitting to London so much of the Government balances as it was desirable to make available in London.

With the closing of the mints to silver in 1893, the system of sales of Council drafts assumed new importance, and has been gradually extended in more than one direction. It was by a temporary cessation of the sale of Council drafts that the authorities first tried to force the exchange value of the rupee up to 1s. 4d. Then, when the rupee finally reached 1s. 4d. in 1898, under Act, II of 1898, Council drafts were sold against gold set aside at the Bank of England as a part of the Indian Paper Currency Reserve, and paid for in India out of notes issued against such gold. The object of this action was no longer simply to lay down funds in London for the Secretary of State’s home charges, but so to alter the location and disposition of the general resources of the Government of India as to provide a means in a time of great stringency for quickly expanding the currency as an alternative to the shipment of sovereigns to India on private account, when the Government of India had no surplus Treasury balances with which to meet Council drafts.

Finally in 1909 and 1910, when the exchange crisis of 1907-08 was over, Council drafts were sold freely in order to obtain sterling in London in place of the large quantities of rupees which had accumulated in the Gold Standard Reserve in India through the sale by the Indian Government of bills on London during the crisis, these Council drafts being sold not to provide funds for home charges, but to bring back to London the Gold Standard Reserve Fund; and it is by means of sales of Council drafts that the profits on the mintage of rupees, which necessarily first take the form of rupees, are converted into sterling in London, the rupees which represent the profits being issued in India to meet the Council drafts sold in London.

On rare occasions sterling bills on the Secretary of State are drawn and sold by the Government of India for support of exchange. These bills are paid by the India Office in London. During the exchange crisis of 1907-08 the Government of India had occasion to sell such bills which were paid by the India Office. The amounts were £8,035,000 in 1908-09 and £156,000 in 1909-10. Occasion again arose to sell sterling bills after the outbreak of war, the amounts being £8,707,000 in 1914-15 and £4,893,000 in 1915-16.

The tables in this section state the sterling amounts of the annual drawings of the Secretary of State on Calcutta, Bombay, and Madras (the three centres on which Council bills are drawn), and the total sum, with the highest, lowest, and average rate of exchange at which the bills and telegraphic transfers were sold, for each of the three cities. The tables also state the sums borrowed in England annually, and the payments of railway capital into the Home Treasury, less the withdrawals of such capital for each year. The largest proportion of the drawings has generally been on Calcutta. In 1912-13, the percentages were Calcutta 51 and Bombay 33; in 1913-14, 42 and 41, in 1914-15, 37 and 42; in 1915-16, 38 and 39; and in 1916-17, 35 and 45 respectively.

Since 1871-72 the aggregate sterling amount of Council bills and telegraphic transfers, and the sums borrowed in sterling, have been as stated in the margin.			
	Bills drawn on India.	Amount borrowed in England.	
	£	£	
Five years 1871-72 to 1875-76	60,766,339	8,728,002	The increased drawings of the Council bills and telegraphic transfers since 1901-02 were due primarily to the great trade demand for remittance to finance the export trade of India, which developed very largely, and Council drafts were sold freely so as to supply this demand as fully as possible. The surplus proceeds of the sales, in excess of the Secretary of State's requirements on revenue account (i.e., Home charges proper), were applied partly to the purchase of silver for coinage, partly to strengthening the cash balances of the Home Treasury, and partly to defraying capital outlay required for railway construction. The amount of drawings reached the record figure of £33,432,196 in 1906-07. In 1914-15 the amount fell very low to £7,748,111, but in 1916-17 it rose to £32,998,095 and almost reached the record of 1906-07.

(a) Includes amount drawn against the Gold Reserve Fund, Rs. 2,90,86,395 = £1,939,093 in 1901-02, Rs. 39,45,000 = £263,000 in 1902-03, Rs. 3,30,00,000 = £2,200,000 in 1903-04 and Rs. 1,05,05,940 = £700,396 in 1904-05

(b) Includes amount drawn against the Gold Reserve Fund and Paper Currency Reserve, Rs. 7,31,45,000 = £4,876,333 in 1905-06

(c) Includes amount drawn against Gold Standard Reserve, Rs. 78,94,856 = £526,324 in 1907-08, Rs. 2,23,72,303 = £1,491,437 in 1908-09, Rs. 2,98,25,000 = £1,988,333 in 1911-12, Rs. 3,22,50,000 = £2,150,000 in 1913-14 and Rs. 90,00,000 = £600,000 in 1914-15

(d) Includes amount drawn against Gold Standard Reserve and Paper Currency Reserve, Rs. 13,63,50,000 = £9,090,000 in 1909-10, Rs. 4,71,75,000 = £3,145,000 in 1910-11, Rs. 23,53,49,000 = £15,723,000 in 1915-16 and Rs. 34,93,37,000 = £23,239,000 in 1916-17

WAYS AND MEANS OF THE HOME GOVERNMENT

[FOR TABLES, SEE PAGES 80 TO 84]

In the early years of the period for which figures are given in table No. 50, the disbursements in London of the East India Company were met not only by the sale of bills but, to a considerable extent, by the realisation of commercial assets and by repayments of advances made on goods in India and China. These "ways and means" gradually declined and became extinct about 1850. Thereafter the Government was financed in England mainly by means of Council bills, supplemented by borrowing, by deposits made by railway companies against expenditure in India, and by occasional resort to remittances in gold or silver from India. There was no remittance of silver between 1871-72 and 1914-15. In 1915-16 silver was again remitted to the amount of £100,000 and in 1916-17 to the amount of about £67,000. No gold was remitted between 1880-81 and 1899-1900; in 1900-01 a remittance of gold was made to the amount of nearly £4,000,000. The subsequent remittances of gold have been as follows; about a million in 1901-02, nearly half a million in 1902-03, about £4 millions in each of the years 1903-04 and 1904-05, nearly 1½ millions in 1905-06, a quarter of a million each in 1906-07 and 1908-09, a third of a million in 1912-13, about half a million each in 1913-14 and 1914-15, and £2 millions in 1915-16. There was no remittance of gold in 1916-17. Since the outbreak of war large amounts have been received in England in repayment of advances made by the War Office in respect of expenditure incurred in India in connexion with expeditionary forces and other war services. The amounts so received were £9 millions in 1914-15, £16 millions in 1915-16, and £39 millions in 1916-17.

In the ten years from 1907-08 to 1916-17 the disbursements amounted to over £520 millions, and, on the other side, Council bills represented £229 millions and borrowings £77 millions, both items totalling £306 millions.

* Compiled from the Home Accounts of the Government of India

† These disbursements include, besides ordinary expenditure, the amount of debt discharged, deposits and advances including investments on account of the Gold Standard and Paper Currency Reserves, and remittances on account of India including payments on account of silver purchased for India and of Bills of Exchange and Telegraphic Transfers on London sold in India. A reference to the next table should be made in this connection

(a) Includes £2,000,000, being an advance from His Majesty's Treasury under the Indian Advance Act, 1879

and the WAYS and MEANS by which they were met (in pounds sterling)

DISBURSEMENTS WERE MET										
ON ACCOUNT OF INDIA			Borrowed in England	Sale of stock in the public funds	Gold Standard Reserve : Net sale proceeds of gold received from India, and dividends on invest- ments	Paper currency reserve	Release of gold held in England as a reserve to secure the pay- ment of currency notes issued in India	Total receipts, excluding miscellane- ous receipts	Cash balance at end of the year	
Remitted from India in silver	Deposits by Railway Companies in excess of withdrawals	Total remittances

(a) Invested in British funds and Treasury bills

(b) Includes £4,911,621 on account of redemption of annuity, etc., of the Sindh, Punjab, and Delhi Railways

(c) Includes £1,333,333 invested in Consols and Exchequer Bonds and £1,045,000 representing the transfer of gold at the Bank of England

PRICES OF GOLD, SILVER, AND STOCKS, AND RATES OF EXCHANGE

[FOR TABLES, SEE PAGES 86 TO 108]

Table No. 52 is a record, from the year 1835, of the minimum and maximum prices of standard silver in London during each month, the yearly value of silver coined in England, the imports and exports of silver into and from England, and the annual sum of Council Bills and the Bank of England average rate of discount.

Table No. 53 shows the prices of standard silver in London and of bar gold in India, ruling at or about the close of each fortnight; also the relative values of the two metals in London and India. The mint price in London of Gold $\frac{11}{16}$ fine is £3-17-10½ per ounce troy, but as standard silver, is $\frac{3}{4}$ fine, the comparative value per ounce of gold $\frac{3}{4}$ fine or £3-18-7 is divided by the market price of an ounce of standard silver, and thus the relative value of the two metals is obtained. In India up till June 1893, when the mints were closed to the coinage of silver for the public, the comparison was made between the price of a tola of bar gold and the rupee which itself weighs one tola (180 grains) and contains 165 grains of pure silver. Thus the rupee price of a tola of gold was multiplied by a fraction of which 165 was the numerator and the denominator the number of grains of pure gold per tola of bar gold, that is to say 179.1 up to the close of 1887, when the touch of the bar gold was 99½, and 180 from January 1888, from which month prices were quoted for gold of 100 touch. From the latter half of June 1893, when the mints were closed, the relative values in India have been calculated on the market prices of the two metals at Bombay, excluding the import duty levied on silver (5 per cent from 10th March 1894 to 24th February 1910 and 4 annas per ounce from 25th February 1910).

Table No. 54 shows the course of the prices of silver in London since January, 1898, the figures representing the average for each half month, and the variations are worked out on the basis of the price of silver on the 1st June, 1893, the month in which the mints were closed.

Table No. 55 shows the course of the rates of exchange in Calcutta since January, 1898, the figures representing the average for each half month, and the variations are also worked out on the basis of the rate of exchange on the 1st June, 1893, being taken as 100.

Table No. 56 shows from the year 1898, the course of exchange on London, the Bank of England rate of discount, and the Bank of Bengal rate of interest.

Table No. 57 shows, from the year 1898, the price of sovereigns (British and Australian) and the price per tola of uncoined gold (China leaf of 100 touch) in India.

Table No. 58 records the course of the price of bar silver in Bombay, inclusive of import duty, from 1897-98.

Table No. 59 records the course of the rate of exchange between India and China, from 1897-98.

Table No. 60 shows the price of Government Securities in Calcutta; table No. 61 of India Stock in London, and table No. 62 of Enfaced Rupee Paper in London.

* The exact amount is £3-18-6-99, but for convenience £3-18-7 has been adopted. It represents the equivalent of gold $\frac{5}{16}$ fine (the silver standard) derived from the mint price of £3-17-10½ per ounce for gold $\frac{1}{16}$ fine (the gold standard).

NOTE.—On the 26th June 1893 the mints were closed to the coinage of silver for the public and from that date the relative value of gold and silver in India ceased to be derivable from the rupee price of gold.

(a) From January 1888 the figures represent the price of bar gold of 100 touch at or about the close of each fortnight, as given in the "Current Quotations," published by the Chamber of Commerce, Bombay. Previously, the touch was 99½.

PRICE of BAR GOLD in INDIA and RELATIVE VALUE of GOLD to SILVER in INDIA from 1865 to 1917

MILITARY SERVICES

[FOR TABLE, SEE PAGE 110.]

The table on Military Services shows the detailed items of military receipts and expenditure of the Government of India, both in England and in India, for the last five years. The statistics do not take into account the expenditure on military operations, which is treated as extraordinary expenditure and met from the excess of ordinary revenues over ordinary outlay.

Military receipts on an average amount to £1½ million. They represent about 1·4 per cent of the total revenue of the Government of India. They are derived from army, marine, and military works, and are distributed between India and England in the proportion of 4 to 1. Army receipts are derived from dairy farms, the sale proceeds of surplus stores, unserviceable animals, carts, etc., the capitation rate payable by the Imperial Government in respect of Indian troops lent for service in the colonies, contributions and subscriptions towards the Indian Military Service Family Pensions, and contributions by the Imperial Government in respect of cost of transport of troops and military charges for Aden. Marine receipts are derived from dockyard services and supplies, hire of vessels, and sale-proceeds of vessels and stores. Receipts on account of military works are derived mainly from rent of buildings, etc.

The gross military expenditure averages about £23 millions, and is 27 per cent of the total expenditure of the Government of India. The amount spent in India is over R26 crores (over £17 millions) and that in England over £5 millions, the ratio being 78 and 22 per cent, respectively. The charges are shown under the heads of (1) effective, (2) non-effective, (3) marine, (4) military works, and (5) special defence works, the proportions

Effective	78·3 per cent.
Non-effective : . .	14·0 "
Marine	2·5 "
Military works . .	4·6 "
Special Defence works	0·1 "

being as stated in the margin. The effective expenditure represents the cost of maintaining the standing army, and averages about R27 crores (£18 millions). One of the most important items of army charges in England is the payment made to the Home Government to cover the cost of recruiting and training,

and of other services connected with the maintenance of the British establishment in India. The chief items of effective charges are stated in the margin. The other items of

	R(crores.)
Regimental pay, allowances and charges (including volunteers)	12
Supply and Transport (including farms)	3
Ordnance Establishment, Supplies and Services	1
Stores for India (supplied from England)	1·4

effective charges are—administration, accounts, veterinary services, army clothing, remount establishments, medical services and stores, ecclesiastical, education, compensation for dearness of food and forage, hutting, conveyance, cantonments and miscellaneous.

The non-effective expenditure comprises charges for rewards and pensions. The total averages about R4,79 lakhs, R3,65 lakhs (£2·4 millions) or 76 per cent being spent in England and R1,14 lakhs or 24 per cent in India. The non-effective charges in England consist mainly of pay and pensions of non-effective and retired officers of the Indian Service and payments to the War Office for retired pay, etc., of British forces for service in India.

The expenditure on marine charges has been R87 lakhs, namely, R45 lakhs or 52 per cent in India and R42 lakhs (£277,000) or 48 per cent in England. The chief items of marine charges are the maintenance of the "Royal Indian Marine," the contribution made by the Government of India towards the expenses of His Majesty's ships employed in the Indian seas, and stores.

The expenditure on military works in recent years has averaged R1·58 crores. Military works consist of new buildings and repairs for accommodation of troops, general cantonment works, and defence and other works.

The net expenditure of the Government of India on Military Services, both in India and in England, in the last five years has averaged about £21·5 millions or R32·3 crores annually. The figure for 1916-17 is £25·4 millions.

*Compiled from the Finance and Revenue Accounts of the Government of India

BANKS

[FOR TABLES, SEE PAGES 114 TO 117.]

Banks in India may be classified into (1) the Presidency Banks, *i.e.*, the Bank of Bengal, the Bank of Bombay, and the Bank of Madras; (2) the Exchange Banks, whose head offices are located outside India, (these Exchange Banks may be sub-divided into 2 classes, *viz.*, those which do a considerable portion of their business in India, such as the National Bank of India (1863), the Chartered Bank of India, Australia, and China (1853), and several others; and those banks which are merely agencies of large banking corporations doing business all over Asia, such as the International Banking Corporation, the Russo-Asiatic Bank, the Yokohama Specie Bank, and others); (3) the Indian Joint-Stock Banks registered under the Indian Companies Act, whose head offices are located in India; and (4) private and unincorporated bankers or money-lenders. Statistics relating to this last class (private and unincorporated bankers) are not generally available.

The total amounts of capital, reserve, deposits, and balances of the different classes of banks on 31st December, 1916, are compared in the table below with those on the corresponding date ten years ago :—

Class of Banks	CAPITAL AND RESERVE			DEPOSITS			CASH BALANCES		
	1906 R (lakhs)	1916 R (lakhs)	Increase per cent	1906 R (lakhs)	1916 R (lakhs)	Increase per cent	1906 R (lakhs)	1916 R (lakhs)	Increase per cent
Presidency Banks	6,40	7,36	15	30,53	49,91	63	10,95	17,27	58
Exchange Banks*	36,43	56,90	56	18,09	38,04	110	5,11	10,14	98
Indian Joint-Stock Banks above R5 lakhs	1,90	4,61	1,43	11,55	24,71	114	1,50	6,03	302

The Presidency Banks.—The Bank of Bengal was opened in 1806, and obtained its charter in 1809. Its capital was then £500,000, of which the State contributed £100,000. The capital was from time to time increased, and now stands at £2,200,000, of which £220,000 belong to Government. Up to 1854 the Secretary was, with one exception, a member of the Civil Service. Thus constituted, the Bank of Bengal has well answered its object. It has proved a useful auxiliary to the State and to the mercantile community, and in seasons of difficulty has often afforded substantial assistance and valuable support to the Exchequer. The Presidency Bank of Madras was incorporated by Act, IX of 1843, superseding an already existing State Bank. It also has proved, though on a much smaller scale, a useful institution. The Bank of Bombay was first constituted by Act, III of 1840, but it came to a disastrous ending. As is now matter of history, it suffered severe losses in the wild and excited speculation which followed on the American War, and the rise in the price of cotton; and in 1868 it was voluntarily wound up. The new Bank of Bombay, Limited, rose upon its ruins, being constituted by Articles of Association under the Indian Companies Act of 1866. A Commission was appointed by the Government of India to enquire into the causes of failure of the Bombay Bank, and in 1869 this Commission furnished an elaborate report of the results of the investigation.†

Table 64 shows that at the end of 1916 the paid-up capital of the three Presidency Banks was the same as in the pre-war year 1913. The reserve and rest in the same period decreased, while deposits and cash balances increased. Total capital and reserves decreased from R7,48 lakhs to R7,36 lakhs or by 2 per cent; private deposits increased from R36,48 lakhs to R44,71 lakhs or by 23 per cent; and cash balances from R15,38 lakhs to R17,27 lakhs or by 12 per cent. Detailed returns for each of the three Presidency Banks will be found in tables 68, 69 and 70. The following table shows from the pre-war year the public and private deposits, and the cash balances of the Bank of Bengal, the Bank of Bombay, and the Bank of Madras :—

31st December	BANK OF BENGAL			BANK OF BOMBAY			BANK OF MADRAS		
	DEPOSITS		Cash Balances	DEPOSITS		Cash Balances	DEPOSITS		Cash Balances
	Govern- ment (Public)	Private		Govern- ment (Public)	Private		Govern- ment (Public)	Private	
	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)	R (lakhs)
1913 (pre-war year)	3,01	18,25	8,41	2,01	10,18	4,78	87	8,06	2,19
1914	2,87	21,61	11,70	1,83	10,82	6,47	91	7,62	2,67
1915	2,65	19,79	7,85	1,36	10,79	4,24	87	8,03	2,56
1916	2,74	21,44	7,73	1,42	13,67	6,68	1,04	9,60	2,87

As compared with the pre-war year, private deposits increased by 17 per cent in the case of the Bank of Bengal, 19 per cent in the case of the Bank of Madras, and 34 per cent in the case of the Bank of Bombay. Cash balances showed an increase of 40 per cent in the case of the Bank of Bombay and 31 per cent in the case of the Bank of Madras, but a decrease of 8 per cent in the case of the Bank of Bengal.

In 1916 the deposits of the Presidency Banks were R49,91 lakhs or £33 millions, as compared with R38,04 lakhs or £25 millions in the case of ten Exchange Banks, and R25,72 lakhs or £17 millions in the case of forty-eight Indian Joint-Stock Banks. In 1916, therefore, the ratio per cent of the total deposits of the three classes of banks was 44, 33, and 23, respectively. To some extent, it should be noted, the Presidency Banks are bankers' banks. A portion, therefore, of the balances of Exchange Banks on deposit with the Presidency Banks is looked on as cash by the depositing banks. On the average of the five years ending 1916, the cash balances in India of Exchange Banks (in their own branches and with the Presidency Banks) amounted, to 48 per cent of the

* In the case of Exchange Banks deposits and cash balances in India only have been taken into account in this statement.

† Supplement to the *Gazette of India*, 25th December 1875, page 1058. Cf. the *Gazette of India*, 1st January 1876, page 14.

total cash balances of the Presidency Banks. The proportion of Government deposits to the capital, reserve, and Government and private deposits in the three Presidency Banks at the end of 1914, 1915, and 1916, as compared with the proportion at the end of the pre-war year, was as follows :—

31st December	Capital	Reserves	Government Deposits	Other Deposits	PROPORTION PER CENT OF GOVERNMENT DEPOSITS (COLUMN 3) TO	
					Total of columns 1 to 4	Column 4
	1	2	3	4	5	6
	R (1,000)	R (1,000)	R (1,000)	R (1,000)	per cent	per cent
1913 (pre-war year)	3,75,00	3,73,07	5,88,66	36,48,50	11.8	16.1
1914	3,75,00	3,89,17	5,61,52	40,04,08	10.5	14.0
1915	3,75,00	3,72,50	4,88,67	38,61,19	9.6	12.7
1916	3,75,00	3,60,99	5,20,58	44,70,87	9.1	11.6

The Exchange Banks.—Next in point of importance come the Exchange Banks which play an important part in the financing of Indian trade. These are all banks with Head Offices out of India. Several of these banks were founded 60 years ago. Of the ten banks, five do a considerable portion of their business in India e.g., the Chartered Bank of India, Australia, and China, the National Bank, etc., while others are merely agencies of large banking concerns doing business all over Asia, e.g., the Hongkong and Shanghai Banking Corporation, the International Banking Corporation, the Yokohama Specie Bank, etc. The Delhi and London Bank, it may be noted, has recently been amalgamated with the Alliance Bank of Simla. The business of these banks may be divided into (a) exchange business, and (b) ordinary banking business.

The aggregate paid-up capital and reserves of the ten Exchange Banks amounted to £38 millions, while the deposits in India were £25 millions, and cash balances in India approximately £7 millions. As compared with the pre-war year, the capital and reserves of these banks remained practically the same, but their deposits and cash balances increased by 23 per cent and 72 per cent, respectively, as will be seen from the following table :—

	Capital and reserves £ (1,000)	Deposits in India £ (1,000)	Cash balances in India £ (1,000)
1913	37,825	20,690	3,922
1914	36,972	20,098	5,596
1915	36,793	22,364	5,068
1916*	37,931	25,359	6,760

Indian Joint-Stock Banks.—The third class of Banks comprise the Joint-Stock Banks registered under the Indian Companies Act and have their head offices in India. These are chiefly scattered throughout the north-west of India, especially in the Punjab and the United Provinces. With the exception of the Allahabad Bank (established in 1865) and the Alliance Bank of Simla (established in 1874), most of these banks are of comparatively recent date or have recently been reconstructed. In the tables in this volume these banks are sub-divided into two classes, namely, (a) those with paid-up capital and reserve of R5 lakhs and over, and (b) those with capital and reserve between one lakh and less than R5 lakhs. The bank failures of 1913, 1914, 1915, and 1916, were confined to Indian Joint-Stock banks, and the total paid up capital of the banks that failed amounted to 45 per cent of the total paid up capital of Indian Joint-Stock banks.

Indian Joint-Stock Banks are dealt with in table 66. There are 68 Indian Joint-Stock Banks with 160 branches. Of these, 48 banks (with 149 branches) have a capital of over R one lakh. The aggregate capital and reserves of these 48 banks amounted to R5,24 lakhs, the deposits to R25,72 lakhs, and cash balances to R6,20 lakhs. The banks, as already noted, are divided into (a) banks with a capital of R5 lakhs and above, and (b) banks with a capital between one lakh and less than five lakhs of rupees. The figures in 1916 were :—

	Class I (20 banks)	Class II (28 banks)
	R (lakhs)	R (lakhs)
Capital and Reserves	4,61	63
Deposits	24,71	1,01
Cash balances	6,03	17

As compared† with the pre-war year, the capital and reserves of banks in group I increased by 27 per cent, the deposits by 9 per cent, and the cash balances by 50 per cent, as shown below :—

	Capital and reserves R (lakhs)	Deposits R (lakhs)	Cash balances R (lakhs)
1913	3,64	22,59	4,00
1914	3,93	17,11	3,53
1915	4,38	17,87	3,99
1916	4,61	24,71	6,03

Banks in group II, it may be noted, increased their capital and reserves by 25 per cent, but their deposits and cash balances decreased by 33 per cent each.

Other Banks.—In addition to these banks are the Post Office Savings Banks with over a million and a half depositors and over R16½ crores or £11 million sterling on deposit. The deposits are treated as unfunded debt, and no reserve is, of course, kept against these deposits. The detailed statistics relating to these banks will be found in table 72 on page 119. There are also co-operative credit banks which are not at present of much importance in the banking system, as the capital and reserves in 1915-16, were only R2½ crores, and the deposits (including loans held by the banks) R7¾ crores.

* Excluding the Delhi and London Bank which was amalgamated with the Alliance Bank of Simla, Ltd.
† The comparison is between the figures as reported in each year and does not refer to the same number of banks

There are many private and unincorporated bankers or money-lenders. Statistics for this class are not available.

The business of banks in India is confined to two of the three chief functions of banks. The banks lend or discount and also hold deposits. The third function of banks—the issuing of bank notes—was withdrawn in 1862 when Government withdrew from banks the right to issue notes.

Proportion per cent of cash to liabilities on deposits.—As will be seen from table 67 cash balances at the end of 1916 were 35 per cent of the liabilities on deposits in the case of the Presidency Banks, 25 per cent in the case of Exchange Banks doing a considerable portion of their business in India, and 35 per cent in the case of those Banks doing business all over Asia. The percentage for Indian Joint-Stock Banks is 24 in the case of banks with capital and reserve over Rs 5 lakhs, and 17 in the case of banks with capital and reserve between one lakh and less than five lakhs of rupees. It will be noticed that in December, 1914, four months after the outbreak of war, the cash balances were above normal, and the percentage held by Indian Joint-Stock Banks was higher than in pre-war years. Since the bank failures of 1913, the increase in the proportion per cent of cash to liabilities on deposits in banks (except in the Presidency Banks where the proportion is almost the same) is especially noticeable.

Bank failures.—With few exceptions the failures were confined to the pigmy banks. From 43 in 1914 the number of failures fell to 13 in 1916, five of which were in the Bombay Presidency.

Year	Number of banks liquidated	CAPITAL		
		Autho- rised	Subscribed	Paid-up
		R (1,000)	R(1,000)	R(1,000)
1913 (two months)	12	2,74,00	1,64,56	35,13
1914	48	7,10,50	2,45,61	1,09,12
1915	11	56,50	7,91	4,60
1916	13	2,30,90	20,90	4,23

The paid-up capital of the banks which failed in 1916 was Rs 4,23,000, the subscribed capital Rs 20,90,000, and the authorised capital Rs 2,30,90,000.

Bank rates.—The Presidency Bank rates during 1916 reached a maximum of 8 per cent in January in all the three Banks and again in November in the case of the Banks of Bengal and Bombay and in December in the case of the Bank of Madras. The difference between the maximum and minimum rates in the last four years was as follows :—

	1913	1914	1915	1916
Bank of Bengal	5	4	1	3
Bank of Bombay	4	3	1	4
Bank of Madras	2	3	2	2

The maximum and minimum rates during the last four years were as follows :—

	1913 (Pre-war year)		1914		1915		1916	
	Maxi- mum	Mini- mum	Maxi- mum	Mini- mum	Maxi- mum	Mini- mum	Maxi- mum	Mini- mum
	per cent	per cent	per cent	per cent	per cent	per cent	per cent	per cent
Bank of Bengal	8	3	7	3	6	5	8	5
Bank of Bombay	7	3	6	3	6	5	8	4
Bank of Madras	7	5	7	4	7	5	8	6

Clearing House returns.—The returns of the cheques cleared from the Clearing Houses in the five chief ports during 1916 show a remarkable rise. The clearings reached in fact, a record figure, except in Rangoon.

Cheques cleared from Clearing Houses.

	Pre-war year (1913)	1915	1916
	R (lakhs)	R (lakhs)	R (lakhs)
Calcutta	3,33,02	3,22,67	4,80,17
Bombay	2,19,30	1,66,88	2,40,51
Madras	23,56	19,22	24,95
Karachi	12,49	13,66	15,03
Rangoon	61,98	40,69	48,53
TOTAL	6,50,35	5,63,12	8,09,19

There was, in 1916, an increase in the total of 44 per cent, as against the previous year, and of 24 per cent, as against the pre-war year. These figures are of more than ordinary interest since they indicate the growth of transactions which result from the daily transfer throughout the year of a huge amount of credit from one party to another. It need hardly be said that behind each of these cheques is the right to demand legal tender from the bank on which it is drawn, and this means that prudent bankers have to make an allowance for cash demands involved in this creation of credit.

POST OFFICE SAVINGS BANKS

[FOR TABLE, SEE PAGE 119]

Until 1882-83 the savings bank business conducted under Government control was carried on in the three cities of Calcutta, Madras and Bombay by the Presidency Banks, and elsewhere by the Government treasuries. So long as this system was maintained, the business grew but slowly. The highest balances in the district treasuries never exceeded R75 lakhs (in 1884-85), and in the Presidency Banks the highest balances (in 1882-83) amounted only to R2,36 lakhs. In 1886-87 the Savings Banks in the district treasuries were closed. The Presidency savings banks were maintained until 1895-96, although the deposits in them gradually declined in consequence of the preference given to the post office by the public, and now the whole of the savings bank business of Government is a branch of the postal administration. The establishment of savings banks in the post offices was followed by a rapid change. In the first year of their existence the balances were only R27 lakhs, but the public soon indicated their preference for business with the post office. By 1886-87 when the savings banks in the district treasuries were closed, the balances in the post offices amounted to R4 crores. During the succeeding years there was a considerable increase, although the Government took steps to prevent it from being inconveniently rapid. For this purpose in 1889-90 the maximum sum receivable was reduced from R3,000 to R2,000, and in 1894-95 the rate of interest was reduced from $3\frac{3}{4}$ per cent to $3\frac{1}{8}$ per cent in correspondence with the reduction in the rate of interest on Government securities. In 1893-94 the balances amounted to R9 crores : ten years later, in 1902-03, they reached R11 crores. In 1913-14 the balance of deposits, inclusive of interest, amounted to R23 crores, or £15 million. On the 1st April 1914, however the maximum amount receivable for deposit was raised from R2,000 to R5,000. The amount of Savings Bank deposits it was expected, would increase by these measures, but owing to heavy withdrawals due to the outbreak of war the balance of deposit in 1914-15 fell to R15 crores, or £10 million, a decrease of 35 per cent over 1913-14. In 1915-16 the balance showed a slight increase (3 per cent) to R15½ crores, or £10½ million, and in 1916-17 it rose further to over R16½ crores, or £11 million, showing an increase of 8 per cent.

The amount of interest accrued in 1916-17 was about R45½ lakhs, as against R43 lakhs in the previous year. The rate of interest allowed on accounts has been as follows : $3\frac{3}{4}$ per cent from 1867-68 ; $4\frac{1}{8}$ per cent from the 1st January 1880 to the 31st May 1881 ; $3\frac{3}{4}$ per cent until the end of 1893-94 ; $3\frac{1}{8}$ per cent from April 1894 to June 1905. From July 1905 depositors were allowed to deposit money either at call or subject to six months' notice of withdrawal, and the interest on deposits at call was reduced from $3\frac{1}{8}$ per cent to 3 per cent, while interest at the rate of $3\frac{1}{4}$ per cent was given on deposits that were held subject to six months' notice of withdrawal. Since 1st January 1911, the system of deposits subject to six months' notice of withdrawal has been abolished.

The total number of depositors has increased greatly in the last ten years ending 1916-17, but the average balance per depositor has decreased. In 1906-07 the total number of depositors was 1,190,000 and the average balance per depositor was R124 ; while in 1916-17 the number was 1,647,000 and the average balance R100, thus showing an increase of 38·4 per cent in the number, but a decrease of 19·3 per cent in the case of the average balance. The total number of active accounts was 1,660,424 at the end of the year 1915-16, and 1,647,419 in 1916-17, representing a decrease of ·8 per cent.

As in the United Kingdom, Government do not maintain any specific reserve against these deposits, these being treated as unfunded debt and used for capital expenditure.

* Compiled from the annual report on the Post Office of India

NOTE.— The Savings Bank business of the district treasuries was transferred to the Post Office in 1886-87, and that of the Presidency Banks was closed in 1896-97, since which year the Savings Banks have been entirely managed by the Post Office

(a) Beginning with 1912-13 the distinction between European and Indian depositors has been discontinued. Information regarding the different classes of depositors is no longer maintained in the records of the Director-General, Posts and Telegraphs, as such information is of doubtful utility

CO-OPERATIVE SOCIETIES

[FOR TABLES, SEE PAGES 122 TO 128]

The Co-operative Credit Societies Act, X of 1904, was passed on the 25th March 1904 to "encourage thrift, self-help, and co-operation among agriculturists, artisans, and persons of limited means." In March 1912 this Act was repealed by the Co-operative Societies Act (II of 1912). There are two classes of societies distinguished as non-agricultural and agricultural: a *non-agricultural society* is defined as a society in which not less than four-fifths of the members shall be non-agriculturists, and an *agricultural society* is a society in which not less than four-fifths of the members shall be agriculturists. Each society consists of ten or more members above the age of eighteen years residing in the same town or village or in the same group of villages, or belonging to the same tribe, class, caste, or occupation.

The following table compares the position of registered societies in 1916-17 and in the four preceding years in India:—

	1912-13	1913-14	1914-15	1915-16	1916-17
Number of Societies—					
Central	251	329	397	605	757
Agricultural	11,382	14,538	16,016	18,051	21,070
Non-agricultural	691	806	914	1,019	1,209
TOTAL	12,324	15,673	17,327	19,675	23,036
Number of Members	573,536	744,226	824,469	918,436	1,045,425
Working Capital—	R	R	R	R	R
Share capital paid up	86,19,793	1,22,99,082	1,48,66,045	1,77,69,879	2,12,23,325
Loans and deposits held from—					
Members	93,54,645	1,18,58,857	1,21,46,359	67,37,579	79,00,585
Non-Members	1,33,62,788	1,98,35,727	2,36,03,257	3,35,33,561	3,88,37,126
Societies	1,93,61,345	2,86,28,195	3,17,43,533	26,19,874	32,29,597
Provincial Central Banks				3,31,27,925	4,01,72,550
Government	11,27,547	11,46,920	13,68,207	15,98,705	17,24,859
Reserve Fund	16,08,143	34,01,803	59,34,321	78,79,626	92,04,138
TOTAL	5,34,34,261	7,71,70,584	8,96,61,722	10,32,67,149	12,22,92,180

The statistics given above relate to all the provinces in British India except Delhi, the North-West Frontier Province, and British Baluchistan, where the co-operative movement has as yet made little progress. They also include the figures for the Native States of Mysore and Baroda. Many other States, such as Hyderabad, Travancore, Cochin, Gwalior, Indore, Patiala, have introduced co-operation among their subjects, but statistics for these States are not at present included in the statements.

The progress hitherto made in the co-operative movement has been exceedingly encouraging. The total number of societies at work at the end of the year 1916-17 was 23,036, the membership 1,045,425, and the working capital R12,22,92,180. Central societies numbered 757, had a membership of 84,141, and commanded a working capital of R4,79,60,181. Six of these societies were provincial banks, 256 central banks, and 495 unions. The number of non-agricultural societies was 1,209, with a membership of 176,708, and an aggregate working capital of R1,47,16,355. Of these, 943 were credit societies, 155 societies for purchase and sale, 4 societies for production, 75 societies for production and sale, and 32 societies for other forms of co-operation. The number of agricultural societies was 21,070; among these were 20,541 credit societies, 344 cattle insurance societies, one central re-insurance society, 39 societies for purchase and sale, 51 societies for production, 80 for production and sale, and 14 for other forms of co-operation. The membership of all classes of agricultural societies (including 324 societies affiliated to re-insurance societies) was 784,576, and they owned an aggregate working capital of R5,96,15,644.

During the last decade the number of societies of all classes rose from 1,357 to 23,036, the number of members from 149,160 to 1,045,425, and the total working capital from R44,14,086 to R12,22,92,180. The reserve fund during the period grew from R78,559 to R92,04,138, and the paid-up share capital from R9,35,928 to R2,12,23,325. State aid (R6,51,816) formed nearly 14·8 per cent of the working capital in 1907-08, while in 1916-17 the amount of loans and deposits held from Government—R17,24,859—formed only 1·4 per cent of the total capital.

The following tables show the position of agricultural societies (excluding cattle insurance and re-insurance societies) in each province and in the States of Mysore and Baroda at the end of 1916-17 :—

I—Number and Membership of Agricultural Societies

Province		CLASS OF SOCIETIES					Total number of societies	Number of members

NOTE.—In the case of Unions and Re-insurance Societies the number of members represents the number of affiliated societies and not the number of individual members included in such societies. The number of members of Insurance Societies is excluded from this table as these are not available.

LIFE ASSURANCE

[FOR TABLES, SEE PAGES 131 AND 132]

The history of Indian Life Assurance Companies can be traced as far back as 1829, when the Madras History Equitable Assurance Company was started in Madras. Forty-two years later, the Bombay Mutual Assurance commenced business in the year 1871. In Bengal, Life Assurance business does not appear to have begun until 1891, when the Hindu Provident Fund came into existence. It took, however, several years before the business began to become popular in this country and in 1906 a number of companies were established in different provinces. No reliable statistics regarding Indian Life Assurance Companies were available until the Indian Life Assurance Companies Act (VI of 1912) was passed for the regulation of Life Assurance Companies doing business in British India.

The tables (Nos. 76—78) show the statistics relating to Indian Life Assurance Companies, furnished by the Actuary to the Government of India. They deal with companies registered and working in India, and relate to the year ending on different dates for different companies between the 31st December and the 30th June. The number of companies dealt with is 44 in 1913-14, 42 in 1914-15, and 44 in 1915-16. These statistics exclude foreign companies, working in India, which comply with the provisions of the British Assurance Companies Act of 1909 and are partially exempt from the Indian Act of 1912. The tables also exclude companies and funds which have been granted complete exemption from compliance with the Act, namely, (a) Pension Funds connected with the Indian Government Services, (b) the many small societies which, on account of either the sum or the premium stated in their policies being under certain specified limits, are subject to the Indian Provident Insurance Societies Act, (c) certain pension and annuity funds, and (d) companies which are no longer issuing policies in India.

The total income shown in the Life Assurance Revenue Accounts of the companies dealt with in these statistics was over R1,37 lakhs in 1915-16, against R1,43 lakhs in 1914-15, and R1,42 lakhs in 1913-14. The sources from which the income was derived, and the proportion of the amount derived from each source in 1915-16, are noted below :—

	Income R	Proportion to total income
Premiums	1,05,00,000	77.2
Interests and rents, etc. (less tax)	28,66,000	20.9
Annuities and other items of receipts	2,69,000	1.9
Total	1,37,35,000	100

This income was disposed of as follows :—

	Payment R	Proportion to total payment
Claims by death	34,78,000	25.3
„ maturity	14,91,000	10.9
Surrenders	3,27,000	2.4
Annuities and pensions	1,07,000	.8
Bonus in cash and reduction of premium	1,49,000	1.1
Dividends to share-holders	54,000	.4
Expenses	21,19,000	15.4
Depreciation, transfer to investment, reserve funds, etc.	23,19,000	16.8
Increase to funds	36,91,000	26.9
Total	1,37,35,000	100

The total expenses in connection with life assurance business amounted to 20 per cent of the premium income in 1915-16, as against 22½ per cent in 1914-15 and 24 per cent in 1913-14.

The life assurance funds of Indian companies amounted to over R7 crores in 1915-16, against R6½ crores in 1914-15 and R5½ crores in 1913-14. These funds earned interest at the rate of 4½ per cent on the average, after deduction of income-tax. The total amount of paid-up capital of the companies at the end of the year amounted to R38 lakhs, and the total realisable assets, consisting of mortgages, loans, Government promissory notes, debentures and railway shares, house property and other investments, stocks, interests, deposits, etc., amounted to R8,33 lakhs.

The following table illustrates the distribution of assets among the different classes of investments held by Indian companies, as compared with that of British companies :—

Nature of Assets	Percentage to total assets of	
	Indian Companies	British Companies
Mortgages and Loans on rates	3.3	25.5
Debentures including all British, Indian and Colonial Municipal Securities*	18.0	30.0
Foreign Government and Municipal Securities	...	8.1
Preference, Guaranteed and Ordinary shares	2.1	9.0
House and Landed Property	5.9	8.5
Life Interests and Reversions	...	2.1
Outstandings	2.6	3.0
Loans on Personal Securities	.3	.5
„ on Policies	7.5	5.4
British, Indian and Colonial Government Securities	54.6	4.8
Accrued Interest	1.1	.8
Cash	2.9	2.0
Preliminary expenses, etc.	†1.7	.3
	100	100

* As most of the Indian Municipal Securities are in the form of debentures, it has been assumed for convenience of comparison that all British and Colonial Municipal Securities as well as all Indian Municipal Securities are debentures.

† Excluding the combined Investment contracts of the Hindustan Co-operative Insurance Society of Calcutta.

It will be seen that Indian companies as compared with British have a much smaller proportion of their assets invested in mortgages, debentures, foreign securities and in shares of all kinds, but a very much larger proportion in Government securities.

New policies	The total amount of new sums assured by Indian companies during the year 1915-16 was about			R1,75 lakhs. Details for the different kinds of policies are given in the marginal table. Over three-fourths of the total amount is under endowment assurance policies, providing for payment of the sum assured at the end of the stipulated period or at the death of the life assured, if it occurs previously. Whole life assurances come second in point of magnitude with a total of R21 lakhs.
	Policies	Sums assured	Proportion to total	
		R		
	Whole Life	21,29,000	12.1	
	Limited Payment	13,56,000	7.7	
	Endowment Assurance	1,35,41,000	77.2	
	Children's Endowments and other classes	5,16,000	3.0	

The average rate of annual premium payable under the policies issued by Indian companies exceeds 5 per cent of the sum assured.

Sums assured	The total sums assured, including bonus additions under the policies (both old and new) in force at the end of the year 1915-16, was over R22 ¹ / ₁₀ crores. This is about R69 lakhs or 3 per cent less than the corresponding amount at the end of the year 1914-15.		

Policy Stamp duty	Prior to 1916 the minimum rate of stamp duty on policies was six annas for a policy insuring a sum not exceeding R1,000. In order to encourage industrial life insurance in India the duty was reduced in 1916 to two annas for policies of R250 and under, and four annas for policies of over R250 but not exceeding R500.

Part II

Principal Heads of Revenue, Land Revenue, Opium,
Salt, Stamps, Excise, etc.

LAND REVENUE

[FOR TABLES, SEE PAGES 136 AND 137]

This section shows the details of land revenue receipts and expenditure. Five years' figures have been given in each table for each province.

The total land revenue, which represents over a quarter of the total revenue of India, is made up on the average of the last five years, chiefly of receipts under the heads stated in the margin. Receipts from the sale of proprietary right, waste lands, etc., and recovery of survey and settlement charges amounted to about 2 per cent. Land revenue due to irrigation amounts to about R3 crores and represents 7 per cent of the total land revenue, but is deducted therefrom to arrive at the net land revenue.

The ordinary land revenue amounts to R31½ crores, of which about R6¾ crores are contributed by Madras, R6½ crores by the United Provinces, R4½ crores by Bombay, R3½ crores by the Punjab, about R3 crores by Burma, R2¾ crores by Bengal, about R2 crores by the Central Provinces and Berar, R1½ crores by Bihar and Orissa, R¾ crore by Assam, and about R¼ crore by the North-West Frontier Province. The permanent settlement system obtains over the greater part of Bengal and Bihar, nearly a third of Madras, some districts of the United Provinces, and other scattered tracts. In 1912-13 land revenue rose by a crore of rupees over the preceding year. The largest increase took place in the Punjab (R37.5 lakhs), owing to higher receipts from the sale of proprietary rights in the canal colonies and the revision of assessments in the Chenab colony. Important increases also took place in Burma (R24.5 lakhs), owing to good agricultural conditions of the year, and in Madras (R18.3 lakhs) owing to certain arrear collections. In 1913-14 there was an increase of R41.7 lakhs over the preceding year, but in 1914-15 there was a decrease of 28 lakhs. In 1915-16 the land revenue again rose by over a crore of rupees, mainly due to an increased demand on revenue, the absence of remissions and suspensions, and larger recoveries of outstanding arrears. The falling off of R7.6 lakhs in 1916-17 is attributable mainly to remissions and suspensions necessitated by a deficiency in the winter rains and in consequence of the damage caused to crops by cyclone and floods. The Punjab, however, showed an increase owing to an excellent *Kharif* harvest and the extension of colonisation operations and new settlements.

About 97 per cent of the receipts from assessment of alienated lands less quit-rents, is contributed by the Bombay Presidency, where a large revenue is derived from assessment on *inam* lands. The Punjab contributes about 2 per cent, while the share of Bengal is below 1 per cent.

Nearly the whole of the capitation tax is derived from Burma (97 per cent), the remaining 3 per cent being contributed mainly by Assam.

Burma is responsible for nearly two-thirds of the fisheries and miscellaneous revenue. The Punjab and the United Provinces contribute from R9 lakhs to R6 lakhs each; Bihar and Orissa, the North-West Frontier Province, Bengal, Bombay, Madras, the Central Provinces and Berar, and Assam, follow with shares varying from R1½ lakhs to R4 lakhs each.

Land revenue due to irrigation is derived chiefly from Madras, Bombay, the United Provinces, and the Punjab. In the last five years this item of revenue has increased from R230 lakhs to R274 lakhs or by 19 per cent, and the year under review (1916-17) shows an increase of 3 per cent over 1915-16.

The expenditure on land revenue (including district administration) is about 17 per cent of the receipts and represents nearly 5 per cent of the total expenditure. The detailed items on the five years' average

Charges of district administration	45 per cent	are stated in the margin. The expenditure on
District charges	24 per cent	district administration is highest in Madras,
Survey and settlements	12 per cent	which is answerable for about 19 per cent. The
Allowances to district and village officers	11 per cent	United Provinces comes next with a share of 18 per
Commissions on collections	4 per cent	cent, Bombay accounts for 16 per cent, Bengal for
Management of Government estates and grazing		10 per cent, Burma and the Punjab for 9 per
lands	2 per cent	cent each, Bihar and Orissa for 7 per cent, the
		Central Provinces and Berar for 5 per cent, Assam

for 3 per cent, and the North-West Frontier Province for about 2 per cent.

Bengal leads with a share of 29 per cent of the expenditure on survey and settlements, Madras accounts for 17 per cent, Bihar and Orissa for 16 per cent, the Punjab for 13 per cent, Burma for 9 per cent, the Central Provinces and Berar for 6 per cent, and Assam for 2 per cent.

The United Provinces accounts for 26 per cent of the expenditure under district charges. Madras comes next with 20 per cent, Bombay with 19 per cent, the Punjab and Burma with 11 per cent each, and the Central Provinces 8 per cent.

Nearly the whole (96 per cent) of the charges on account of commissions on collection is incurred in Burma and Assam.

Madras is answerable for 62 per cent of the expenditure under "Allowances to district and village officers," Bombay nearly 21 per cent, and the Central Provinces 16 per cent.

* Compiled from the Finance and Revenue Accounts of the Government of India

(a) Includes Ajmer-Merwara, Coorg, Bangalore, Baluchistan and Central India Agencies

(b) The chief reasons why the receipts under this head are so large in Burma and so small in Bengal are (1) the Burma figures of miscellaneous revenue include a large amount derived from petroleum, which does not occur in Bengal; (2) owing to the permanent settlement the Government receipts from the fisheries in Bengal are very small as compared with those in Burma where there is no permanent settlement

No. 2.—LAND REVENUE EXPENDITURE in each PROVINCE in each official year, 1912-13 to 1916-17

(a) In Bombay the settlement work is generally entrusted to ordinary administrative officers and not to officers specially appointed for the purpose as in other provinces

(b) In provinces other than Bombay this head shows charges on account of "supervision of land records" only, whereas in Bombay besides the supervision charges it includes other items, such as the cost of (1) Central Division Survey Party, (2) Alienation Office, Poona, (3) City Land Records Estate, (4) special measurement operations and demarcation of waste lands in Sind

(c) Owing to the peculiar system of revenue collection in Burma and Assam the practice of collecting revenue by paying commission to the collecting agency is followed more largely in these provinces than elsewhere

FORESTS

[FOR TABLES, SEE PAGES 139 TO 158]

The tables in this section show statistics regarding State forests only, i.e., lands administered as forests by the Forest Department of the Government of India under legal enactments for the time being in force dealing with forests. There are in British India immense forest areas outside the direct control of the Forest Department, which are managed by district officers, local boards or municipalities, or by private owners, statistics regarding which are not shown in these tables. Forest areas in Native States also are not taken into account in these tables.

Classes of forests

The forests under the direct control of the State are classed as "Reserved," "Protected," and "Unclassed" or "Public" forest lands. The "Reserved" forests are intended to be maintained permanently for the supply of timber, fuel, and other produce, or for the protection of the water-supply or other similar reasons. The "Protected" forests may be either in a state of transition to reserves or intended to remain permanently in the second class. In the former case it has been found necessary to prohibit within these areas certain acts harmful to the forest until such time as careful examination permits of a decision whether more stringent rules shall be enforced; and in the latter the object in view has been to provide for the more beneficial exercise of rights by local communities. The "Unclassed" or "Public" forest lands are those given over with even fewer restrictions (in some cases to the extent of exemption from the operation of forest law) for the use of the public.

Extent of forests

Table No. 3 shows all State forest lands and proportion thereof to total area in British India in each year from 1896-97 to 1915-16. Out of the 249,000 square miles under State management in 1915-16, which is 23·1 per cent of the total area (1,079,481 square miles) of British India, 99,205 square miles or 9·2 per cent were reserved, 9,712 square miles or 0·9 per cent were protected, and the remaining 140,083 square miles or 13 per cent were unclassified.

Table No. 4 shows all State forest lands and proportion thereof to whole area in each province in each of the five years ending 1915-16. These provincial statistics show that in 1915-16, the percentage of forest land varied from 1·4 per cent in Baluchistan and 3·4 per cent in the Bihar and Orissa to 45·7 per cent in Assam, 63·2 per cent in Burma and 70·2 per cent in the Andamans. The largest area of unclassified forests occurs in those provinces where the population is scantiest; in fact Burma claims 113,755 square miles or 81·2 per cent of the total area under this head, while Assam appropriates the bulk of the balance, i.e., 17,461 square miles or 12·5 per cent.

Working plans

Table No. 5 shows the progress of working-plans in each province in each official year from 1911-12 to 1915-16. Under the Forest Acts the Provincial Government deposes an officer who compiles a working-plan which regulates the amount and removal of outturn and prescribes the other requisite operations, such as sowing, planting, thinning, and cleaning. Working-plans are generally compiled for periods of 20 to 40 years, after which revision or possibly the introduction of an entirely new system of management will be necessary. Statistics for 1915-16 show that 57,444 square miles or 57·9 per cent of the area of reserved forests are worked under regular plans.

Financial results

The direct value of forests to the State may be gauged by the financial results of their working as shown in tables Nos. 6 to 10. In 1915-16 the gross revenue collected through the agency of the Department amounted to R3·11 crores and the total expenditure to R1·86 crores, the net revenue being R1·25 crores or R50 per square mile of land under the control of the Forest Department. Some 31 per cent of the total revenue is derived from Burma, while next in importance in this respect come the forests of Bombay and Madras and of the United Provinces and the Central Provinces and Berar. The sale of timber and fuel produced R2·30 crores, minor produce R27 lakhs, and receipts from grazing R32 lakhs. The steady improvement in forest revenue is worthy of note. Between 1896—1901 it averaged R1·87 crores. By 1905-06 the quinquennial average had risen to R2·20 crores, by 1910-11, to R2·62 crores, and by 1915-16, to R3·11 crores. During the same period the expenditure had increased from R105 lakhs to R123 lakhs, R147 lakhs and R177 lakhs, respectively. The proportion of expenditure to gross revenue was in 1915-16 45 per cent, and of this 52 per cent was spent on administration, and 43 per cent on working, protection, and improvement, while 2·4 per cent was expended on the construction of new reserves by settlement and on the demarcation and survey operations.

The net revenue of the State forests has between 1895—1916 risen from R78 lakhs to R125 lakhs, and the yield is, as the result of protection and improvement, more than sufficient to meet increased demands on their produce. It may be added here that timber and other produce from State forests is given free (or at reduced rates) in large quantities to the people resident in the vicinity. In 1915-16 the value of these grants amounted on a very low estimate to about 27 per cent of the gross revenue collected from the State forests.

Forest produce

Table No. 10 shows the total outturn from the forests under the control of the Forest Department in each province. It is generally, for the sake of convenience, classed under timber including fuel, bamboos, and other minor produce including grass and grazing, besides all those numerous products found or manufactured in a forest. The total outturn of timber and fuel from State forests amounted, on an average of the five years ending 1915-16, to 279,958,000 cubic feet; the average outturn per square mile varies considerably in the different provinces, being dependent on the intensity of working and the density of the population. The yield of minor produce (including bamboos) from State forests was valued in 1915-16 at R1,16,81,000, the chief items, besides bamboos, being grazing and grass, caoutchouc, lac and dyes, cutch and gambier, cardamoms, myrobalans, and other tanning materials.

Protection of forests

Table No. 11 shows the results of protection of forests from fire and cattle and of grazing. Fire conservancy operations in British India extended in 1915-16 over 45,585 square miles, which is 46 per cent of the total area of reserves. The area closed to grazing amounted to 51,640 square miles, of which 26,691 were in Burma, where cattle are few and vast tracts of waste land are still available outside reserves. The area closed to browsers, principally goats, amounted to 23,229 square miles situated chiefly in the Bombay Presidency and the Central Provinces and Berar. The number of animals grazed were 9,551,136 on payment and 5,212,057 free.

FORESTS*

No. 3.—AREA (in square miles) of all FOREST LANDS and proportion thereof to total AREA in BRITISH INDIA in each year from 1896-97 to 1915-16

* Compiled from the Annual Statistics relating to Forest Administration in British India published by the Government of India and from Provincial Reports on Forest Administration.

† Unclassed State forests or 'public forest lands' as they are often called, include in many provinces all unoccupied waste, often entirely devoid of trees. So the statistics do not necessarily represent the wooded area.

‡ This large increase is due to the incorporation for the first time of the statistics for Burma.

FORESTS

(140)

No. 4.—AREA (in square miles) of all FOREST LANDS and proportion thereof to total AREA in each PROVINCE in BRITISH INDIA, in each year from 1911-12 to 1915-16

OPIUM

[FOR TABLES, SEE PAGES 161 TO 175]

The region in which the poppy was cultivated in 1916-17 for the manufacture of "Bengal opium" ^{Bengal opium} comprised thirty-two districts in the United Provinces of Agra and Oudh. The whole Department has, with effect from the 29th September, 1910, been under the control of one Opium Agent, with headquarters at Ghazipur. At Ghazipur there is a Government factory where the crude opium is manufactured into the form in which it passes into consumption. The cultivation of the poppy and the manufacture of opium are regulated by Act, XIII of 1857, as amended by Act, I of 1911, and are under the general control of the Lieutenant-Governor and the Board of Revenue of the United Provinces and the immediate supervision of the Opium Agent at Ghazipur. The possession, transport, import, and export of opium are regulated by rules framed under section 5, Act I of 1878 (the Indian Opium Act). Cultivation is permitted only under license granted under the authority of the Opium Agent. The area to be cultivated is fixed by the license, and the cultivator is bound to sell the whole of his production to the Opium Department at the rate fixed by Government. This rate was fixed in 1894-95 at Rs. 6 per seer of 70° consistency, which was raised to Rs. 7-8 per seer in 1913-14 and to Rs. 9 per seer in 1916-17. Advances, on which no interest is charged, are given to licensed cultivators at the time of executing the agreement, and from time to time (though ordinarily not more than two advances are given) until final delivery. In March, April, and May the opium is made over to the officers of the Department and weighed and tested, and as soon as possible afterwards each cultivator's accounts are adjusted, and the balance due is paid to him. After weighment the opium is forwarded to the Government factory at Ghazipur, where it is manufactured in three forms,—(a) opium intended for export to foreign countries, departmentally known as "provision" opium, (b) opium intended for consumption in India and Burma, departmentally known as "excise" opium and (c) medical opium for export to London. Provision opium is made up in the form of balls or cakes, each weighing 3·5 lb, and is packed in chests, each chest containing forty cakes, weighing 140½ lb. It is generally of 71° consistency. Excise opium is made up in cubical packets, each weighing one seer, 60 of which are packed in a case. It is of higher consistency than the "provision opium." Medical opium is made up in cakes each weighing 2 lbs. Provision opium is sold by public auction in Calcutta. A notification is published annually, generally about the month of June, stating the number of chests which will be put up for sale in each month of the next calendar year, and the quantities so notified are not altered without three months' notice. Sales are conducted month by month by the Bengal Government. 7,000 chests were notified for sale in 1917 for shipment to non-China markets. The number of chests actually sold was 4,615. In addition to this 4,500 chests were sold to the Government of the Straits Settlements, 2,200 to the Government of Netherlands Indies and 410 to the Government of Hongkong. The duty levied by Government on each chest may be taken to be the difference between the average price realised and the average cost.

Under a convention made in 1815, the French Government has the right to purchase not more than 300 chests of opium each year, at the average price realised for the rest of the opium at the sales. This right has been commuted for a money payment, amounting to Rs. 8,000 a year, under an agreement remaining in force until the 31st December, 1918. The agreement binds the French Government to take effective steps for the prevention of illicit traffic in opium between French and adjacent British territory.

The cultivation of the poppy is prohibited in British provinces other than the United Provinces, the Punjab, and Burma. The only licit supply of opium for internal consumption is what is known as "Bengal Excise Opium." This is supplied from the Ghazipur Opium Factory and from the Calcutta Presidency godowns to Government treasuries and depôts, whence it is issued, on payment, to licensed vendors and druggists only. In the accounts a sum, Rs. 11 per seer, out of the proceeds of this opium is credited under opium as representing the estimated cost of production. The remainder of the proceeds is credited under excise. The various provinces submit their indents through the Board of Revenue, United Provinces. These are forwarded to the Opium Agent, Ghazipur, and the quantity indented for is supplied direct from the Opium factory to the treasuries and Government depôts, and the issues are made from the latter to licensed vendors.

Malwa opium is almost entirely produced in the Native States in the Central India and Rajputana Agencies ^{Malwa opium} and the Baroda State. In the Khairpur State (Sind) it is grown in the Khairpur taluka, but production is limited to the requirements of the State. A chest of Malwa opium contains 140 lbs. in weight. The opium is of 90° to 95° consistency and is usually packed in half-chests for convenience of carriage.

Rajputana and Central India.—In the Native States of Rajputana and Central India the British Government does not control the cultivation of the poppy or the manufacture of opium or its local consumption. Malwa opium was imported into the Bombay Presidency for local consumption in British India as well as for exportation by sea to China, a duty, commonly called pass-duty, being levied by the British Government. This pass-duty constituted the British revenue from Malwa opium: and the rates varied from time to time. The importation of Malwa opium for local consumption in the Bombay Presidency has been discontinued with effect from the 1st April, 1912, the Presidency being supplied from Ghazipur. Under arrangements made between His Majesty's Government and the Government of China a fixed number of chests of Malwa opium could only be exported to China. The export has, however, been prohibited since 1st January, 1914.

Baroda.—The cultivation of the poppy and the manufacture of opium are permitted in Baroda, under a State monopoly, for consumption in the State. The State has, by agreement, assimilated its retail system

and selling prices to those in force in adjacent British districts, and prevents the introduction of Baroda opium into British territory and into the territories of adjacent Native States.

The following purchases of opium from the Native States of Central India and Baroda have been made by Government :—

	Mds. at 70°		Mds. at 70°
1912-13	6,247	1915-16	20,812
1913-14	20,502	1916-17	7,887
1914-15	13,551		

This opium is used for the preparation of excise opium.

Punjab and Burma.—The cultivation of opium is permitted in certain districts of the Punjab and Burma on a very limited scale for local consumption.

NOTE.—The receipts in Bengal include the cost price of opium manufactured for the Excise Department, namely, the figures in the last column of the next table and the corresponding figures for preceding years. There was, however, one exception in 1871-72, when the cost price Rs15,49,050 was, by special arrangement, credited to Excise revenue.

(a) Includes Rs20,535 being the allowances of a delegate to the International Opium Conference at Hague, and miscellaneous expenditure.

NOTE.—(1) All opium imported into China reaches through Hongkong and Shanghai. But smuggling is extensively carried on between Hongkong and the adjacent coast above and below Canton and at other Chinese ports, and the net imports in the Chinese Customs Accounts state imperfectly the consumption of Indian opium.

(2) The figures under the head "Sorts" denote Persian and Turkish opium, chiefly Persian, and boiled opium

(a) Includes figures for Ningpo (a Central Port) up to 1896

(b) Shows figures for the port of Shanghai only up to 1896

(c) Includes figure for Wenchow and Hangchow (Central Port) up to 1896

SALT

[FOR TABLES, SEE PAGES 180 TO 197]

Production. The total quantity of salt produced in India in 1916 amounted to 37 million maunds (1,359,000 tons). This quantity was supplemented by some 13 million maunds (463,000 tons) of imported salt, the total quantity produced and imported amounting to about 50 million maunds (1,822,000 tons). About 70 per cent of the quantity annually consumed is generally produced in India. Importation is practically limited to salt landed in Bengal and Burma from England, other countries in Europe, Aden, Italian East-Africa, and some Egyptian ports on the Red Sea. There is a trifling import by land by trans-Himalayan routes.

The localities in India where salt is produced, and the quantity (maunds) Produced in each of the last three years, are :

	1914	1915	1916
Burma : on the coast from sea-water and in Upper Burma from brine wells	663,709	776,401	1,055,503
Bengal : educed in the process of refining saltpetre	169	25	52
Northern India :			
Sambhar lake	5,159,167	6,961,721	3,090,168
Punjab mines and Kohat	4,185,611	4,795,386	4,909,115
Rajputana sources other than Sambhar	1,265,900	1,485,161	1,345,451
Mandi, Sultanpur, and the saltpetre refineries	177,456	222,664	302,691
	10,788,134	13,464,932	9,647,425
Central India (Datia, Gwalior) and Kashmir	4,697	4,468	4,297
Sind : Moach (near Karachi), Saran, and Dilyar deposits	382,540	453,611	456,134
Bombay : on the coast and in the Runn of Kutch	12,871,833	13,817,709	12,739,522
Madras : on the east coast	8,135,639	9,411,028	13,098,421
TOTAL	32,846,721	37,928,174	37,001,354

In 1915 the quantity of salt manufactured by Government exceeded the quantity produced by private manufacturers, but in 1916 the quantity of private salt exceeded that of Government salt.

Sea salt on the coast of Burma is produced by artificial heat ; on the coasts of Bombay, Sind, and Madras by solar evaporation. In Rajputana and Central India the salt is obtained by evaporation from brine deposits at Sambhar and other places. In the Punjab and Kohat, rock salt is obtained from the Salt Ranges and at Mandi, and brine salt from the sources at Sultanpur, near Delhi. About two-thirds of the whole production is represented by sea salt evaporated on the coasts of Bombay and Madras.

Consumption and revenue

The figures below indicate the progress in consumption in the last twenty-nine years :

	Average annual quantity Maunds	Average annual duty R
1888-89 to 1892-93 (average)	33,431,896	8,02,69,704
1893-94 to 1897-98	34,210,675	8,25,80,980
1898-99 to 1902-03	35,678,602	8,67,59,679
1903-04 to 1907-08	39,597,341	6,15,89,957
1908-09 to 1912-13	44,549,711	4,48,28,374
1913-14	49,050,804	4,94,20,176
1914-15	51,644,674	5,19,97,028
1915-16	47,843,871	4,95,38,637
1916-17	53,808,368	6,83,76,743

Administration

The administrative system for the control of production and the collection of the revenue varies in accordance with local conditions and methods of production. Detailed information regarding the salt administration will be found in the 13th issue of the volume of Financial and Commercial Statistics. A brief account is given below.

Burma

Lower Burma.—Salt is made at scattered points along the coast by the boiling of sea-water and, in a few places, of saline earth, in pots and cauldrons. Manufacture is permitted in ten districts only. In seven of these a system of direct taxation on output is in force. In the other three, instead of ascertaining the quantity of salt actually produced, the productive capacity of the vessels employed is estimated, and a charge made on each which is supposed to be about equivalent to the duty on imported salt from time to time. The present rate of import duty is R 1-4 per maund.

Upper Burma.—In Upper Burma in 1890 a composition duty on the pots or cauldrons used in manufacture was fixed in substitution for previous systems. The duty on salt locally produced is less than the duty imposed on imported salt, viz., R1-4 per maund, and it is believed that it is not possible to level up the former to the latter without killing the local industry.

Bengal

In October 1897 the administration of the Orissa Salt Department was made over from the Commissioner of Salt Revenue, Madras, to the Commissioner of Excise under the Government of Bengal. Advantage was taken of the transfer to create a combined preventive establishment for the whole of Bengal littoral, and the Indian Salt Act, XII of 1882, was extended from the 9th April, 1898, to the districts of the 24-Parganas, Midnapur, Khulna, Backerganj, and Chittagong, Bengal Act VII of 1864 also remaining in force in them. In March 1901 the Act was extended to the districts of Howrah and Noakhali. A proposal for the reorganisation of the Salt Department having been sanctioned by His Majesty's Secretary of State for India in February, 1905, preventive

operations were started in Chittagong in October, 1900, and in Noakhali in October, 1905, tentatively for three years. They were also inaugurated on an independent footing in Howrah, where they had been carried on tentatively since January, 1902, by a small party under the Inspector of the Tamluk (Terapakia) Circle in the district of Midnapur. There is no preventive establishment for the district of Backerganj. No salt is produced or manufactured in the province, except that educed in the process of manufacture at the saltpetre refineries in Calcutta and its suburbs which is subject to a duty of R1-4 a maund since the 1st March, 1916. In consequence of the territorial re-distribution on the 1st April, 1912, the administration of the Orissa Salt Department was made over to the Commissioner of Excise and Salt under the Government of Bihar and Orissa.

The following are the descriptions of salt now commonly imported into Bengal :

Manufactured by solar evaporation : from Bombay, Madras, Egyptian Red Sea ports, Aden, and Spain ;

Manufactured by boiling : from Liverpool.

The rate of duty per maund on salt in Bengal decreased from R3-4 in 1877 to R1 in 1907. The duty has been raised from R1 to R1-4 with effect from the 1st March 1916.

From the creation of salt monopoly in 1765, a preventive establishment has been employed for the protection of the revenue, for the most part separate from and independent of the agency controlling the manufacture and sale of salt.

The control of the Salt Department in the saliferous tract of Cuttack, Balasore, and Puri in the Orissa Bihar and Division was, previous to the year 1897, under the Government of the Madras Presidency. There were at Orissa that time two Government factories for the manufacture of salt in this area, both on the Chilka Lake within the limit of the Puri district. These factories were closed, and the manufacture of salt discontinued in Orissa with effect from the 1st October, 1897, and the control of the Salt Department in Orissa was transferred to the Bengal Government from that date. With the creation of the new Province in 1912 the control of the Salt Department in Orissa was made over to the Commissioner of Excise and Salt, Bihar and Orissa, and on 1st October 1916 the Orissa Salt establishment was amalgamated with the Provincial Excise establishment.

The control of the Salt Department in the Bihar districts rests with the Commissioner of the Northern India Salt Revenue Department, and figures for Bihar are included under Northern India. Saltpetre is the principal variety of salt manufactured in this part of the country.

No salt is manufactured in, or imported direct from foreign countries into, Chota Nagpur, and no figures for consumption within Chota Nagpur are available.

There is no direct import from foreign countries into Orissa. Salt imported from foreign countries into Calcutta is re-imported into the bonded warehouses at Chandbally, duty on such salt being paid in Calcutta.

The whole Inland Customs Department (now the Department of Salt Revenue in Northern India) is administered by the Commissioner of Northern India Salt Revenue, formerly responsible to each of the local Governments and Administrations within whose jurisdictions the customs organisation worked, but now immediately under the Government of India. Northern India

The salt works at Sultanpur near Delhi are worked under the supervision of the Northern India Salt Revenue Department, which has also the charge of the mines in the Salt Range in the Punjab, and of a force designated the Internal Branch maintained in Oudh, the Province of Agra, the Punjab, Rajputana, and Bihar, for the supervision of the saltpetre trade, the levy of duty on salt educed from saltpetre, and the control of the manufacture of other saline substances, such as sulphate of soda and carbonate of soda.

The general rates of duty on Rajputana salt have varied between R3 in 1877 and R1 in 1907. Salt excavated in the Sind Saugor Doab and the Kalabagh mines is subject to a duty of R1-4 per maund since the 2nd March, 1916, as also salt from the Kohat mines. Salt educed in the process of manufacturing saltpetre has always been subject to the ordinary duty.

There are three salt sources in Sind from which salt is now issued to the public, namely, the Maurypur works Sind and the Saran and Dilyar deposits. The Maurypur works, where salt is manufactured by solar evaporation, were opened in the year 1878, and from these the greater portion of the province is supplied. The works are situated on the Moach plain adjacent to the end of Karachi harbour, from which by channels the brine is obtained, reaching the storage wells by percolation through a richly saline soil which greatly increases the strength of it. In 1884 a depôt for the storage and sale of Maurypur salt was opened at Sukkur. Maurypur salt is supplied free of duty to the State of Khairpur, local manufacture there being suppressed. A depot was opened at Karachi in 1916 for the sale of Maurypur salt to break up a ring of merchants who had monopolised the land transport between Maurypur and Karachi.

The Saran and Dilyar deposits were opened in 1879 and 1882, respectively. The salt is formed in a lake from which, when the water dries, salt is excavated and stored. It is supplied to the inhabitants of the neighbouring villages of the districts of Thar and Parkar and Hyderabad.

Salt is produced in Bombay for local consumption and for export by land to Central India, Rajputana, Bombay the Central Provinces, the United Provinces, and the Nizam's territories, and by sea to the Malabar Coast of Madras and to Calcutta. Under existing arrangements, exports, both by land and sea, pay full excise duty in

Bombay, with the exception of those to Travancore and Cochin on which a nominal charge of three pies per maund, only to cover the cost of establishment at the salt pans, is levied in accordance with a trade convention concluded with Travancore and Cochin in 1865.

Except in Gujarat, the excise system is followed, under which licenses are issued for private manufacture at approved places which are guarded, and whence no removals are allowed, except upon payment of duty, or under credit for payment. In Gujarat, where all the works in British territory are the property of Government, the monopoly system was introduced in 1873-74, and the manufacture was concentrated at two places—Kharaghora on the borders of the Runn, and Dharásna on the sea coast of the Surat district. At Kharaghora salt in large crystals is made from brine wells under departmental supervision, bought from the manufacturers as made, stored, and sold at the cost and risk of Government. At Dharásna the salt is ordinary sea-salt and Government merely fixes the price at which it is to be sold without taking it over or interfering directly with manufacture. A small quantity of salt is issued annually free of duty from the works at Kharaghora to certain Native States and Chiefs in pursuance of the arrangements for the establishment of the monopoly.

Fish-curing.—In order to reduce the hardship caused by the interference of the preventive operations of the Bombay Salt Department with the use of illicit salt and salt earth for fish-curing, yards for fish-curing at which salt is sold at 8 annas a maund were established at all important fishing centres along the coast; there were 31 yards in 1916-17.

Madras

There are two systems of salt manufacture in the Madras Presidency, under one of which the salt manufactured is sold to Government only and is disposed of by Government to the trade, whilst under the other Government levies an excise duty, *plus* a small and varying cess to cover interest on capital cost of works, the property of Government, and the cost of any repairs effected by it on account of the licensees at the time of removal from the factory, and allows the manufacturers to make such arrangements as they please for the disposal of the salt. In both cases the production of salt is only allowed in well-fenced factories and subject to Government supervision, but, except in matters endangering the revenue, little interference is exercised in the details of manufacture under the excise system. The rate paid by Government for its salt varies, but may be taken roughly at an anna and a half per maund. This is only the bare cost of manufacture and does not include the cost of works, storage, transport, etc. The duty on salt is ordinarily payable before the salt is removed from the factory, but six months' credit may be allowed to approved merchants on the deposit of security in Government promissory notes and a few other specified kinds of securities.

In Malabar no salt is manufactured, and that region is supplied by imports from Bombay, Goa, and other places.

By agreement the French Government undertakes to prevent the manufacture of salt throughout its possessions in India, and in consideration receives payments annually aggregating R4,41,600, and obtains its supply of salt at cost price. The authorities of the French settlements in Madras indent on the nearest British factories for the salt they require and undertake to sell it at the approximate prices charged in British territory. The correspondence is not complete because they sell by measure and not by weight.

Until 1865 the manufacture of salt was a Government monopoly in Travancore and Cochin, the selling price in Travancore being R1-1 a maund, and in Cochin annas 12. In that year both the States agreed to adopt the British Indian selling price of salt.

Fish-curing.—In order to reduce the hardship caused by the interference of the preventive operations of the Madras Salt Department with the use of illicit salt and salt earth for fish-curing, yards for fish-curing at which salt is sold at cost price (that is, cost *plus* cost of transport from the factory) were established at all important fishing centres along the coast; there were 116 yards in 1916-17.

NOTE.—This table states the quantity of salt actually consumed and the duty thereon calculated at the rate in operation in each province, except that the figures under Bombay include salt exported to the United Provinces, Central India, the Central Provinces, Mysore, and the Nizam's Territories. From the 18th March, 1903, the general rate of duty was reduced from R2½ to R2 per maund, and in the case of salt manufactured in certain Kohat mines the duty was altered from R2 per Lahori maund to R1½ per Indian maund. A further reduction in the general rate from R2 to R1½ per maund took effect from the 22nd March, 1905. The general duty was again reduced from R1½ to R1 per maund with effect from the 20th March, 1907. With effect from the 1st March 1916, the general rate of duty was raised from R1 to R1-4 per maund.

† Includes Orissa up to 1910-11, and excludes Eastern Bengal from 1st October, 1905, to 31st March, 1911, figures for that tract for that period not being available.

‡ Figures up to 1910-11 included under Bengal.

(a) The sums entered under Duty include duty on excised as well as on imported salt. The quantity of the former is not entered in the figure under Quantity, only rough estimates being available.

(b) Exclusive of 46,706 maunds of salt issued under the credit system.

(c) Exclusive of 2,929,191 maunds of salt issued under the credit system.

(d) Exclusive of R13,47,626 adjusted under the credit system.

(e) " R41,06,716 " " " "

(f) Exclusive of R59,69,569 adjusted under the credit system.

(g) " R92,85,820 " " "

(h) " R99,33,107 " " "

(i) " R88,84,290 " " "

(j) " R86,69,906 " " "

(MISCELLANEOUS RECEIPTS excluded), in each official year from 1897-98 to 1916-17

* The figures for years prior to 1916-17 represent the quantity of salt for which duty was credited in the treasury and for which permits of removal were granted. For 1916-17 the figures represent the total quantity of salt for which duty was credited in the treasury whether permits of removal were granted during the year or not.

§ The figures for years prior to 1916-17 represent duty realised on which permits were granted. For 1916-17 the figures represent the total duty credited in the treasury.

(a) Per Lahori maund of 102½ lb up to 17th March, 1903

(b) Special rates charged at Ganjam and Ichapur (Suria) from 1874 to 1878

(c) This is the general selling price of Government salt, but there were also other rates varying with the quality of salt

(d) Duty on imported salt

(e) Duty on salt in districts where the system of direct taxation is in force

(f) The price of salt at Khewrah was one anna and one pie, of the other mines in Cis-Indus Division 10 pies a maund up to 31st January, 1912, after which it was sold at one anna and one pie from Khewrah and one anna per maund from other mines. From 1st April, 1912, the price of salt throughout the Cis-Indus and Kolabagh Mines Division was 1 anna and 2 pies per maund. From 1st November 1914 the price of salt was raised to 1 anna and 6 pies per maund

(g) The rates exceeded 3 annas at certain factories as a result of the sale of salt by auction

(h) There were also other rates varying with the quality of the salt and with reference to the auction sales. The prices ranged from 2 annas and 6 pies to Rs. 1-10 per maund in 1916-17

No. 37.—QUANTITY (in maunds of 82½lb) of SALT IMPORTED or MANUFACTURED, in each year from 1897-98 to 1916-17

STAMPS

[FOR TABLES, SEE PAGES 199 TO 217]

Classes of
Stamps

The stamp revenue is derived from two great classes of stamps (1) judicial or court-fee stamps, and (2) non-judicial or revenue stamps. Judicial or court-fee stamps are provided for by the Court-fees Act, VII of 1870; non-judicial stamps by the Indian Stamp Act, II of 1899. Both these Acts have been amended from time to time by subsequent legislation. The immediate control of the stamp revenue is vested in local Governments, subject to the general supervision of the Government of India. The revenue derived from stamps is shared between the Imperial and the Provincial Governments.

The stamps are manufactured in England, the quantities required for consumption being sent to India on annual indents. Two kinds of stamps—adhesive and impressed—are used to denote the payment of duty on instruments; and impressed stamps are again of two classes, namely, impressed sheets, the paper bearing the impression of stamps of varying values engraved thereon, and impressed labels which are affixed to instruments by Government officers empowered to do so. The various classes of stamps with their values are—

Unified postage and revenue stamps	Half-anna and one anna
Foreign bill stamps	from 2 annas to 6 rupees
Share-transfer stamps	" " " " 10 "
Special adhesive stamps	" " " " 1,000 "
Hundi stamped paper	" " " " 15 "
Impressed non-judicial stamps	" " " " 1,000 "
Adhesive court-fee stamps	" 1 anna " 6 "
Impressed " "	" 10 rupees " 1,000 "
Stamps for copies	" 2 annas " 2 "

Revenue

The revenue from stamps has increased steadily, as will be seen from the figures below :—

	Judicial R	Non-Judicial R	TOTAL R

* Constituted a separate province out of the Punjab in 1912

(a) Statistics are for 6 months from October 1912 to March 1913

EXCISE

[FOR TABLES, SEE PAGES 219 TO 256]

Revenue

During the ten years ending with 1916-17 the net receipts from the excise duties increased from Rs 85,16,000 to Rs13,03,05,000, the increase being at the rate of '47 per cent. The receipts from opium (consumed in India, not exported) rose from Rs1,47,06,000 to Rs2,11,46,000, being at the rate of 44 per cent. The net receipts from liquors and from drugs other than opium (including miscellaneous receipts), rose from Rs7,38,09,000 to Rs10,91,59,000, the increase being at the rate of 48 per cent. This large increase is due, not merely to the expansion of consumption, but also, to the imposition of progressively higher rates of duty and the increasingly effective control of the excise administration. The revenue from drugs (excluding opium) has risen in the ten years from Rs88,49,000 to Rs1,48,06,000, the increase being at the rate of 67 per cent.

Consumption

The consumption works out to 9 annas 2 pies per head of population in British India in 1916-17 as against 6 annas in 1907-08. The consumption in 1917-18 province by province is shown in the table below.

Consumption per head.			Consumption per head.		
	Rs.	A. P.		Rs.	A. P.
India, General	0	2 2	Bihar and Orissa	0	5 0
Béngal	0	5 1	Burma	0	13 5
Madras	0	14 4	Central Provinces and Berar	0	12 8
Bombay	1	5 3	Assam	0	13 4
United Provinces	0	4 7	North-West Frontier Province	0	2 5
Punjab	0	6 1	Delhi	0	9 8
			AVERAGE	0	9 2

The figures formerly given in these tables were revised in 1905, owing mainly to the inclusion of the duty on Malwa opium realised in the Punjab from 1882-83, the exclusion of certain receipts on account of the Excluded Local Funds in the Central India Agencies from 1893-94, and the inclusion of the license and distillery fees and duties realised in the Military Department from 1897-98 and of the excise revenue for Bangalore from 1900-01, which had formerly been omitted from the head "India, general."

Until 1903-04 the receipts on account of license fees for *tari* and opium in the United Provinces were included under the head "Miscellaneous receipts." The figures for these provinces have since been revised and the receipts on account of license fees for *tari* are shown under the head of "spirits" and those for opium license fees under the head of "opium." The revision has been carried out for all the years except in the case of Allahabad, where the receipts prior to 1901-02 are not available.

NOTE.—Until 1903-04 receipts on account of license fees for *tax* and opium in the United Provinces were included under the head "Miscellaneous receipts." The figures for the United Provinces have now been revised and receipts on account of license fees for *tax* are shown under the head of "spirits" and those for opium license fees under the head of "opium." The revision has been carried out, except in the case of Allahabad where the receipts prior to 1901-02 are not available.

* Includes Coorg, Central India, Andaman and Nicobar Islands, Ajmer-Merwara, and Baluchistan from 1882-83, and Bangalore from 1900-01

† From 1897-98 the figures include license and distillery fees and duties, etc., realised in the Military Department

‡ The increase in 1908-09 is due to the inclusion of receipts in Central India which were credited in former years to the Local Abkari Fund, which was abolished on 1st April, 1908
